SOW our "OUEEN CITY" LAWN GRASS SEED

AND QUICKLY SECURE A PERMANENT, RICH, GREEN, GRASSY CARPET. THE BEST LAWNS IN CANADA TO-DAY ARE FROM THIS MIXTURE.

"SHADY NOOK"

LAWN GRASS

Many lawns have bare and unslightly spots under trees and shaded places, which have been seeded, sodded, and every possible attention given to secure grass, but without success. There are but few grasses which will grow and thrive in such situations. Our "Shady Nook" mixture is a combination of dwarf-growing evergreen varieties, which, in their natural state, are to be found growing in woods and shady places, and will form a fine green sward. Ground that has been densely shaded by trees often becomes "sour," and if not properly drained is apt to be covered with a coating of moss. In such cases a light application of land drained is apt to be covered with a coating of moss. In such cases a light application of land plaster or wood ashes is most excellent, but the moss should be first removed by the use of a sharp rake. This should be done in the autumn and seeded with "Shady Nook" mixture the following spring. Per lb., 35c.; post-paid, 40c.

FANCY WHITE DUTCH CLOVER

Most valuable for lawns sown with Grass d. Per lb., 30c.; by mail (post-paid) 35c.

The EXPANSIVE TREE PROTECTOR

BECAUSE.

It is expansive. Expands with the tree. Will not tear, break loose, or rust out. It is durable. Will last for years. It is automatic. It both repels and kills. No crushing or burning of insects. It is cheaper than any other device because of its durability, and costs but little. It will not dry out or rot.

5th. It is easily adjusted to the tree. It is hooked around; no nailing or defacing;

once put on, it stays.

6th. The "Insecticide" the greatest and best yet discovered. It retains its potency for months. The cost of resaturation nominal.

Lastly. It meets every demand for relief. The band protects, and properly adjusted, forms an absolute deadline. The insecticide is a sure eradicator of all scales, and fertilizes the tree.

For several years insects, worms, caterpillars and bugs have made such a devastating havoc with the fruit, shade and ornamental trees of this country devastating havoc with the fruit, snace and ornamental trees of this country (first appearing in one section and then in another) that those interested in their culture have become desperate, as they have seen from time to time their beautiful trees defoliated during the summer, and the buds and blossoms which promised so much defeated in maturing into good and valuable fruit, as well as wholly destroyed by the work of the insects and cater-

pillars referred to.

Spraying may do some good in one instance, in another none. Bands of tar, paper, sticky substances and traps are suggested, but the results are not what are expected. So the evil goes on. The fruit crop is depleted or destroyed, and the truit that is grown is of a very poor quality, dwarfed and wormy, and if fit for the market at all, brings very unsatisfactory prices, and shade and ornamental trees lose their beauty and usefulness and finally die.

Relief must be had or ruin stares fruit growers in the face, and the defoliation and destruction of the trees of the country is a question of but a few years. It is now settled that a large percentage of the damage travels from the earth to the foliage by the trunk of the tree. Investigation, experiment and results have demonstrated this fact. Such being the case, anything that will prevent this pest from reaching the foliage and fruit is a valuable invention. Such is the Expansive Tree Protector mentioned at the head of this circular.

The device consists of a felt band especially prepared and saturated with a substance which is absolutely noxious and even repellent to insects, worms and bugs of every description. This pad is fastened to a wire expansive spring, by means of which it is fastened around trees and is adjustable to any and all trees, permits the tree to grow and does not injure the bark. To the pad and spring is attached an apron made of galvanized iron or other metal, the underside of which is covered with a sticky substance, inoculated with an insecticide that is sure death to all creeping things which infest a tree, so that if for any reason any insect, worm or bug should attempt to pass the band, a dead line is formed, and it is absolutely impossible for anything to pass it and reach the fruit and foliage. The solution used for saturating the band as well as the apron, is a secret to the manufacturer, and is the result of months of experiment, and no worm, insect or bug has yet passed one of these Protectors once properly adjusted to the tree, at the same time it is harmless to persons using it—also the trees. It is also an cradicator of the San Jose and other scales, and resurrects the tree into new life.

FREE ON APPLICATION. CIRCULARS SENT

PRICE LIST-Sizes: 1 ft., 1 ft. 6 in., per 25, \$5,00; 2 ft., 2 ft. 3 in., 2 ft. 6 in., 2 ft. 9 in., \$6,25; 3 ft., 3 ft. 3 in., 3 ft. 6 in., 4 ft. 9 in., \$8,75; 5 ft., 5 ft. 3 in., 5 ft. 6 in., 5 ft. 9 in., \$10,00. Not less than 25 in an order, but this number may be made up of different sizes Larger sizes furnished on order. A supply of Insecticide sufficient for one year is sent with the protectors. Further quantities supplied at 60c. per gallon F. O. B. Toronto.

Every order must be accompanied with remittance, either by Registered Letter, Draft, or Post Office Money Order, and for full amount covering the order, otherwise the value of remittance only will be sent, by reducing quantity ordered.

We positively give no Credit.

The S. B. Co. "give no warranty, expressed or implied, as to description, quality, growth, productiveness, or any other matter of any Seeds, Bulbs or Plants they supply, and will not be in any way responsible for the crop."

All Seeds ordered and purchased from them are supplied only on these conditions.

NOTE.—Safe arrival of all packages forwarded by mail guaranteed. See page 1 of Catalogue for information to purchasers.

FLOWER SEEDS

When ordering Flower Seeds you need only give the number of packets wanted and the number in Catalogue corresponding to the variety and price per packet, which will save the writing of long and difficult names.

VEGETABLE SEEDS AND SUNDRIES

Prices in Catalogue include postage, except where noted. Perishable goods will be sent soon as danger from frost is past. Write names plainly. Please order Roses, Plants, Vines, etc., before 1st of May, on special order sheet herein; they cannot usually be sent safely after that time.

FOR REMARKS.

Do not mix up the order with questions requiring answers, as it often causes trouble and sometimes mistakes or omissions. Please write in this space any remarks.

SPECIAL NOTICE.—We shall appreciate it as a special favor if our friends and customers will write in the blank below the names of some of their acquaintances who will be in need of Seeds.

To Our Friends and Customers Throughout the Dominion

happy and prosperous year.

We extend hearty greetings and good wishes for a

We have much pleasure in submitting our Catalogue for 1902, and thank you for your kind orders in the past, and solicit a continuance of the same. The steady increase of our business year after year warrants us in believing that this year, with its renewed prosperity, will be better even than any that has preceded it.

Our business is the largest of its kind in the Dominion, and one of the largest and best equipped in America. It is our earnest desire to supply only the best seeds that grow. We realize the responsibility of the task of catering to the requirements of such a vast constituency, and we have found that seed buyers stand by a firm that takes "Quality First" as its motto, and acts accordingly.

SUGGESTIONS TO BUYERS PLEASE READ

When to Order.—The planting season is short; the rush for seeds in the spring is very great; the mails are heavily taxed to carry the enormous quantities annually supplied by post. It is an advantage to place orders early, saves possible errors in the hurry and ensures readiness in having the seeds when the weather becomes suitable for planting. Often a few days delay in planting the garden in the spring through oversight in ordering early, causes disappointment; this may be avoided by ordering early. "Prompt action is the leading road to success."

weather becomes stitutione to planting. Often a tew days dealy in planting the garden in the spring through oversight in ordering early, causes disappointment; this may be avoided by ordering early. "Prompt action is the leading road to success."

Cash with Order.—The multitude of orders daily received during the rush of business from January to June makes it necessary that each order be accompanied with the cash. We send no goods C. O. D. (collect on delivery) nor do we give credit. We are an established business house, and guarantee safe arrival. Your money is safe to send with the order.

How to Send Money.—We assume the risk when sent by postal note or express order, which are the safest and cheapest ways, or for amounts of five dollars or less, by registered letter. Amounts under one dollar can be sent in postage stamps. Letters containing money, when sent without being registered, are at the risk of the sender. Use our addressed envelope, otherwise address The Steele, Briggos Seed Co., Toronto, Ont.

Low Express Rates.—We have arranged for a special rate for carriage with the express companies of Twenty Per cent. less than their regular merchandise tariff, on seeds and plants, such as are only sent at purchaser's expense for carriage, go by express, and while the cost may be a little greater than the ordinary freight rate, it will be much quicker and safer. When ordering please state if we shall ship be express or freight.

Sending Plants.—All orders for plants and bulbs which are liable to damage from frost will be held until about the end of April or first of May, when we begin shipping, and continue as fast as the weather will permit until all are sent out. Hardy plants and vince, which remain in the ground over winter, will be forwarded as soon as they can be lifted in the spring. Should the seeds be sent and not the plants and bulbs, do not be impatient, as they are held for your protections against loss, and will be forwarded when the weather will permit until all are sent out. Hardy plants not shou

We Guarantee Safe Arrival of all Seeds, Bulbs and Plants, in good condition when sent by mail. If a package fails to reach a customer, we will send again as soon as informed of the fact; or if any part is injured or lost we will replace it. We do not consider ourselves held by this guarantee unless complaints are made within ten days after receipt. Sometimes it happens that orders never reach us, and many orders, with cash, reach us without a post office address, and often without the name of the sender. When customers do not receive their Seeds, Bulbs, or Plants within a reasonable time after ordering, they should inform us, and at the same time send a copy of their order, stating the amount of money and in what manner sent.

Correction of Errors,—We take the utmost care in filling orders, always striving to please our customers. Keep a copy of the order, and "check off" the items when received, that you may know everything has been sent you. We seldom make errors, but when they happen we wish to be notified immediately, that corrections any be made. In case an error is made, we desire to be informed of the fact, and promise to make such corrections as will be perfectly satisfactory.

Conditions of Sale,—We trust that our customers will fully realize that it is to our interest to send them once but the very best quality of Seeds; but while we exercise the utmost care to have everything pure and reliable we give no warranty, expressed or implied, as to description, growth, purity, productiveness or any other matter connected with any seeds, bulbs, plants, shrubs, etc., we send out, and will not in any way be responsible for the crop. All seeds or other goods ordered from us, or which we send out, and will not in any way be responsible for the crop. All seeds or other goods ordered from us, or which we send out, are supplied only on these conditions. Vegetable Seeds by the peck or bushel, Farm Seeds, Tools, etc., are F.O.B. Toronto, purchaser to pay transportation charges, the production are supplied only on the

painter of the fruit and flowers, We own Thy wise design, Whereby these human hands of ours May share the work of Thine.

Apart from Thee we plant in vain The root and sow the seed. Thy early and Thy later rain, Thy sun and dew we need.

other varieties our customers will the cause. Correct names are ched.

Correspondence.—We are always glad to hear from our customers, answer enquiries and aid them in any way we can.

OUR WHOLESALE WAREHOUSES AND OFFICES

ers, answer enquiries and aid them. in any way we can.

OUR WHOLESALE WAREHOUSES AND OFFICES at corner of Front and Jarvis Streets, and Warehouse at 1514 Queen Street East contain nearly 5 acres of floor space, and are fitted up with the latest and most improved seed cleaning mills, printing presses and all necessary appliances for economical working of our vast business.

OUR RETAIL ESTABLISHMENT at Nos. 730 and 132 King St. East (opposite St. Lawrence Market), is the best equipped in the Dominion, and one that we feel justified in saying is in keeping with the times, and a credit to the "Queen City."

ORBENHOUSES AND TRIAL GROUNDS.—During the past season many visited our Greenhouses and Trial Grounds, and we were much gratified with the satisfaction expressed at the completeness and fine appearance of our greenhouses, grounds and trials. We again extend a cordial invitation to all to call and see for themselves the great care we take to maintain the highest possible standard of quality. Our greenhouses and grounds are situated at 1514 Queen St. East. King street cars stop at the entrance; only a fifteen minutes ride from the St. Lawrence Market. We test and grow both old and new varieties and keep a careful record of their growth. In our Catalogue we offer those varieties which we have found to be the best adapted for our Canadian climate, and we believe that our list contains an assortment that will fully meet the requirements of the many portions of the country.

R. C. STEELE, PRES. S. E. BRIGGS, VICE-PRES. G. H. HOGG, SEC'Y-TREAS. The Steele, Briggs Seed Co., Limited TORONTO, ONT.

SEE PAGE 105 FOR INDEX

are large and show, from 2½ to 3 inches across; the ray florets, being pure white on the upper surface, are embellished by a narrow yellow zone at their base; reverse of petals pale lilac. Under the influence of bright sunlight the flowers spread out almost flat, and the tifully to the light blue disk with its slightly projecting white stamens, a lovely combination of colors. Being of very easy culture, the plants produce their splendid flowers most abundantly and in constant succession from early summer to the autumn. (See cut.) Pkt., 15c.

NEW "ROSE CROWN" COMET ASTER

ROSE PINK WITH WHITE CENTRE

584 This striking novelty is of more than usual merit; the flowers are of the true Giant Comet type, 4 to 6 inches across, composed of long, wavy, twisted petals, gracefully formed into loose, yet densely double, flowers resembling some of the finer Japanese Chrysanthemuns. The centre crown of the flower is pure white, surrounded by outer rows of petals of a charming rose pink color, a unique and beautiful combination. The plants are of vizorous, healthy growth, about 15 inches high, each plant bearing from 20 to 30 of those magnificent flowers on long, stiff stems, which give them an added value as a cut flower for vases, florists' use, etc. If the plants can be grown where slightly shaded from the hottest sun, the coloring will be more vivid and the flowers will last longer. A diploma of honor was awarded this Aster by the French Society of Botany and Horticulture. (Seecut). Per pkt., 10c.

ARCTOTIS GRANDIS

585 Remarkably handsome new annual from Southwest Africa, growing luxuriantly in our climate and forming prof u selly branched bushes of about 2 to 2½ ti, in height and breadth. Leaves are soft and whitish on both surfaces. Its flower heads, borne on long stems and rising well above the foliage, are large and showy, from 2½ to 3 inches across;

NEW UPRIGHT BRANCHING ASTERS

586 In habit of growth this new Aster resembles the Truffaut Pæony-flowered type, but the plants grow from 10 to 12 inches taller. The flowers are large, very double, and of the true "Semple" type. The plants grow about 30 inches high, and produce from 2010 25 flowers, which are borne on stems from 20 to 24 inches long. Its upright habit admits of close planting and it will attain full growth when set only 15 or 16 in, apart. The growing of many plants in a small space is a decided advantage when room is scarce. We can furnish this in white and pink. Price, pkt., white, 10c.; pink, 10c.; mixed, 10c.

NEW ASTER "SINENSIS" THE TRUE ORIGINAL TYPE FROM CHINA

587 We especially recommend this variety, and when once it becomes known have no doubt but that it will be very largely grown for cut flowers. The plants form elegant branching bushes about 15 inches high, well furnished with rich dark green foliage, and producing an abundance of large, handsome flowers, 3 to 4 inches across, having a single row of delicate pale mauve ray florets, broad and symmetrical, and golden centre disc. It is indeed a plant of great beauty, quite distinct from any of the single Asters now in commerce, which in

comparison with it are coarse and weedy. As a first-class border plant we can strongly recommend it, and as a cut flower it will soon find its way to the market. Per pkt., 10c.

plant forming bushes 2½ feet high with rather long but moderately broad leaves. The foliage is very attractive, being beautifully striped, rose yellow, and olive green. Price per pkt., 10c.

CARNATION "GIANT NICE"

589 A grand selection of varieties bearing enormous flowers of the richest and most flowers of the richest and most varied ints, extraordinary results have been obtained asto size and thickness of flowers. This race is above all excellent for the cut flowers, because of itslong stalks and its floriferous qualities; another grand advantage is that it comes into flower six months after sowing, thus presenting the characteristics which ensured the success of the Carnation Margarita, It, however, has considercess of the Carnaton Marga-rita. It, however, has consider-able superiority over this lat-ter, because of the increased beauty and the larger size of its flowers. We do not hesitate to recommend it very highly. Pkt., 25c.

UPRIGHT BRANCHING ASTERS

CARNATION "GIANT NICE

SUNFLOWER, NEW DOUBLE, CHRYSANTHEMUM-FLOWERED

NEW____

CHRYSANTHEMUM - FLOWERED

SUNFLOWER

"ORANGE DAISY"

(Erigeron aurantiacus Hybridus)

590 Attractive new hybrids of one of the earliest summer-flowering perennials. While the type seldom bears more than one, at the most two flowers on one stem, our new hybrids produce stout, many-branched flower-stems about one foot in height with numerous large flowers, 1½ to 2 inches across, varying in all shades of colorings from white to rose and from yellow to light and deep orange, of dazzling effect. Although perennials these plants will give a good show and flower the first season from seed sown early. They are very showy garden plants, par ticularly when grown in masses, and thrive in partially shady situations. The plants are of very easy culture and attain a height in flower of about 18 ins. Pkt., 15c. 590 Attractive new hybrids of Pkt. 15c.

ERIGERON AURANTIACUS "ORANGE DAISY"

CINERARIA STELLATA

594 A large flowering Cineraria with twisted or quilled petals similar in shape to a true Single Cactus Dahlia. A favorite wherever grown. The plants make a most effective display either for greenhouse or house decoration. For table decoration it is admirable. When cut the sprays last a long time in water, and admit a most charming arrangement in vases with Maidenhair Fern or other ornamental foliage. Per pkt.,35c.

POPPY, DWARF SHIRLEY

595 Charming dwarf varieties of the universally esteemed Shirley Poppy, which is admittedly one of our best annuals. The seedlings grow into bushy little plants about 18 inches high only, with bright green laciniated foliage and all ablaze with innumerable fine flowers of ronage and all ablaze with innumerable fine nowers or rose, chamois, scarlet and salmon, some having a distinct light bordering to the petals, all with yellow stamens and all thrown well up above the foliage. In this dwarf form the Shirley Poppy will be used not only for groups but also for edgings and for pot culture. We warmly recommend this beautiful novelty. Pkt. 10c.

ESCHOLTZIA DOUGLASI

CALIFORNIA BUSH POPPY

596 We can confidently recommend this new California Poppy on account of its extraordinary early flowering, being in full bloom at least a fortnight earlier than the other kinds. The color of the flowers, which are from 1½ to 1½ inches across, is a pure golden yellow with a dark yellow centre. Foliage glaucous and finely divided. Pkt., 10c.

DWARF SHIRLEY POPPY

HELIANTHUS CUCUMERIFOLIUS **GRANDIFLORUS**

592 This new variety of the popular single-flowering Helianthus Cucumerifolius—the Miniature Sunflower—with semi-double and double flowers measuring three inches across, are of golden yellow color, flat, vaulted and bordered, with partly ruffled and partly smooth petals. They come over 60 per cent, true from seed, and yield excellent material for cutting. Price, per pkt., 10c.

HELIANTHUS "ORION."

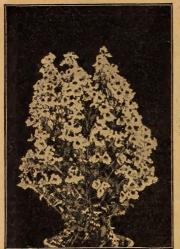

593 These improved profuse flowering Sunflowers are becoming exceedingly popular, not only for a showy display in the garden but for cut flowers. The plants form many branched pyramidal-shaped bushes bearing from summit to base a continuous succession of flowers 3 to 4 inches, borne on long graceful stems. The plant grows about 3 feet high, and is literally covered with beautiful yellow flowers, the petals of which are twisted and curled in a very charming manner. It will please the most fastidious. Per pkt., 10c.

ESCHOLTZIA DOUGLASI

HELIANTHUS CUCUMERIFOLIUS

SCHIZANTHUS WISETONENSIS

MIGNONETTE RED VICTORIA

598 One of the finest varieties ever introduced 598 One of the finest varieties ever introduced for garden use, the foliage is strong and luxuriant, the flowers are large and borne on compact stems; very fragrant. It is unsurpassed for border work, but not recommended for greenhouse culture. For cutting it is perfection, remaining from 8 to 10 days in water perfectly fresh. Per pkt., 10c.

NEW GIANT WHITE CENTAUREA

CENTAUREA AMERICANA ALBA

599 This native annual flower is also known as the Star Thistle. It is showy when in bloom and a fee and hardy plant. Although an annual it grows to a large size in the one season, and the immense heads of double, fluffy blooms ranging as below in flower hor. and the immense heads of double, fluffy blooms are quite as showy in flower borders as pæonies or hollyhocks. The color is almost pure white. The stems shoot up from 1 to 3 feet, sturdy and strong, branching near the ends and every branch bearing a bloom. It is an excellent plant for cut flowers, the flower lasting several days when cut and the stalks being long and wiry. Per pkt., 10c.

SWEET MALABAR VINE

SCHIZANTHUS WISETONENSIS

Award of Merit, R.H.S. First-class Certificate, Manchester, 1901. Highest possible Award, Ghent, 1901. Silver Medal, Paris,

Award, Green, 1997.

It is a long time since a plant has been introduced which has met with such unanimous approval as the charming Schizanthus (S. Wisetonensis) which we here illustrate. This plant, which can be had in order from Marshes August, produces its flow-March to August, produces its flow-ers in the utmost profusion in coners in the utmost profusion in con-tinuous and successive crops, each new growth (when the plant has once arrived at the flowering stage) pro-ducing a fresh mass of bloom. The coloring of the flowers varies con-siderably, from almost white with a yellow eye to a full rose with a bronzy-brown centre. The effect of the graceful fern-like foliage is very pleasing, and enhances considerably the natural beauty of the plant. For early flowering seed may be sown in boxes in February or March. Pkt 35c.

DIRECTIONS

DIRECTIONS
Sow in paus or pots in a cool, shady place, in February or March, in a gentle heat. Prick off when ready, and grow in a cool, light and airy situation, shading from the hot sun as the season advances. The most suitable compost is turfy loam with some well-rotted leafmould and manure, and a sprinkling of sand.

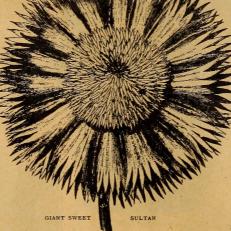

PANSY " MADAME PERRET"

PANSY, NEW CIANT "MADAME PERRET"

602 This novelty is distinguished from other Pansies by the plant being full and spreading, with very broad and extremely dark green leaves. The straight and stiff stems it possesses cause the flowers to stand out well from the foliage. The color of the blossom ranges through all shades of red, from pink to a fine deep purple, with an intermediate bright red edged with white. The face of the flower in some cases is regular in color, while in others it is lined and striped. The extraordinary size of the flowers, which reach as much as 3 to 3½ inches in diameter, make it a novelty of the first rank, and one that, is sure to be sought after by lovers of Pansies. Pkt., 25c.

PHLOX, GRAFF GERO

603 This is the most brilliantly effective type in cultivation. It will form a floral picture of such incomparable richness of coloring as to be fairly dazzling. They
are of such easy culture—amply repaying generous
treatment—succeeding in all sunny positions, beginning
to bloom in the early summer from spring-sown seed and
continuing in unexampled profusion until the close of
autumn; unfortunately they are very shy seeders—one
reason why they are such abundant and continuous
bloomers. Mixed colors, 10c.

New Giant Fragrant Centaurea-Imperial Sweet Sultan

(CENTAUREA IMPERIALIS)

(CENTAUREA IMPERIALIS)
600 This new Centaurea represents the best that has been produced in these beautiful summer-blooming plants. The bushes are about four feet high, and are covered with large, beautiful flowers of the form and fragrance of Centaurea Margaret. The flowers will keep for over a week in water, if cut just when they are about to open. It is of easiest culture. The color variation is very great, almost infinite. If a package is sown every two or three weeks until July a constant succession of bloom can be had throughout the whole summer and fall. Per pkt., white, 10c.; rose, 10c.; purple, 10c.

SWEET MALABAR VINE

601 This is a gem of many colors, exceedingly rare and beautiful, which should not be mistaken for the common vinca. The leaves are thick and fleshy, creamy white, edged with pink and blotched with grey and emerald green. Its tiny flowers of yellow and red are very graceful. With age it assumes a drooping habit, When cut keeps fresh for weeks; of easiest growth.

MIGNONETTE, RED VICTORIA

NEW EVER-BLOOMING TEA ROSE "LIBERTY"

What has been so long desired, viz,, an ever-blooming, hardy, Hybrid Tea Rose that possessed a strong and enduring rich crimson color, coupled with vigor of growth, robust constitution and free blooming qualities, has at last been obtained in "Liberty." It will be a boon alike to the grower who forces Roses under glass for cut flowers and the one who plants out-doors for summer flowers. The color is magnificent, rich fiery ruby with deep crimson tones in the depths of the flowers. The petals are covered with a rich velvety bloom. The fragrance is delightful, all-pervading and refreshing, the crowning glory which alone would suffice to give it a high place amongst fine Roses. Each, 25c.

NEW TEA ROSE "SUNRISE"

The most gorgeous Rose of its class yet introduced. This has made a sensation in England, and taken first honors wherever shown. In close bud form it shows the high, brilliant colors seen only in the "Austrian-Copper," scarlet and yellow. As it opens the color deepens, the scarlet turning darker red, the yellow to orange and copper, the inside of the petal golden yellow. The open rose is large, perfectly double, and of grand form. The foliage is glossy and thick, the new growths being the darkest and most beautiful found among roses. The form and color of bud, its freedom of growth and bloom, will give Sunrise a high place among forcing roses. Each, 25c.

MAMMOTH RAINBOW COLEUS

These Coleus are quite different from those commonly used in beds and borders, and, in fact, form an entirely new race. The plants reach a height of from 2 to 3 feet; the leaves often measure 10 inches in length and 8 inches in width, heart-shaped and handsomely crimped, toothed and frilled, their color combinations are remarkably rich, comprising all the reds, metallic greens and yellow, in shades from the most delicate to nearly black, and, indeed, pass description. Makes a splendid plant either for bedding or pot culture. Price, each, 15c.

TROPÆOLUM "PHŒBE"

A most attractive and deliciously-scented variety, producing flowers throughout the Winter season, of a deep golden yellow, with a rich crimson-feathered blotch in each segiment, outer edges notched or scalloped, the whole forming into an exquisitely-shaped blossom. A free vigorous grower. When in the height of its perfection, strings of growth 8 to 10 feet long can be cut for decoration. Each, 15c.

NEW BUDDLEIA VARIABILIS

(Pride of China)

(Pride of China)

A grandnew shrub sent to Paris from China by the Abbe Soulie and exhibited at the National Horticultural Society where it was greatly admired. It has been colored plated in all the prominent Horticultural journals, and spoken of as a valuable acquisition. It is a hardy shrub, growing 4 to 5 ft. high, its gracefully arching branches covered with a woolly bloom. Leaves bright green above, velvety white below, producing a highly contrasting effect. The very numerous branches are terminated by long racemes of rosy lilac flowers, with an orange spot in the centre. Exquisite rose or violet shades have been produced on seedlings. Perfectly bardy, and well worthy of a place in every garden. Price, pot plants, 25c.

LINUM TRIGYNUM

As an early winter flowering plant it is simply indispensable. Its brilliant orange flowers are produced so profusely as to completely cover the plant, making it look like a golden ball It is of easy outlivation, and a most desirable house plant.

RAINBOW COLEUS

New Japanese Kudzu Vine

If you wish a vine that will grow anywhere, in the best or poorest soil, then plant the Kudzu Vine. It will flourish where nothing else will grow, and will last for years. The bold large leaves are of the brightest green, and afford a dense shade. The clusters of purple Wistaria-like flowers, 6 to 7 inches long, are very fragrant, and its wonderfully quick growth makes it an invaluable plant for covering arbors, fences, porches, etc. Thomas Meehan, Philadelphia, says of it: "There is possibly nothing like it in the whole vegetable kingdom. It is extremely valuable for covering anything in one season, and interesting to the lover of the wonderful. It has grown on our grounds 50 feet in one season. Price, each, 30c.

RUELLIA MAKOYANA

(Carmine Blossoms)

A new Brazilian plant of easiest growth for the house as well as the garden, forming in a short time specimens measuring two to three feet across, with over three hundred flowers open at one time. Leaves velvery, dark olive green, with prominent silvery white midrib and veins; underpart purplish wine color and very ornamental. Flowers large, brilliant carmine, produced even on plants in 2-inch pots, and almost during the entire year. Grows vigorously in shady places and would probably make a fine Easter plant. We positively recommend it as one of our finest introductions of recent years, that is a schibited at the great floral display of Ghent in grand specimens, measuring nine feet around. Will grow far easier than a Geranium, but likes somewhat peaty soil or charcoal drainage. Price, each, 20c.

JAPANESE KUDZU VINE

BUDDLEIA VARIABILIS

"The plants I ordered from you arrived in first class condition and are all growing nicely. J. F. Wallace, Manor, Assa."

GLADIOLUS, NEW CANADIAN HYBRIDS

(See Back Page of Cover)

This magnificent mixture hybridized and grown for us by the eminent Hybridizer, Mr. Frayer, comprises all the colorings, shades and markings imaginable; they are hybridized from all the choicest and newest sorts, combined with the finer sorts of the old standard varieties, making the most gorgeous and dazzling combination of colors from the softest and most delicate shades of pink, white and yellow to the most dazzling scarlet known. They deserve to be in every arden, and of all the varieties we have ever sent out, this mixture is the best, They can be planted any time from the first of April to the end of May, and very seldom fail to flower the first season, they grow in almost any garden soil and commence to bloom in July, by successive plantings for two or three weeks they can be had in a succession of bloom from July until frost. Every lover of lowers should grow a few of them, they will please the most fastidious. Price, each, 10c.; per doz., \$1; 25 for \$1.75.

THE GIANT-FLOWERING BROWALLIA

Violet=Blue

PLUMA. One of the most perfect of the "Ostrich Plume" section. Very delicate pink, closely incurved, flower with prominent hairy flaments. Pronounced perfection in form by judges at three Chrysanthemum shows Each, 15c.

GOLD MINE. Unsurpassed in size; flowers II inches in diameter having been produced under favorable conditions. A rich golden yellow, outer petals reflexed and center recurving. Promises to displace many of the good older varieties. Each, 15c.

INTENSITY. A fine addition to the short list of good reds. A splendid bright crimson, of reflex form, disclosing only the bright upper surface. Simply perfection in form of flower, stem and foliage. Each,

LAVENDER QUEEN. A new and distinct coloring in Chrysanthemums; a soft lavender pink, Flower is large with outer petals reflexed and centre erect. A grand addition to the list of "Mums. Each,

NEW GIANT BROWALLIA

LEOPARD GERANIUM

with marcon; has grand novelty for use in baskets or vases. It is of vigorous habit and blooms almost continuously. Fine for cutting also, as the blooms are very lasting. A nice free grower. Ea., 25c.

JEAN d'ARC GERANIUM

The nearest approach to a pure white in the Ivy Leaf section of Geraniums. The flowers are of enormous size, borne on strong stems. The habit of the plant is excellent; it is very free flowering. One of the best in cultivation for hanging baskets. Price, each, 200

NEW CARNATIONS

PROSPERITY. Very heavy foliage and stiff, upright growth. It is not subject to any of the Carnation diseases. The flowers attain the monstrous size of 4 inches. Much freer bloomer than Mrs. Bradt and superior in all other points. It has the perfect calyx of Albertina, Entirely distinct in color, the ground being white, overlaid and mottled with pink, deepening toward the centre. Its keeping qualities are unequalled. It has brought the highest price yet paid for a Carnation. Winner of numerous certificates and medals. Each, 20c.

NORWAY. Color, purest white. Flowers 2½ inches to 3½ inches in diameter. A wonderfully vigorous, rapid grower of splendid habit, Responds readily to good culture. The stems are long, strong and graceful and can be cut 2 feet to 3½ feet long when well established. It is delightfully fragrant; an excellent keeper and shipper. Each, 20c.

GOV. ROOSEVELT. A seedling from the well known variety Gen. Macco, which it somewhat resembles in habit, but a far more vigorous grower and longer and much stiffer stem. In color, a deep, rich, brilliant scarlet, heavily shaded with maroon. In form, it is as near perfect as any Carnation yet produced. Very large, full flowers, with perfect calyx. near perfe Each, 20c.

MORNING GLORY. New of 1900. Color, slightly darker than Daybreak, but an improvement in every way. Large, perfect flowers on long, wiry stems. A very free, continuous bloomer, with no tendency to crop. This variety is crowding out Daybreak wherever grown. Each, 20c.

MRS. THOS. W. LAWSON. New of 1900. The largest pink Carnation at the present day. Color, clear cerise. Extra long, stiff stem and perfect calyx. A strong and vigorous grower. Each, 200.

GOLDEN BEAUTY. Cross of Gold Nugget upon Lily Dean. Large flower, fully as large as Lily Dean. Clear lemon yellow, slightly tinged with pink at the edges of the petal. Stem strong and very stiff. Produces fine three-inch blossoms well filled, and with high centres upon long stems. Habit very similar to Gold Nugget, but a stronger, more vigorous growth, and thus far has shown perfect health. Gives a splendid crop of flowers during the month of December, and another very fine crop in the spring. Well worthy of a thorough trial. Stock limited. Each, 20c.

CHRYSANTHEMUM "PLUMA"

NEW JAPANESE BALL FERN

JAPANESE FERN BALL

For the Window, Drawing Room, or suspended from Chandelier; over Dining Table, or used in Fern Dishes. Unique, Beautiful, Perpetual, Cheap.

WHAT IS PRETTIER IN WINTER THAN A BALL OF DELICATE EMERALD GREEN FERNS.

This little beauty is an importation from Japan, and is certainly the finest addition to the Fernery yet introduced. The Ball is composed of the Japanese Inland Fern Roots, known as Davallia Bullata, var. Nagaha, and Sphagnum Moss, and so constructed as to send out leaves of beautiful emerald green from every point. All who see it are delighted, and want it, and up to the present time the supply has not been equal to the demand.

Directions for Starting.—Place ball in water for fitteen minutes and then suspend in any desired position; repeat every two days until growth is started, after which sprinkle occasionally as required. To use in fern dish, cut ball in halves, placing flat side down, thus getting two dishes

occasionally as required. getting two dishes of beautiful ferns The Fern Ball may be allowed to dry up at any time and be set away, and started again by watering same as before. Price, as before. Price, in dormant state, 8 ins. in diameter, 60c. post-paid

NEW CHRISTMAS CORAL PLANT

RUELLIA LONGIFLORUM

"New Christmas Coral Plant." A splendid red flowering plant, especially for conservatory decoration. It is a most useful plant during the dull winter months, small-sized plants being covered with bright red flowers. The ease with which flowering plants may be had by the end of the year is remarkable. Three of the plants, when established, may be put in a 6-inch pot, and by keeping them in a growing temperature they may be had in full flower two months after the cuttings are taken. It is not only useful as a winter-blooming plant, it comes in well for planting out in spring, blooming satisfactorily during the summer. Price, 15c. each.

SILVER - SWEET VINE

(Actinidia polygama) TRUE

A new, hardy climber of remarkable beauty from Japan. The foliage on ends of the flowering shoots is of a silvery white color, giving the whole vine from a little distance the appearance of being covered with large white flowers blooming among its bright green leaves. The effect is very marked and beautiful. The flowers, which appear in this latitude about the end of June, lasting from two to three weeks, are creamy white in color, with numerous stamens with brighty yellow anthers, and resemble the lily-of-the-valley in fragrance. Strong 2-year-old plants, each

THE NEW DWARF CANNA, DAVID HARUM

Height 3½ feet. The best of all the dark bronze Cannas. Robust grower, and one of the freest blooming Cannas we have ever seen. We have counted on one plant seven flower stalks, containing twenty-seven flower spikes in flower at one time. Flowers are of large size, with well-rounded pertals. Color is a bright vermillion-scarlet, dotted with crimson spots. Each, 25c.; 5 for \$1.

THE BEAUTIFUL NEW CANNA, VICTORY

Five feet. Extra strong, robust grower, throwing up immense flower stalks, each stalk having from 7 to 9 flower spikes. The flowers are of the largest size, petals measuring 2 inches, and suggest a possible crossing of the Orchid flowers with the Crozy sorts. In a possible crossing of the Orland nowers with the Croy sorts. In color a bright orange-scarlet, with fine crimson veins running length-wise of the petal, and bordered with an irregular band of yellow. Its extra large, thick, rubber-like leaves are as large as a banana leaf. For effective display, both of flower and foliage, we know of no Canna to equal it. Each, 25c.

NEW CANNA, BLACK BEAUTY

Four to five feet. This is the variety which created such a sensation at the Pan-American last year. The flowers are insignificant, but its foliage is superb, being of a deep, bronze wine-red, almost black. And when foliage effect alone is wanted, or when planted to contrast with the large-flowered, green leaved varieties, the effect is grand. Each, 20c.; 3 for 50c.

AMERICAN COFFEE BERRY

Coffee (and a very good Coffee) for 1 cent a pound.

Coffee (and a very good Coffee) for 1 cent a pound.

While nothing quite takes the place of good old Java or Mocha Coffee, the Coffee Berry, when used alone, makes a healthful, pleasant and economical beverage, with a strong coffee flavor, and quality superior, in our estimation, to many coffee substitutes now on the market. When blended and ground with good coffee, half and half, its presence can scarcely be detected. It is prepared just like coffee. The beans, which are about the size of the real coffee berry, are roasted, ground, and used either alone or mixed with coffee, as may be preferred. The plant, which takes from 4 to 4 % months to mature, is about 3 feet in height. It fruits from the ground up, and on the limbs in every direction. The pods, of which there are from 150 to 250 on a plant, touch each other, so closely together do they grow. The pods contain on an average from two to three beans.

CULTURE.—The rows should be planted three feet apart, one berry every ten inches apart in the row. Cultivated like corn or beans, and should be planted about the same time. Large pkt., 10c.

"Received plants in first-class condition. They are now planted and making good progress. Many thanks for your carefully put-up parcels." W. E. G., Bridgewater, N.S.

ROCKY FORD MUSK MELON

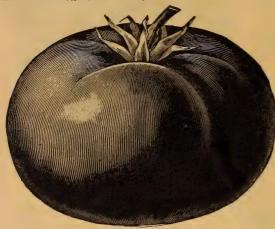

ALWAYS BRINGS THE HIGHEST PRICE ON THE MARKET

An improved strain of the Netted Gem type, which is grown on a large scale and to a wonderful degree of perfection at Rocky Ford, Colorado, From that locality it has been shipped to every section of the country and has attained national fame for dainty appearance, excellent quality and delicacy of flavor. The flesh is a light green color, very deep, exceedingly sweet, fine grained, combining every quality which goes into the make up of a good Melon. Its size, shape and fine quality, and being a good shipper, will commend it alike to the family table and the market gardener. Per ½ lb., 30c.; oz., 15c.; pkt., 5c.

NEW EXTRA EARLY TOMATO

DOMINION DAY

We do not hesitate to pronounce this one of the earliest and best large bright smooth Tomatoes on the market. The vine is of medium size with few leaves, bearing its fruit low down on the stem in clusters which ripen well together. On some soils it ripens before Atlantic Prize and Early Ruby. Those whose trade demands a large smooth early variety, will find this just the sort they want. It has been extensively grown in the vicinity of Hamilton, where it has given splendid satisfaction. Price, ½ lb., 90c.; oz., 35c., pkt., 10c.

NEW EARLY TOMATO "DOMINION DAY"

Rocky Ford Muskmelon

Early Spring Cabbage

Early as Wakefield and more productive. A very superior variety of extra early cabbage which may rival the well-known standard sort Wakefield, and supersede it. The heads are very uniform, round in shape, slightly flattened, solid, even before they have attained their mature size. The cabbages have but few outside leaves and these grow so close to the head that they may be planted quite close together. Gardeners and others who grow for early market will find this to be a "ready seller." Round cabbages always receive the preference when offered in competition with pointed heads, and demand a much better price. ½ lb., \$1; oz., 35c.; pkt., \$c.

Cabbage Steele, Briggs' Winningstadt

The Largest Heading Early Cabbage Grown

(See Illustration Front Page of Cover)

This we consider one of the most valuable additions to the early sections of Cabbages, it is much similar to the old standard sort, but a great improvement on it, being equally as early and very much larger. The outside leaves are small, allowing it to be closely planted, the heads are pointed in shape, a little more so in fact than the ordinary strain. It is an exceptionally fine sort for early and second early crop, and will, when it is known, be very extensively grown by market gardeners and truckers, while its fine quality will make it a fine early sort for private use. Pkt., 15c. CUCUMBER, NEW TORONTO PICKLING

The Crookneck class of Squashes surpasses in quality all of the other summer varieties. This variety is much similar to the old Summer Crookneck, but is much larger and considered to be of a more buttery flavor than the ordinary sort, they are fully twice the size, and produce fruits of a deeper yellow color, exceedingly early and very productive. Per lb., 70s.; 1b., 20c.; oz., 10c.; pkt., 5c.

NEW "SPANISH KING" ONION

EXCELS IN YIELD, SIZE AND KEEPING QUALITIES

For mildness of flavor and keeping qualities it is unequalled. This exceedingly handsome new variety is a great acquisition to the onion family, and is without doubt one of the finest varieties we ever sent out. It is somewhat similar to the Giant Prizetaker in form, but of a darker yellow color, is harder and keeps better. Medium early in maturing and of a nice mild flavor. Its immense size will recommend it to all, particularly when it is known that its keeping qualities excel some of the other leading sorts. It was exceptionally fine on our Trial Grounds the past two seasons. All who saw it proclaimed it to be the grandest variety they had seen. Per lb., \$3.50; \(\frac{1}{2} \) lb., \$1; oz., \$30c.; pkt., 10c.

NEW EXTRA EARLY WRINKLED PEA "PROSPERITY OR GRADUS"

The Great Extra Early Wrinkled Pea. This remarkable pea has produced a sensation in the horticultural world and is now recognized as a leader. It is not only large and of the best quality, but it is nearly or quite as early as the small, round, extra early sorts. It is sold under two names, but the two strains are identical. It is hardy and may be planted as soon as the eround is fit to work in the spring, along with the smooth peas. Gradus is a wrinkled pea, with vine growing about 30 in. high. It requires no sticks or brush, though sticks may be used if preferred. The pods are of a bright green color, and measure 4 in. or more in length; being as large as Telephone and equally well filled with luscious peas—8 to 10 or more in a pod. The peas are of first-class table quality and retain their color and attractive appearance after cooking. It is a grand pea in all respects and is now more widely and favorably known than any other new variety on the market. Price, 15 lbs., \$2.50; lb., 30c.; pkt., 10c.

NEW "SPANISH KING" ONION

CIVEN FREE. Customers may select the following values in extras seeds when ordering Flower and Vegetable Seeds at packet and ounce prices and remitting the following amounts:

PLEASE READ THIS It must be understood that these EXTRAS are only allowed on seeds at packet and ounce prices, and not en collections, special offers, bulbs, plants or seeds at 1-4 or pound prices, nor can we send the value of extras in other than seeds at packet and ounce rates.

CUSTOMERS SENDING

\$1.00 May Select \$0.25 2.00 Extra .50 3.00 Seeds .75 4.00 to the .00 5.00 value of .25

We make it our constant aim to supply seeds of the Highest Standard of Excellence a first consideration, and next, to make prices as low as such quality of seeds can be sold. Every variety is tested at our own grounds each year, and by careful comparison with stocks obtained from other sources, we know that better seeds than we sell cannot be procured from any source. By these comparative trials we learn the merits and demerits of every known vegetable, and by leaving from our list varieties of doubtful merit we save our customers disappointment and loss. Our list will be found to contain the most reliable varieties in cultivation, and such as we supply to the most critical market gardener and experienced planter, who must have the best.

SEEDS PREPAID BY MAIL Please bear in mind that prices in the following list include prepayment or postage by us to any post office in Canada for all seeds offered by the ounce, two ounce, quarter pound and pound, unless otherwise noted. We also guarantee safe arrival of any seeds, plants, bulbs, etc., when sent by mail; thus you have only to send us Catalogue prices when ordering, except where noted, and be assured that we shall do the rest.

MARKET GARDENERS who require quantities of seed are invited to write for our Special Gardener's List. This list will only be sent to those who grow for market, and require to purchase seeds in quantity. In writing please state whether a Market Gardener or Florist. GUS Fr., Asperge; Ger., Spargel. Sow 1 oz. for 60 ft. of drill. Sow in March or April, in rows 1 foot apart. by years old transplant into permanent beds, which should be well and deeply manured, and trenched to the depth of 2 feet, Set the plants (in rows) from 3 to 4 ft. apart, and 2 ft. in the rows, spreading out the roots, and covering from 6 to 8 in. Asparagus, Columbian Mammoth White. A choice variety, producing white stalks of large size and finest quality. Per lb., 60c.; \$\frac{1}{2}\llow{1}\times, 20c.; oz., 10c.; pkt., 5c.

Palmetto. Early, even and regular in its growth. Per lb., 55c.; \$\frac{1}{2}\llow{1}\times, 20c.; oz., 10c.; pkt., 5c.

Standard variety, Shoots are of the largest size, very productive. Lb., 50c.; \$\frac{1}{4}\llow{1}\times, 20c.; oz., 10c.; pkt., 5c.

ARTICHOKE (JERUSALEM) (Grown exclusively for its tubers, which somewhat resemble potatoes, and are cultivated in a similar manner, only that the rows should be at least four feet apart when grown in strong soils. It is enormously productive, producing 1,500 bothels peracre. It is used mostly in feeding sheep and hogs.

Artichoke, Jerusalem. Strong tubers, 15c. per lb., four lbs., 50c., post-paid; per peck, 50c., by express at purchaser's expense.

ASPARAGUS ROOTS (Postpaid)

ARTICHOKE (GLOBE) FR. Artichaut; GER., Artischoke. ARTICHOKE (GLOBE) FR. Artichaut; GER., Artischoke.

Sow in April in rich soil, and transplant the following spring to permanent beds
(in rows and hills), three ft. apart, and two feet between the plants. They only give a
partial crop the first season, but the beds will remain in bearing for years. Protect in
winter by a covering of leaves or coarse manure.

Artichoke, Large Globe. Grown for the unripe flower heads, which are highly
esteemed by epicures. Peroz., 40c. pkt. 5c.

BRUSSELS SPROUTS FR., Chou de Bruxelles ; GER., Kopfkohl Grener. This is one of the best vegetables for winter use, producing from the axils of the leaves an abundance of sprouts resembling small cabbages, of excellent mild flavor. By sowing in April or May, planting out in July, may be had in fine condition until December, Brussels Sprouts, Dalkeith. Produces compact sprouts or heads of excellent quality. Fer 4 lb. 60c., oz., 20c.; pkt. 5c.

quality. Per \$10. 60c.; oz., 20c.; pet. 5c.

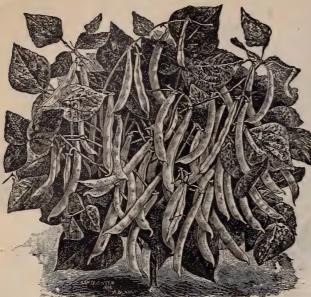

BROCOLI Fr., Brocoli; Ger., Spargel Kohl.

Sow end of April in the open ground, then transplant about 2 ft. apart in deep, rich ground. When they flower, break the large leaves over the heads to protect from the sun.

Brocoli, Walcheren White. Large, firm, white heads, very hardy, endure cold and withstand heat and drought well. Per \$1b., \$1.50; 1 oz., 50c.; pkt. 5c.

BORECOLE OR KALE FR., Chou Vert.; GER., Blatter Kohl; Sow from the middle of April to May, in prepared beds, covering seed thinly and BRUSSELS SPROUTS evenly; transplant in June; treat same as cabbage. The varieties are all hardy, and best when touched with frost.

Borecole, Green Curled Scotch, Dwarf. Grows to a height of 80 ro 20 inches, and with good cultivation spreads to three feet in diameter; leaves bright green and beautifully curled. Per 1 lb., 40c.; roz., 15c.; pkt. 50

GIANT DWARF RED SEEDED WAX BEAN

WAX PODDED VARIETIES

Beans, Black Seeded Wax. A popular variety; pods a waxy yellow; solid, tender, almost transparent; stringless; seeds when ripe jet black. Peck, \$1.60; 5]bs., 60c.; bl. 15c.; pkt., 5c.

Golden Wax. One of the best dwarf beans known; very early; pods long, bittle, stringless, of a beautiful, rich, golden wax color. Peck, \$1.60; 5 lbs., 60c.; bl. 15c.; pkr. 5c.

Scarlet Flageolet Wax. One of the best either for family or market. It is as early as the Golden Wax; the pods are nearly always free from rust. The pods are very long, broad, flat, yellow, entirely stringless; quality excellent; very productive. Peck, \$1.80; 5 lbs., 80c; 1 lb., 15c.; pkt, 5c.

-White Seeded Wax. Excellent snap bean, fine for shelling; seed pure white. Peck, \$1.80; 5 lb., 75c.; lb., 18c.; pkt., 5c.

-Keeney's Rustless Golden Wax. A strong-growing bush variety, The pods are meaty and well filled, thick, flat when young and semi-round later; of rich yellow color and fine quality, and entirely stringless, even when large enough to shell. Peck, \$1.60; 5 lbs., 60c.; lb. 15c.; pkt., 5c.

Mammoth Wax. The monster pods of this variety average ten to fourteen inches in length, are nearly all solid pulp and absolutely stringless, cooking tender and delicious; rich golden yellow; a vigorous grower, covering the ground with its heavy foliage. A desirable variety. Lb., 20c.; pkt., 5c.

One Pound will plant 75 hills. If wanted by mail, add 5c. per lb. for postage.

The planting of the various sorts of pole-beans should be delayed a week or more after the first planting of the early dwarf sorts. The Limas being very tender, will do better if not planted in the open ground before June 1st, Plantin hills about 3 ft. apart, and 1 to 2 ins. deep, using 5 to 6 seeds to each hill, and set a pole firmly in the centre. Manure liberally in the hill with well composted fertilizer. Thin the plants, leaving three to each hill.

Weans, Cuban Asparagus. (or Yard Long). Pods from 20 to 36 inches long; very tender and delicious as a Snap Bean. Per lb. 50c; pkt., 5c.
Lazy Wife's. Lare, pale green pods; very thick meated; stringless; rich, tender and buttery; ripens early; clings well to the pole. Per lb., 20c.; pkt., 5c.

Putch Case Knife. Very productive. One of the earliest. Per lb., 20c.; pkt. 5c.

Indian Chief, or Tall Black Wax. Yellow pods, very tender and sweet; thick and fleshy. Lb. 20c.; pkt., 5c. Kentucky Wonder. A splendid, vigorous and productive variety. Pods in clusters, succelent and delicious; matures in seventy days from germination, bearing until frost. Per lb., 20c.; pkt., 5c.

Large White Lima. A large, late variety, with long, broad, very thin, dark green pods; although late, it is esteemed as one of the very best. Per lb., 20c.; pkt., 5c.

esteemed as one of the very best. Per lb., 20c.; pkt., 5c.

*London Horticultural, or Cranberry. An old favorite for both snap-shorts and dry beans. Lb., 18c.; pkt. 5c.

Red Speckled, or Cut Short. An excellent bean, very productive, and bound to prove satisfactory. Per lb.,

18c.; rkt., 5c. Scarlet Runners. This variety grows from 10 to to 12 feet high; foliage green and flowers brilliant scarlet; fine for covering arbors, at the same time yielding a supply of wholesome and nutritious food. Per lb., 20c.; pkt. 5c.

White Dutch Runner. Similar to the preceding, excepting seeds and flowers, which are white. Per lb. 20c.; Painted Lady. Grows from 12 to 14 feet high, with fine green foliage, and covered with red and white flowers, the vine making a splendid climber for trellis, etc. The pods are borne in clusters, and are of extremely fine flavor. Per lb, 20c.; pkt. 5c.

EANS DWARF OR BUSH
FR., Haricot nain. Ger., Busch Bohnen

One Quart will plant 100 feet of drill. Or will plant one acre. One and one-half bushels

Dwarf Beans, as a rule, are more hardy and earlier than the running sorts. They are usually planted in drills, and stand well without support. The rows should be 2 to 3 feet apart, according to the character of the soil, and the covering about 2 inches. Beans will thrive upon light soils, although more profitably grown under cultivation upon stronger land, where the rows should be kept well apart. Being quite tender, they should not be planted till danger from frost is over; and a dry warm soil is needed to ensure germination. The vines should not be disturbed when moist, or the pods will become rusty. nation. The become rusty.

If you want Beans by mail add 5c. per pound for postage.

GREEN PODDED VARIETIES

Beans, Early China. Very early and of fine quality; seeds white, spotted purplish red. Peck, \$1.40; 5 lbs., 50c.; lb., 15c.; pkt. 5c.

Early Mohawk. First early; none better for first planning; productive, very hardy, almost rust proof; can be used when half grown. Peck, \$1.40; 5 lbs. 50c.; lb., 15c.; pkt. 5c.

Extra Early Round Pod Valentine. At least ten days earlier than the Early Valentine, and usually ready to pick in thirty-five days after planting. Pods, round, thick and fleshy, of finest quality and unequalled in uniformity of ripening. Peck, \$1.50; 5 lbs., 50c.; lb., 15c.; pkt. 5c.

Improved Large Refugee. Both pods and seeds are larger than the old Refugee variety, and a better yielder. Peck, \$1.40; 5 lbs., 50c.; z lb. 15c.; pkt. 5c.

Early Long Six Weeks. One of the earliest; flat pods; good quality, Peck, \$1.40; 5 lbs., 50c.; lb., 15c.; pkt., 5c.

Royal Dwarf Kidney. One of the best late kinds for winter use; has no superior. Beans white. Peck, \$1.40; 5 lb., 50c.; pkt. 5c.

GOLDEN WAX BEANS

BURPEE'S BUSH LIMA BEANS

The bushes grow is to 20 inches high, of stout growth and always erect, yet branching so vigorously that each plant develops into a magnificent circular bush from 2 to 3 feetin diameter. The thickness of the main stock and branches of the plant as also the unusual size, healthy green color and the ck, leathery substance of the leaves, indicate the strong constitution of this variety, and it is also a sure cropper. It is an immense yielder, each bush bearing many handsome pods, well filled with very large beans, which are identical in size and luscious flavor to the well-known large pole Limas. Price, lb., 25c., pkt. 5c.

ENGLISH OR BROAD

Seans, Broad Windsor. This class is very hardy, and should be planted as soon as the soil is in good state in the spring. Plant 4 inches apart in row, and 2 inches deep, in drills 4 feet apart. To ensure well-filled pods, pinch off the tops as soon as the pods begin to set. Per lb., 20c.; pkt. 5c.

BEETS FOR THE TABLE

FR., Betterave Potagere. GER., Runkel Rube.

One ounce will sow 50 feet of drill; 5 to 6 lbs. to an acre.

Sow as early in spring as ground can be worked, in light, well manured soil, in drills 12 in. apart, covering the seeds one inch deep and pressing the soll firmly over them. Thin out 4 in. apart for table beets; cultivate often.

Lentz Turnip. Top small; dark red and white; early and profitable; fine even shape. Per lb., 60c.; ½ lb. 25c.; oz., 10c.; pkt., 5c.

Early Blood Turnip. A standard summer or winter variety. Rich deep blood red. Per lb., 50c.; ½ lb., 20c.; oz., 10c.; pkt., 5c.

Early Eclipse. Very early; globe shaped; fiesh dark, tender and of desirable quality. Per lb., 50c.; ½ lb., 20c.; oz., 10c.; pkt. 5c.

Early Flat Bassano. Flesh white, circled with pink. Very sweet, of delicate flavor, early. Per lb., 50c.; ½ lb., 20c.; oz., 10c.; pkt. 5c.

Long Smooth, Deep Blood Red, (No. 5). An excellent late variety. Great improvement on Common Long Blood. Per lb., 50c.; ½ lb., 20c.; oz., 10c.; pkt. 5c.

Non Plus Ultra, (No. 4). Half Long, dark red, one of the finest varieties in cultivation, especially adapted to market gardeners' use. Per lb., 60c.; ½ lb., 25c.; oz., 10c.; pkt. 5c.

firmly over them. Thin out 4 in. apart for table beets; cultivate often.

Beets, Briggs' New Extra Early has slender stems, small dark crimson with very faint rings. The flesh is crisp and sweet and entired free from earthy flavor. It proved itself to be fully as early as the Crosby, regular in character and free from coarse roots. It is flattish round in shape, like an orange, and has a firm tap root. Per lb., 80c.; ‡ lb., 25c.; cz., 10c.; pkt., 5c.

— Crimson Globe (New) No. 2. The best of the early round deep crimson orange, and has a firm tap root. Per lb., 80c.; ‡ lb., 25c.; cz., 10c.; pkt., 5c.

— Crimson Globe (New) No. 2. The best of the early round deep crimson orange, and has a firm tap root. Per lb., 80c.; ‡ lb., 25c.; cz., 10c.; pkt., 5c.

— Dewing's Blood Turnip. An improved variety, of deep blood red color. Fine in form and flavor; an excellent market sort. Per lb., 60c.; ‡ lb., 25c.; cz., 10c.; pkt., 5c.

— Dewing's Blood Turnip. This beet, of American origin, is the most uniform of all Turnip Beets. The root is always smooth, round and han excellent keeper. Per lb., 60c.; ‡ lb., 25c.; cz., 10c.; pkt., 5c.

Round, medium size, early; deep dark red, tender and sweet. Black Prince. Round, medium size, early; deep dark red, tender and sweet Per lb., 80c.; ½ lb., 30c.; oz., 10c.; pkt. 5c. Dewar's Half Long, (No. 1). Red flesh-pink zones, sweet and tender; roots smooth; fine even shape. Per lb., 60c.; ½ lb., 25c.; oz., 10c.; pkt. 5c.

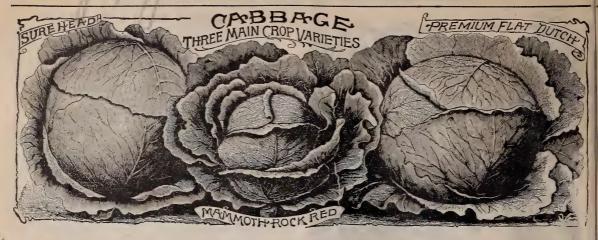

Crosby's Improved Egyptian. A very early and carefully selected strain of the original Egyptian; roots somewhat thicker. per lb., 75c.; ½ lb., 25c.;

Olive Shaped. A superior half-long variety, very smooth; flesh deep blood red. Per lb., 75c.; ½ lb, 25c.; oz., 10c.; pkt., 5c.

the original 10c.; pkt. 5c.

Extra Early Egyptian Turnip, (No. 3). One of the earliest, of good quality and medium size, a fine forcing variety, small top. Per lb., 60c.; \(\frac{1}{2}\) lb., 25c.; oz., 10c.; pkt. 5c. ✓ Spinach Beet, or Swiss Chard. (White Curled). A variety of beet with beautiful tender leaves, which are used for "Spinach," and the mid-ribs as Asparagus, making a delicious summer vegetable. Per ¼ lb., 25c.; oz., 10c.; pkt. 5c. Ornamental Leaved. See page 39. CHICORY FR., Chicoree ; GER., Cigorien. Sow Chicory seed in spring in drills \(\frac{1}{2} \) an inch deep, and in good mellow soil; the after culture is the same as for Carrots. In the autumn the plants will be ready for blanching, when it is used as a salad. The principal nse of Chicory, however, is as a substitute for cofee. The roots are cut and dried, and then roasted for adulteration with coffee. An ounce of seed will sow about 100 feet of drill, and from two to three pounds an acre.

Chicory, Large Madgaburg or Coffae. 1 b. 500. Chicory, Large Madgeburg or Coffee. Lb., 60c.; † lb., 25c.; oz., 10c.; pkt. 5c.

Fr., Chou pomme; Ger., Kopf Kohl. For early use sow in a hot-bed in February or March. For late crop sow in a nursery bed, May or June, and transplant as soon as the plants are 5 or 6 inches high. A mixture of salt and ashes applied to the hill when transplanting is excellent for promoting growth, and keeping down the maggot. There is no vegetable in which the character of the seed is of more importance than this. Good seed, deep rich These are the cardinal points in rasting a good crop of cabbage. One ounce of seed will raise about 2,000 plants.

Cabbage. Express Extra Early. The earliest of all. Medium size with few Jeaves; can be planted very close. Per lb., \$2.50; ½ lb., 75c.; oz., 25c.; pkt., 5c.

Extra Early Early Brampes. A very early sort producing medium sized heads, very sharply pointed. Per lb., \$2.50; ½ lb., 50c.; oz., 20c.; pkt., 5c.

Barly Paris Market. A very early variety producing heads of medium size, and pointed. A desirable sort. Per lb., \$2.00; ½ lb.; 60c.; oz., 20c.; pkt., 5c.

Barly French Ox-Heart. Heart-shaped. It grows low on the stump and heads freely. Per lb., \$1.75; ½ lb., 50c.; oz., 20c.; pkt., 5c.

Barly Winningstadt., One of the earliest and hardiest heading of the extra early corp. Our stock is grown and selected with the greatest and pointed. A desirable sort. Per lb., \$2.00; ½ lb., 60c.; oz., 20c.; pkt., 5c.

Barly Winningstadt., One of the most popular early varieties. Heads small roundish ovoid; firm and tender. Per lb., \$1.75; ½ lb., 50c.; oz., 20c.; pkt., 5c.

Early Sugar Loaf. A conical-shaped head; a favorite with many. Per lb., \$1.75; ½ lb., 50c.; oz., 20c.; pkt., 5c.

SECOND EARLY VARIETIES.

Early Summer. (Select American Grown seed.) A very early, large, flat heading variety; two weeks later than the Wakefield; of solid, handsome and compact growth. A favorite with gardeners and valuable for family use. Wakefield; of solid, handsome and compact growth. A favorite with gardeners and valuable for tamily use. Per lb. \$2; ½, lb. 5(b.; oz., 20.; pkt., 5c.

All-Head Early. One of the earliest of large cabbage, being at least a week earlier than Early Summer, fully one-third larger, and sure to produce uniform, solid heads. Per lb., \$2.75; ½, lb., 75c.; oz., 25c.; pkt., 5c.

Fottler's Improved Brunswick. A second early variety of superior quality, of large, uniform size and a sure header. Per lb., \$1.75; ½, lb., 50c., oz., 20c.; pkt., 5c.

All Seasons. An early Drumhead Cabbage, yielding heads of good size. Very desirable, either for sxtreme early spring or fall use. Per lb., \$2.00; ½, lb., 50c.; oz., 20c.; pkt., 5c.

Vandergaw. A quick growing flat Dutch variety, suitable for fall and winter use, like the All-Seasons, which it closely resembles. Per lb., \$2.00; ½, lb., 60c.; oz., 20c.; pkt., 5c.

Succession. Follows ten days after Early Summer, forming more solid heads, while it can be planted nearly as closely. Per lb., \$2.75; ½ lb., 75c; oz., 25c.; pkt., 5c.

LATE VARIETIES.

Autumn King. One of the finest winter cabbages. Per lb., \$2; ½ lb., 60c.; oz., 20c.; pkt., 5c.

TSurchead. Produces large, round, flattened heads, of the flat Dutch type, and is remarkable for its certainty to head. Per lb., \$2.50; ½ lb., 75c.; oz., 25c.; pkt., 5c.

Premium, or Late Flat Dutch. A very fine standard variety. Per lb., \$1.50; ½ lb., 40c.; oz., 15c.; pkt., 5c.

Danish Ball Head. The heads are hard, round, of good marketable size, fine grained and good keeper, making it very popular for winter market. Per lb., \$2.50; ½ lb., 75c.; oz., 25c.; pkt., 5c.

Marblehead Mammoth. Late; the largest cabbage grown; solid, excellent keeper. Per lb., \$1.75; ½ lb., 50c;

RED CABBAGE.

-Mammoth Rock Red. A large growing and selected strain of late red cabbage. The heads will average 12 lbs. each. Per lb., \$2; \(\frac{1}{2}\) lb., \(\frac{1}{2}\) (c; \(\sigma x., 20c.; \) pkt., \(\frac{5}{2}.\)
-Dark Red Barly Dutch. Forms very hard round heads, of a deep red or purple color. Per lb., \\$1.75; \(\frac{1}{2}\) lb., \(\frac{5}{2}c.; \) pkt., \(\frac{5}{2}c.; \)
-Red Drumhead. Heads large, nearly round, very hardy, and of exceedingly deep red color. Per lb., \\$1.75; \(\frac{1}{2}\) lb., \\$0c.; \(\sigma z., 20c.; \) pkt., \(\frac{5}{2}c.; \)

SAVOY CABBAGES.

Steele, Briggs' Chester Savoy Considered the finest Savoy in cultivation; heads solid, large, uniform, deeply savoyed and curled. Per lb. \$2; ½ lb. \$0c.; oz. 20c.; pkt. 5c.

Per Pavorite. The earliest Savoy variety; distinct and good; heads small but firm. Per lb., \$175;

½ lb., 50c.; oz., 20c.; pkt., 5c.

Victoria. A medium sized Savoy, most beautifully netted, and of excellent quality. Per lb., \$1.75;

½ lb., 50c.; oz., 20c.; pkt., 5c.

Early Ulm. Round, deep green heads; early. Per lb., \$1.75; ½ lb., 50c.; oz., 20c.; pkt., 5c.

Drumhead Vertus. The largest of the Savoys; dark green leaves; fine keeper, Per lb., \$1.75; ½ lb., 50c.; oz., 20c.; pkt., 5c.

Globe Curled. Of delicate flavor; medium size; very solid, heads nearly round. Per lb; \$1.75; ½ lb., 50c.; oz., 20c.; pkt., 5c.

Improved American. Finely curled, solid round heads; fine flavor; very sure header. Per lb., \$1.75; ½ lb., 50c.; oz., 20c.; pkt., 5c.

CHESTER SAVOY CABBAGE

CARROT

FR., Carotte; GER., Mohre.

PHOTOGRAPH OF SPECIMENS GROWN FROM OUR OWN SELECT STRAINS

One ounce will sow 100 feet of drill; two to three pounds for one acre-

Carrots to grow to perfection require a rich, deep sandy loam, well pulverized and deeply cultivated; for an early crop sow in May and June in drills about one foot apart, thinning out to four inches in the row; sow for main crop in June and July.

Half Long Scarlet Nantes, stump rooted (Fig 5).

drical, smooth, bright orange; flesh orange, become apart, thinning out to four inches in the row; sow for main crop in June and July.

Carrots, Earliest Shorthorn, for forcing (Fig. 1). The earliest variety in cultiva-tion and best suited for forcing. Tops small, finely divided; root dark or red-dish-orange, globular with slender top, and grooved at the crown. They grow about 2 inches in diameter, but should be used before they are full grown. Per lb., \$1.00; \$10.30c; oz., 10c.; pkt., 5c.

Early Scarlet Horn (Fig. 3). Excellent for planting out of doors. Tops small, coarsely divided; roots tap shaped, but tapering abruptly to a small tap; surface dented; skin orange-red. Per lb., \$1.00; \(\frac{1}{2}\) lb., \$30c.; oz., 10c.; pkt., \$5c.

Guerande, or Ox-Heart (Fig. 4). This variety has given great satisfaction. While not attaining one-half the length of many other varieties, it will compare favorably in bulk of crop, as on good land it will produce Carrots four to six inches in diameter. The crop can also be readily pulled. Per lb., 90c.; \(\frac{1}{2}\) lb., 30c.; oz., 10c.; pkt., \$5c.

Tops medium; roots cylin-Final Long Scarlet Names, stump rooted (Fig. 5). Tops meatum; roots cylindrical, smooth, bright orange; flesh orange, becoming yellow in centre, but with odistinct core; of the finest quality. Per lb., 78c.; 2lb., 25c.; oz., 10c.; pkt., 5c. Chantenay, Half Long Scarlet, stump-rooted; (Fig. 7). Similar to Scarlet Nantes, but with larger shoulder and more productive. Per lb., 90; ½ lb., 30c.;

Chantenay, Half Long Scarlet, stump-rooted; (Fig. 7). Similar to Scarlet, Nantes, but with larger shoulder and more productive. Per lb., 90; ‡ lb., 30; 2c, 10c; pkt., 5c.

Half-Long Luc, stump-rooted (Fig. 6). Useful main crop sort; early and productive. Per lb., 90c; ‡ lb., 30c, oz., 10c; pkt., 5c.

Half-Long Danvers. Thick; of good quality and exceedingly productive. Per lb., 90c; ‡ lb., 30c.; oz., 10c.; pkt., 5c.

Scarlet Intermediate, point-rooted (Fig. 8). Size, full medium; skin bright; flesh orange yellow, fine grained, well flavored, and when young is excellent for table use. Per lb., 75c; ‡ lb., 25c; oz., 10c.; pkt., 5c.

Long Scarlet Altringham. Roots long, with tops an inch or two above ground; of medium size; skin deep scarlet; flesh bright, crisp and of fine flavor; excellent for garden or field cultivation; requires deep cultivation. Per lb., 60c; ‡ lb., 20c; oz., 10c.; pkt., 5c.

OELERY FR., Celtri
GER., Scilerie

Sow in the open ground as soon as it is fit to work in April, and keep clear of weeds until the time of planting in before planting, so as to ensure "stocky" plants, which suffer less on being transplanted. Plant in rows, a feet apart for the dwarf varieties, and 4 to 5 feer for the larger sorts, and set 6 inches apart in rows. After the planting of the Celery is completed, nothing further is to be done for six or seven weeks, except running through between the rows with the cultivator or hoe and freeing the plant from weeds. About the middle of August we begin the "earthing up," necessary for the blanching and whitening of that which is wanted for use during the months of September, October and November. The first operation is that of "handling." After all the soil has been drawn up against the plant with the hoe, it is further drawn close around each plant by the hand, firm enough to keep the leaves in an upright position and prevent them from spreading. This being done, more soil is drawn against the row (either by the plow or hoe, as circumstances require), so as to keep the plant in this upright position. The blanching process must, however, be finished by the spade, which is done by digging the soil from between the two rows and banking it clear up to the top on each side of the row of Celery. For fuller details on Celery cultivation see our Celery Manual, which is sent freely y mail for \$0c.

color when young, but as they mature the inner stems and leaves turn a beautiful glolden-yellow, which adds much to their attractiveness and makes the work of blanching much easier. The handsome color, crispness, tenderness, freedom from stringiness, and fine nutly flavor make it only necessary to be tried in order to establish it as the standard of excellence as an early sort. 3/10, 11.75; oz., 60c; pkt., 10c.

White Plume. Excellent variety; tender, crisp, mild, pleasing flavor; not a good keeper. Price, ½ lb., 75c.; oz., 25c.; pkt. 5c.

Giant Pascal. A green leaved variety developed from the Golden Yellow Large Solid, and has no superior for fall and winter use. It blanches very quickly after earthing up to a beautiful yellowish-white color, is very solid and crisp and of a nutry flavor. The stalks grow broad and thick. With rich soil and high culture this variety will give the best of satisfaction. ½ lb., 60c.; oz., 20c.;

oz. 20c.; pkt. 5c.

Evans' Triumph. The best late Celery. This new Celery is of superb quality and one of the best keepers, remaining in condition for use much longer than most sorts. The very large solid stalks are of the finest quality and texture, crisp, brittle, tender, and really nutty in flavor. It stands at the head of all late keeping white Celeries. Price, \(\frac{1}{2} \) lb., \(90c.; \) oz., \(30c.; \) pkt., \(5c. \)

PARIS GOLDEN YELLOW

Celery, Pink Plume. Similar to White Plume, except that the stalks are delicate it also has the rich, nutty flavor of the red Celeries. ½ lb., 75c.; 1 oz., 25c.; pkt., 5c. London Prize Red. One of the best of its color. ½ lb., 75c.; oz., 25c.; pkt., 5c.

London Prize Red. One of the best of its color. \$\frac{1}{2}\] lb., 75c.; oz.. 25c.; pkt., 5c.

New Dwarf Rose. One of the best pink Celeries; large, crisp and exceptionally nutty; a good keeper and of handsome appearance. The pink Celeries are becoming popular for their fine appearance and superior flavor. \$\frac{1}{2}\] lb., 75c.; pkt., 5c.

Rose Ribbed Paris. This beautiful new Celery possesses all the good qualities of the famous Paris Golden Yellow. It has the same beautiful rich golden yellow color, is self-blanching to the same remarkable degree, and differs only in the color of the ribs; these are of a very attractive shade of rose, which deepens as the season advances. \$\frac{1}{2}\] lb., \$\frac{1}{2}\] cs. 75c.; pkt., 10c.

Celeriac, Large Smooth Prague. A variety of Celery with turnip-shaped roots, which are white fleshed, comparatively tender, and have the flavor of Celery stalks. \$\frac{1}{2}\] lb., \$\frac{6}{2}\c.; oz., 20c.; pkt., 5c.

Soup Celery. (Old Seed). Excellent for flavoring. Oz., 10c.; pkt., 5c.

CAULIFLOWER

FR., Chou Fleur. GER., Blumen Kohle.

Fig., Chou Fleur, GER., Bismen Konte.

For spring and early summer crop sow in March or early in April in hot-bed and transplant to cold frame when sufficiently large, and to the open ground as soon as danger of hard freezing is over. The plants will endure a light frost. The soil for calliflower should be like that for cabbage; but it is better to be made richer than is ordinarily used for that crop. Give the plants thorough culture, and keep free from worms with Persian insect powder. For late crop sow at same time as for late cabbage, and treat in the same manner. It should be borne in mind that calliflower will not head up well in hot, dry weather, and hence the sowing should be so regulated as to bring it in either in early summer or late fall. Although nine-tenths of the calliflowers grown in this country are produced without it, frequent and abundant watering is so beneficial that it pays well for the labor it costs. After the heads begin to form draw the leaves over them and pin or tie them together to protect the heads from the sun and keep to them. They should be cut for use while the "curd" is compact and hard, as they soon become tough and bitter after they open and separate into branches. Owing to the seeds of some varieties being very expensive, there is great temptation to use the cheaper sorts. We think it well, therefore, to caution our customers to use only the to the seeds of some varieties being very expensive, there is great temptation to use the cheaper sorts.

leaved, dwarf for forcing, producing very solid, pure white heads of the finest for its extra earliness and certainty to head—features in which we know no other strain can equal it. Of dwarf, compact growth, with short stalks. It bears close only the heads, are pure shown white, very heads of the finest planting, and the leaves, growing upright, naturally protect the heads. The large, handsome heads, measuring eight to ten inches across, are pure shown white, very heads of the finest guality. So extremely solid and deep, nearly globe shaped, are the heads, that they weigh heavier than most, if not all other cauliflowers of the sures to make a solid, compact head. For these reasons it is growing are the heads, that they weigh heavier than most, if not all other cauliflowers of the surest to make a solid, compact head. For these reasons its is growing more and more in favor for planting for the late summer and fall crop. We have taken great pains to secure the best seed procurable, and confidently recommend same size. Gardeners can use our Extra Early Whitehead for either early or late. Price, ½ 1b., 89 : oz., 82.75; ½ oz., \$1.50; pkt., 15c.

Selected Extra Early Dwarf Erfurt.

One of the earliest varieties; small-vetted by its heavy foliage, it remains a long time fit for table use. To insure their full development, the plants should be started and transplanted early in the season. ½ 1b., 81.50; oz., 50.; pkt., 50.

Extra Early Dwarf Paris. Heads large, white, compact, solid; excellent flavor, tender and delicious; leaves large, stalks short; a favorite for general early crop. ½ 1b., 89; oz., \$2.51; pkt., 50.

Earliest rains in the cheaper Early by the for forcing or wintering over for early crop. It is exceedingly early and hardy, and is one of the surest to make a solid, compact head. For these reasons its growing more and more in favor for planting for the late summer and fall crop. We have taken great pains to secure the best seed procurable, and confidently recommend is a sequent to any offered. ½ 1b., \$9;

oz., \$1; pkt., \$5c.
Lenormand's Large, Short Stemmed. This is without doubt one of the finest late varieties grown; heads large, white,
well formed and compact; of excellent quality, very hardy, semi-dwarf, producing many large leaves, which protect the
close, solid curk, keeping it well blanched. ½ lb., \$3; oz., \$1; pkt, \$5c.
Walcheren White. Large, firm white heads, very hardy, endure cold, and withstand heat and drought well;
½ lb., \$150; oz. \$5c.; pkt., \$5c.

Walcheren White.

18 Lake, S1.50; oz. 50c.; pkt., 5c.
CORN SALAD, OR FETTICUS FR., Mache; GER., Ackersalat. Grown for use as a salad. Sow very early in spring, in rows a foot or more apart. In six or eight weeks it is ready for use. For early spring use sow in September, and when cold weather sets in, cover with litter, and winter over like Spinach. Lb., \$1.25; \$1b., \$40c.: 0z., \$15c.; pkt., \$5c.

CHERVIL, CURLED Fr., Cerjeuil; Ger., Gartenkerble.

Cultivated and used like Parslev; sow at any time in spring in shallow drills one ft. apart. Oz., 15c.; pkt., 5c.

Sow thickly in shallow drills, early in the spring, and at intervals throughout the season, for a succession, as it soon runs to seed. Water Cress requires a stream of running water, ditch or pond, in which it will grow without care, except at first keeping weed from interfering with it. It is easily introduced by planting along the margin of ditches or streams, and increases rapidly by the spreading of the roots or from the seed.

Cress, Extra Curled. Very fine; may be cut two or three times. Lb., 40c.; ½ lb., 15c.; oz., 10c.; pkt., 5c.

Broad Leaved Greeben. Very large leaved variety, pungent and pleasant flavored. Sometimes used for soups.

Water. A most desirable and appetizing salad, thriving best in shallow water, on the edges of streams. Oz., 50c.; pkt., 10c.

1 oz. for 50 hills;
2 to 3 lbs.
in hills for an acre.

For very early Cucumbers, sow the 1st of April in a hot bed, upon pieces of sod (grass-side down) so that they can be readily transplanted to the open ground in rich soil, when the danger of frost is over, or protect by hand glasses. For general use plant when the weather has become settled and warm, in hills about four feet apart each way; thin out to four of the strongest plants to each hill, after all danger from insects is over; they succeed best in a warm, moist, rich, loamy soil; continue planting at intervals for a succession. For pickles plant from June until middle of July.

Prices for the following varieties (except where noted), per pkt., 5c.; oz., 10c.; ½ lb., 20c.; lb., 50c.
Cucumber, Cool and Crisp. An improved variety of the Early Artington, white spine, being longer, more cylindrical and rapering at ends, a most desirable shape for pickles. At the pickling stage they are long, slim and even, of a deep dark green color. One of the earliest and most prolific. The flesh is peculiarly crisp and tender; one of the very best for table use.

Bersey Pickling. An exceptionally prolific sort, and one of the best pickling sorts in cultivation. Per lb., 60c.

Extra Early Long Green. This new strain of Long Green is claimed to be as early as the White Spine. The earliness combined with size, make it quite desirable for the market gardener. Per lb., 60c.

Japanese Climbing. Vines are extra strong and foliage much more vigorous than other kinds, and being a climbing stream.

Lapanese Climbing. Vines are extra strong and foliage much more vigorous than other kinds, and being a climbing sort can be grown on trellises, etc., saving valuable space in small gardens. It is very prolific, from forty to fifty cucumbers having been counted on single plants. Fruit cylindrical; about 10 inches long, thick and of fine flavor. Per lb., 60c.

White Wonder. A most distinct and valuable variety. It is of a pure waxen white from the time the fruit is first set until it has matured. It is very prollific and likely to be valuable both for forcing and garden cultivation. Per lb., 60c.

White Wonder. A most distinct and valuable variety. It is of a pure waxen white from the time the fruit is first set until it has matured. It is very prollific and likely to be valuable both for forcing and garden cultivation. Per lb., 60c.

Faris Prollife Pickling. A very desirable and distinct French sort. The fruit is very long, slender, cylindrical; densely covered with fine blekles, and deep rich green in color. Very crisp and tender. Per oz., 25c.; pkt., 5c.

Short Green Gherkin. A very small prickly variety, used exclusively for pickling, for which purposes it should be gathered while young and tender. A favorite with market gardeners. Per lb., 81.25; 1b., 40c., co., 2., 15c.; pkt., 5c.

White Spine. Of perfect form, remarkably even, and of a desirable dark green color. It grows more compact about the hill than most other kinds. One of the best table varieties. Per lb., 60c.

Steele, Briggs' Evergreen.

A remarkably fine strain of Cucumber, which is specially recommended for market, table or pickling purposes, differing from the ordinary and popular White Spine in color; it retains a deep green color in all stages of its growth; produces extra long smooth shaped fruit; very prolific, white in flesh, tender and crisp. Lb., 60c.

Forcing or Westerfield Pickling. Lb., 60c.

Forcing or Westerfield Pickling. Lb

FORCING OR FRAME CUCUMBERS

These are grown in the greenhouse or in a hot-bed; very hand-some both in form and color; attain a length of from 20 to 30 inches. The following are the cream of the many popular sorts: Cucumber, Blue Gown. Black spined variety, 18 to 24 inches

long, Per pkt., 20c.

Cuthill's Black Spine. Very handsome fruit of moderate size, prolific. Per pkt., 20c.

Duke of Edinburgh. White spined variety, averaging over 30 inches in length. Per pkt., 20c.

Marquis of Lorne. White spined variety; immense size and symmetrical form. Per pkt., 30c.

Empress of India, (Reid's). White spined variety, 18 to 24 inches long; very uniform in shape, of excellent flavor and very productive. Per pkt., 20:.

Carter's Model. Handsomest Cucumber grown; perfect outline, scarcely any neck, fine flavor. Per pkt., 20c.

Rollinson's Telegraph. Very prolific, crisp, and of superior quality. Per pkt., 25c.

SWEET OR SUGAR

FR., Mais; GER., Mais.

40 pounds per bushel.

All varieties of Sweet or Sugar Corn may be either sown in rows 4½ feet apart, and the seeds placed about 8 inches apart in the rows, or planted in hills at distances of 3 or 4 feet each way, according to the variety grown or the richness of the soil in which it is planted. Cultivate often and thoroughly. One pint of seed plants 100 hills. One peck will plant an acre. For field varieties see Agricultural Seeds.

Add 5c. lb, for postage if wanted sent by mail.

EARLY VARIETIES

Corn, Extra Early Cory (White Cob). Undoubtedly the earliest of all, and the very best early Sweet Corn. Frek, Si b., 15c; pkt., 5c.

First of All (Red Cob Cory). Differs from the preceding only in the color of the cob. Peck,

Perfist of Antikec.

Soc. Ab. 10c; pkt. 5c.

—Early Minnesota. Next to the Marblehead in earliness; ears of fair size, kernels broad, sweet and tender. Peck, 90c.; lb., 12c.; pkt., 5c.

—Crosby Early Sugar. Early and a great favorite. Rather small ears, but productive and of excellent quality. Peck, 90c.; b., 12c.; pkt., 5c.

—Early Giant (new). The ears grow to a large size, kernels pure white, sweet and tender. -Early Giant (uew). The ears grow to a large size, kernels pure winter, sweet and tender. The accompanying cut is taken from a photo of ears grown on high land on stalks 4 to 5 ft. high, and needs no further explanation. Gardeners report the corn ready for use in sixty days grown on sand, and seventy-two days on heavy clay. Peck, \$1; lb., 15c.;

chicago pickling cucumber

chicago pickling cucumber

ears nedium size, eight rowed, small, red cob, kernel broad, shallow and very sweet. Peck, 80c; lb, 10c.; pkt, 5c.

—Mammoth White Cory. Much time and attention has been given to the improving of Sweet Corn and it gives us genuine satisfaction that we are able to offer a variety so pronounced in its superiority as Mammoth White Cory. The earliest large eared corn yet introduced; only a few day later than the Extra Early White Cory. The ears are very much larger, the grain and cob pure white and of unsurpassed quality. Peck, \$1; lb. 15c.; pkt. 5c.

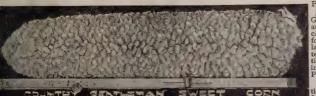

MEDIUM EARLY VARIETIES.

Corn. Perry's Hybrid. No better second early for the market gardener. It is nearly as early as Early Minnesota, but nakes a larger ear. Kernels white, large, sweet and very tender. Peck, 90c.; lb., 12c.; pkt., 5c., Hickor Minproved. Valuable for canning. The ears are 12 rowed. Quality of the best. Peck, 90c.; lb., 12c.; pkt., 5c., Early Evergreen. Ears grow to in. long, Ripens about 12 days before Stower!'s Evergreen, which variety it very ruch resembles. Exceptionally fine for market garden trade. Peck. *1,25: lb., 20c.; pkt., 5c. Corn, Perry's Hybrid.

-Early Evergreen. Early Exception

Corn, Country Gentleman. This variety is the highest attainment yet achieved in the cultivation and improvement of Sweet Corn; remarkably delicious corn for family use. Its long, small, milky kernels are full of sweetness, cob small, corn white and tender. Peck, \$1; lb., 15c.; pkt., 5c.

Mammoth. Second early. Largely used by market gardeners. Produces the largest ears of any sweet corn; ripens earlier than the evergreen. Peck, \$0c.; lb., 12c.; pkt., 5c.

Stowell's Evergreen. Grown more extensively than any other; a great favorite with canners and market gardeners for late use. The ears are of canners and market gardeners for late use. The ears are of large size; kernels very deep, tender and sugary; very productive and remains for a long time in fit condition for table use. Peck, 80c.; lb., 10c.; pkt., 5c.

Pop Corn. Cultural directions same as for Sugar Corn. Lb., 10c.; pkt., 5c.

EARLY GIANT

COUNTRY GENTLEMAN

LETTUCE

FR., Laitue, GER., Lattich.

One ounce will sow 150 feet of drill.

Lettuce is a plant of most simple culture when grown in the open air. It requires rich soil, plenty of well-rotted manure and abundant moisture. With these conditions its growth is vigorous and rapid; and to be crisp and tender, it should be grown quickly. Seeds may be sown in a frame in February or March, not much bottom heat being required. The plants may be set out as early as the ground can be worked, as light frosts will not injure them. Set in rows about eighteen inches apart, leaving eight or ten inches between plants. For successive crops, sow every two weeks up to July.

Lettuce, Grand Rapids Forcing. This is regarded as the best forcing and shipping variety. It matures quickly, is of large size and of handsome appearance, crisp and tender, and will keep from wilting after cutting longer than any other sort. ½ lb., 35c.; oz., 15c.; pkt., 5c.

Big Boston. A most desirable variety, either for forcing or for open ground; yety large and solid, heads well and is a valuable sort. ½ [b., 40c.; oz., 15c.; pkt., 5c. for off, or finest market variety to be found. Its beautiful yellowish green color, crimped, curled and well formed heads, tender quality and sweet flavor place it at the head of the list for the market gardener or for family use. It withstands the heat of summer, and retains its sweetness for a longer time than any other variety we know. ½ [b., 40c.; oz. 15c.; nkt. 5c.

summer, and retains its sweetness for a longer time than any other variety we know. \$\frac{1}{2}\$ lb., \$\frac{1}{2}\$ c.; oz., \$\frac{1}{2}\$ c.; pkt., \$\frac{5}{2}\$ c.

Nonparell Cabbage. One of the best in cultivation; color, beautiful light yellowish recen; heads well; very tender. \$\frac{1}{2}\$ lb., \$\frac{3}{2}\$ c.; oz., \$\frac{1}{2}\$ c.; pkt., \$\frac{5}{2}\$ c.

All the Year Round. A very hardy, compact variety; white, solid and crisp; for the summer or forcing this variety is unsurpassed. \$\frac{1}{2}\$ lb., \$\frac{3}{2}\$ c.; oz., \$\frac{1}{2}\$ c.; pkt., \$\frac{5}{2}\$ c.

Black-Seeded Simpson. (Curled.) Forms a large loose head; its nearly white curly leaves are large, thin, exceedingly tender, and of a very good quality; one of the very best sorts for the frame or hot-house, as well as for early outside planting; not so destrable for shipping as Grand Rapids. \$\frac{1}{2}\$ lb., \$\frac{3}{2}\$ c.; oz., \$\frac{1}{2}\$ c.; pkt., \$\frac{5}{2}\$ c.

Red Edge Victoria. Crisp and tender; of a light pale green color tinged with red at the edges; one of the best for family use. \$\frac{1}{2}\$ lb., \$\frac{4}{2}\$ c.; oz., \$\frac{1}{2}\$ c.; pkt., \$\frac{5}{2}\$ c.

California Cream Butter. Heads of good size, round and solid. \$\frac{1}{2}\$ lb., \$\frac{3}{2}\$ c.; oz., \$\frac{1}{2}\$ c.; pkt., \$\frac{5}{2}\$ c.

Denver Market. A very early sort, with large even heads, solid, crisp and of fine flavor. 1 lb., 35c.; oz., 15c.; pkt., 5c. Deacon. One of the best, a good header, very hard and of splendid quality. 1 lb., 35c.; oz., 15c.; pkt., 5c.

GOURDS

FR., Gourde ; GER., Zier Kuerbis.

The following varieties will be found useful for household and farm purposes. Instructions for growing are printed on each paper of seed. For ornamental varieties see flower seeds,

Gourd, Dipper. Valuable for household purposes, Make dippers of various sizes, which will last years. Per oz., 25c.; pkt., 5c.

-Sugar Trough. They grow to hold from 5 to 10 gals. each. have thick, hard shells, but durable. Per oz., 25c.; pkt., 5c. —Nest Egg. Grows exact size, color and shape of an egg, and makes a very good nest egg. It is a rapid growing climber. Do not plant until danger from frost is over. Per oz., 25c.; pkt. 5c.

EGG PLANT

FR., Aubergine; GER., Eierpflanze.

For perfection of growth, a rich soil, plenty of moisture and warm weather are required, with the addition of frequent hoeing. Sow in a gentie heat about the first of April. Trans-plant about the middle of June, setting the plants three feet apart. One ounce to fifteen hundred plants.

Egg Plant, New York Improved. Purple; best for market and home use; very large, oval, heavy fruit. Oz., 60c.; pkt., 10c.

Early Long Purple. Fruit longer and smaller than the above sort; hardy, productive, early and excellent. Per oz., 49c.; pkt., 5c.

ENDIVE

FR., Chicoree; GER., Endievien.

This plant makes a tender and delicious autumn salad. It is planted in June or July, and when nearly full grown the outer leaves are tied together in order to bleach in the centre. One ounce will sow 100 feet of drill, and will produce about three thousand plants.

Endive, Extra Green Curled. Curled dark green leaves, which blanch white, crisp and tender. Price, per 1 lb., 50c.; 92., 15c.; pkt., 5c.

-Moss, Curled. Has the appearance of a tuft of moss, color, dark green; blanches beautifully. Price, per ½ lb., 50c.; oz., 15c.; pkt., 5c.

Lettuce, Early Hanson. Early Green Curled Silesian. Early Prize Head. Drumhead, or Maltal Early Curled Simpson. White Summer Cabbage.
Above 6 varieties, price 2 lb., 35c.; oz. 15c.; pkt., 5c.

COS, OR CELERY LETTUCE

New Celery Lettuce, "Trianon."
This excels all other lettuce in quality, having a crispness, tenderness and flavor peculiarly its own, and unapproached by any other variety. The heads are long and conical, often nine in high by eighteen in. in circumference. The long and narrow leaves require to be tied, when they soon form solid heads and quickly bleach to snowy whiteness, and become as stiff, crisp and sweet as celery stalks, and are delicious when eaten in the same manner, or prepared for salad. ‡ lb., 40c.; oz., 15c.; pkt., 5c.

—Paris White Cos. ‡ lb., 40c.; oz., 15c.; pkt., 5c.

15c.; pkt., 5c.

KOHL RABI FR., Chou Rave; Ger., Kohlrabi,

Kohl Rabi is sown for general crop in the spring, like the Turnip, in drills; or may be transplanted like the Cabbage. For winter table use sow middle of June. The stem, just above the surface of the ground, swells into a bub something like a Turnip. It is cooked like the Turnip and is highly prized for speck. It will bear drought better, and therefore a crop is more certain.

Kohl Rabi, Early White Vienna. Green top, white flesh, popular, handsome, good flavor. \$\frac{1}{2}\lb., 75c.; oz., 25c.; pkt., 5c.

Early Purple Vienna. Differs from the preceding only in color. 1 lb. 80c.; oz., 25c.; pkt., 5c.

The Garden Lemon is a very interesting fruit, about the size of a lemon; bright golden color; pulp about half an inch thick; agreeable, pleasant flavor, sub-acid, with the richness of a musk melon; a desirable addition to the list of new fruits. Cultivate in hills. Oz., 15c.; pkt., 5c.

How to Prepare Garden Lemons for Pre-For z 10., 300.;

Serves.—Peel, halve and remove seeds from the Garden Lemons selected. To each pound of fruit so prepared allow one pound of white sugar. Sprinkle sugar over fruit and let stand over night; pour off juice into preserving kettle and let it come to a boil; then place the fruit in and cook until fork will pierce it easily. Take out carefully and place in jars. Let syrup boil a few minutes to thicken, then skim and pour over fruit; seal closely.

LEEK

FR., Poireau; GER., Lauch.

The Leek is very hardy, of easy culture and succeeds best in light rich soil. Sow early in April, in drills 1 foot apart, and 1 inch deep. When the plants are 6 to 8 inches high transplant in deep rich soil, in rows 12 in. apart and 6 in. in the rows, as deep as possible, so that the neck may be covered and blanched; draw the earth to them as they grow. One ounce will sow about 100 feet of drill.

beek, London Broad Flag. Large and strong with broad leaves growing only on two sides, like the Flag. Per lb., \$1.25; \(\frac{1}{2} \) lb., 35c.; oz., 15c.; pkt., 5c.

Giant Carentan. The largest variety; often three inches in diameter, and becoming very white and tender; a very hardy sort. Per lb., \$1.50; \(\frac{1}{2}\) lb., \$40:; oz., 15c.; pkt., 5c.

**IUSSEIBURGH. A very large variety of superior quality. Per lb., \$1.50; \(\frac{1}{2}\) lb., \$40.; oz., 15c.; pkt., 5c.

GIANT CARENTAN LEEK

MUSK FR., Melon; GER., Zucker Melone,

In this latitude we must give the Melon every possible advantage to secure earliness and thorough ripening. The same culture as recommended for Cucumbers will ensure success. It is desirable also for the North to secure early ripening varieties. There are two distinct species of Melons—the Must and the Water Melon. The former is the most easily grown, though, with a selection of early sorts and a little attention to forwarding the young plants early in the season, a good crop of either can be secured almost anywhere. The Melon will grow and ripen well in a warm, sandy, poor soil, but when grown in such a situation the hill must be thoroughly enriched with plenty of available food for the roots.

Price, each, for the following varieties, except where noted, ½ lb., 30c.; 1 oz., 15c.; pkt., 5c. Melon, Musk.

n, Musk. Grand Rapids. Remarkably early for its large size; salmon flesh; fair quality.

Champion Market. Very similar to Netted Gem, but larger. The flesh is thick and of a light green with a rich, julcy, sweet flavor.

Champion Market. Very similar to Netted Gem, but larger. The fiesh is thick and of a light green color, with a rich, julcy, sweet flavor.

Extra Early Green. The earliest melon in cultivation, of good size, heavily netted and ribbed. Flat at the ends and or good flavor.

Cosmopolitan. Fruits round, medium in size, free from ribs and heavily netted; very handsome in appearance, with beautiful green flesh, sweet and melting.

The Banquet. "The Banquet" is a medium sized Melon, flat at both ends, and more beautifully netted than any other known variety. In quality it has no equal, the flesh is uniformly deep and of that granulated character which always indicates a good melon; color, dark rich salmon. Per 1 lb., 40c.; oz.,

Targe Yellow Cantaloupe. Flesh reddish orange, sweet and of good flavor, arily and productive.

Skillman's Netted. Form roundish oval; flesh light green, sweet and richly perfumed; an early and delicious variety.

Small Green Nutmeg. Fruit round, of medium size, slightly ribbed; skin dark green, yellow when over ripe; flesh thick, a little coarse, of fine flavor.

Irondequoit. (New.) Flesh thick, orange

MERALDG

Intitle coarse, of fine flavor.

Irondequoit. (New.)
Flesh thick, orangeyellow in color, melting,
juicy, nectar-like. The
vine is a strong grower
and very productive.
Fruit is large—12 to 15
ins. in diameter—round,
ribbed, of light greyish
color, with a prominent netwide and covered thickly with prominent netting. The melons average about six inches in diameter,
have a very small seed cavity, and are exceedingly solid and heavy
for their size. The flesh is a deep, rich, orange-yellow color, and is of
very fine grain, without the slightest stringiness, and of delicate
and delightful flavor. ½ lb., 35c., oz., 15c.; pkt. 5c.

Montreal Green Nutmeg. A splendid melon.

Equisite: This grand new Melon is somewhat globular in
shape; the skin is a peculiar greyish green until ripe, when it changes
to a bright yellow. The ribs are wide and covered thickly with prominent netting. The melons average about six inches in diameter,
have a very small seed cavity, and are exceedingly solid and heavy
for their size. The flesh is a deep, rich, orange-yellow color, and is of
very fine grain, without the slightest stringiness, and of delicate
and delightful flavor. ½ lb., 35c., oz., 15c.; pkt. 5c.

Montreal Green Nutmeg. A splendid melon.

Equisite: This grand new Melon is somewhat globular in
shape; the skin is a peeuliar new vegetable grows
on a vine like a melon, and is golden yellow
as deep fired like eg plant, when green; the

FARLY HACKENSACE

MUSTARD FR., Moutard; GER., Senf. Sow thickly in drills 8 to 10 in. apart, in rich, loamy soil, covering the seed half an inch deep. When young the leaves are used in salad, and in more advanced stages as greens in the same way as spinach. Sowing for succession may be made from April till

Tuly

July.

Mustard, White. The best for salads; seeds are also used for mixing with pickles and for preserving cider. Lb., 30c., ½ lb., 15c: oz., 10c: pkt., 5c.

New Chinese. Highly esteemed for salads. The leaves are twice the size of the ordinary White Mustard, flavor sweet and pungent. ½ lb., 30c.; oz., 10c.; pkt., 5c.

MANGO MELON

Also called Vegetable Peach, or Vine
Peach. This peculiar new vegetable grows
on a vine like a melon, and is golden yellow
in color, resembling an orange in shape and
size, and the flesh is snow white. They are
used fried like egp plant, when green; they
also make splendid mangoes, stuffed with
cabbage, like peppers. When they first ripen
they are quite hard and tasteless, but they
soon become mellow and sweet, and have a
very rich flavor. For sweet pickles, pies or
preserving they have no equal. They are
very early, hardy and productive, the vines
being literally covered with fruit. Oz. 15c.;
pkt, 5c.

MUSHROOM SPAWN
Although the Mushroom is one of the most delicious and at the same time most nutritious of all known esculents, its cultivation is not of all known esculents, its cultivation is not of all known esculents, its cultivation is not mushroom state we have prepared and published an 8-page pamphlet, written by a practical grower, which gives in a concise form all necessary information for the successful raising of the best Mushrooms. This pamphlet will be sent free to anyone interested. We make a specialty of supplying the genuine English "Milltrack" Mushroom Spawn. We receive several importations a year, so that customers can depend on receiving spawn fresh and genuine at all times.

Mushroom Spawn, English. Per brick, 25c.; 5 for \$1 (post-paid). Special quotations on quantities.

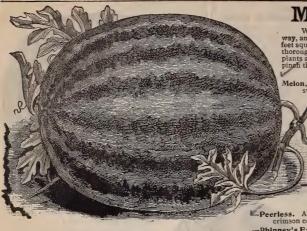

—French. Per 2-lb. box, \$1, post-paid.

ONION SETS

Special prices by the bushel on application.

Prices for Onion Sets are based on market values at time of sale; we therefore are unable to quote bushel prices now, but shall be glad to give prices by letter, in season, to those who write. Prices as quoted by the pound, pint and quart, include postage, and will stand unchanged during the season. As Onion Sets are liable to injury from frost, we do not send them until weather is safe in Spring.—Onion Sets, New White Multiplier. These are a pure silvery white color, enormously productive. Their keeping qualities are remarkable, having kept perfectly sound for a year; but their most important quality is extreme earliness, being ready for market from three to four weeks ahead of other Onion Sets. Pint, 20c.; quart, 35c.; 3 quarts for \$!.—Dutch Sets (Yellow). Pint. 15c. quart. 25c.; two quarte 45c. Prices for Onion Sets are based on market values at time of sale;

35c.; a quarts for \$!.

— Dutch Sets (Yellow). Pint, 15c.; quart, 25c.; two quarts, 45c.

— Shallots. Quart, 18c.; two quarts, 35c.

— Top or Button Onions. Pint, 18c.; quart, 30c.

— English Multipliers or Potato Onions. Lb., 20c.; two lb., 35c.

— Egyptian, or Perennial Tree Onion. These are for fall planting, very hardy, and a great favorite, producing green Onions in the spring before any other variety. Orders booked during spring will be forwarded in time for planting in the fall. Quart, 20c. Garile Sets. Per lb., 25c.; 30c. per lb. post-paid.

PEPPER

FR. Piment; GER., Pfeffer

PARSNIF

FR., Pancais. GER., Pastinake.

One ounce per 200 feet of drill; 5 or 6 lbs., in drills, for an acre. One ounce per 200 feet of drill; 5 or 6 lbs., in drills, for an acre. They do best on deep, rich, sandy soil, but will make good roots on any soil which is deep, mellow and moderately rich; fresh manure is apt to make the roots coarse and ill shaped. As the seed is sometimes slow to germinate, it should be sown as early as possible, in drills 20 in, to two feet apart; cover one-half-inch deep, and press the soil firmly over the seed; give frequent cultivation and thin the plants four to the foot. Parsnip, Elcombe's Giant. The largest, handsomest and best variety grown, of excellent quality, very sugary. Price, each per lb., 60c.; 20., 10c.; pkt., 5c.
Long Smooth, or Hollow Crown. One of best parsnips grown. Guernsey. Half long; the roots do not grow so long as the Hollow Crown, but are larger in diameter and more easily gathered smooth, the grained and of most excellent quality.

Student. The roots of this variety are of moderate size, tapering regularly, clean yellowish skin.

Price, each, per lb., 50c.; 1/4 lb., 20c.; oz., 10c.; pkt., 5c.

MELON-WATER FR., Melon d'eau; GEN., Wasser Malone.

Water Melons are cultivated in hills, which should be six to eight feet apart each way, and composed of light, moderately rich soil. The hills should be dug about two feet square; eighteen inches deep, and half filled with well rotted manure, which must be thoroughly incorporated with the soil. Plant in May, 10 seeds to a hill, and when the plants are well up, thin out to three. Cultivate until the vines cover the ground, and pinch the ends of the growing shoots to induce early fruiting. 1 oz. will plant 30 hills. Price of the following varieties: 1 lb., 20c.; oz., 10c.; pkt, 5c.

Melon, Black Spanish. Fruit medium size, almost round; skin dark green; flesh red, sweet and delicious.

Cuban Queen. A very fine variety, growing to great size; flesh bright red, solid and sweet. The skin is beautifully striped with dark and light green. Melons are wonderfully solid, rind thin. They are enormously productive and ripen early.

Dixie. A melon of excellent quality, extremely sweet, juicy and tender.

Very early, hardy and productive.

Hungarian Honey. This variety ripens early. The flesh is a very brilliant red color, and of a very rich honey flavor; color of skin medium bright green; uniformly of medium size.

-Fordhook, Early. One of the earliest, of exceptionally large size, nearly round, and of excellent quality.

McIvors' Sugar. The sweetest variety grown. Melons attain a large size and handsome appearance. Very productive and hardy.

Mountain Sweet. A good early variety. Standard everywhere. Oblong in shape, dark green color with beautiful core; is of good size,

Peerless. A grand favorite and standard variety. Superior in every respect. Has beautiful crimson core; which is always fine grained and cannot be surpassed in flavor.

Phinney's Extra Early. It is sweet, of good size, and very productive. Its market qualities are the very best; flesh is red, sweet and luscious. Seminole. Long oval melon, of fair quality, a profuse bearer. Melons either gray or light green.

"The "Boss." Oblong in shape; skin, dark green; flesh, deep scarlet and rich flavor. Early, heavy, productive and a good shipper.

Sweet Heart. A new variety of largest size, a little longer than thick, being nearly globular in shape, skin a bright beautiful mottled green. Flesh bright red, firm and heavy, but crisp, melting and exceedingly sweet.

Cole's Early. An Early variety; of medium size, almost round in shape, green striped a lighter shade. Thin rind, bright red flesh of a delicate texture.

MELON-CITRON

colorado Mammoth. This is quite dis-

The Onion thrives best in a rather deep, rich, loamy soil, and, unlike most vegetables, succeeds well when cultivated on the same ground for successive years. The best culture requires th it the ground should be deeply trenched and manured the previous autumn. As early in the spring as the ground is in working order, commence operations, levelling the ground with a rake, and tread it firmly; sow thinly in drills about a quarter of an inch deep, and one foot apart; cover with fine soil. When the young plants are strong enough, thin gradually, so that they stand three or four inches apart. Keep the surface of the ground open and free from weeds.

Our Onlon Seed has a splendid reputation, and no pains will be lacking to maintain its present high standard. Choice American Grown Seed.

ONION, Glant Prizetaker. The largest, handsomest, finest flavored, best shaped, most superior yellow globe onion ever introduced. This simply magnificent onion is certainly a wonder. Our select strain produces onions averaging 2 pounds each. Of a clean bright straw color, it always grows to a uniform shape, which is a perfect globe. It has a very small neck, and it always ripens up hard and fine, without any stiff necks. Regarding its keeping qualities, experience proves it to be an excellent keeper—say till the end of February. Per lb., \$1.40; ½ lb., 40c.; 2., 15c.; bkt. 5c. oz., 15c.; pkt., 5c.

Steele, Briggs' Giant Yellow Globe. An exceptionally fine strain the Danvers in shape, but is larger, rounder, fuller at the top and rounder at the base. It is a heavy yielder, of excellent quality, and the best keeping variety grown. Per b. \$4.5; ½ lb. 35c; oz. 15c; pkt 5c.

Yellow Globe Danvers. Early round, very small neck, fine grained, mild favor, immensely productive and an excellent keeper. Per lb., \$1; ½ lb., 30c.; oz., 15c; pkt., 5c.

Large Red Wethersfield. The staple variety, very productive, large size, deep red color, pleasant flavor and an excellent keeper. Per lb., \$1; ½ lb., 30c. oz., 15c; pkt., 5c.

Extra Early Flat Red. Matures very early, yields abundantly, and is of mild flavor; medium size, deep red, close grained, solid and heavy; highly recommended, particularly for the north and north-west, and even there will produce good-sized onions. Per lb., \$1.20; ½ lb., 35c; oz., 15c.; pkt., 5c.

Southport Red Globe. Beautiful globe-shaped, rich, purplish crimson; a good keeper and of superior quality. Per lb., \$1.50; ½ lb., 40c; oz., 15c., pkt., 5c.

Southport White Globe. A large, globe-shaped onion, firm, fine grained, of mild flavor; keeps well, of beautiful shape, clear white Skin. Per lb., \$2; ½ lb., 60c; oz., 20c., pkt., 5c.

Southport Yellow Globe. A very large, handsome, globular-shaped yellow variety, productive, of mild flavor, excellent keeper. Per lb., \$1.20; ½ lb., 35c; oz., 15c; pt., 5c.

White Portugal, or Silver Skin. A bandsome onion, of mild flavor, but not

15c.; 4., 5c. White Portugal, or Silver Skin. A bandsome onion, of mild flavor, but not a good keeper; for summer and fall use. Per lb., \$2.20; ½ lb., \$0c.; oz., 20c.; pkt., 5c.

Prizetaker Red Globe. A new, large, handsome onion, globular in shape, of a rich, dark red color, very solid and pleasant flavored. In uniform growth, earliness and color, a decided leader. A grand exhibition variety, and an enormous crop producer when properly grown. Per lb., \$2; \(\frac{1}{2} \) lb., \(\frac{60c.}{2}, \) 20c.; pkt., \(\frac{5c.}{2}, \)

Textra Early Australian Brown. Is of medium size, wonderfully hard and solid and most attractive for market, both as to form and appearance. Every seed seems to produce a good sized onion, and the bulb begins to form very quickly. Planted with the Red Wethersfield, it proved to be nearly three weeks earlier and ripened off more uniformly. It has the reputation of keeping indefinitely, and we think from its firmness and hardness that it will keep longer in good condition than any other onion known. Per lb., \$1.25; \(\frac{1}{2} \) lb., 35c.; oz., 15c.; pkt., 5c.

FOREIGN ONIONS

The following varieties have been tested in this country, and have given perfect safetion. The flavor of the Italian varieties is mild, and they are in every way well adapted to culinary purposes.

Onions, Adriatic Barletta. A very early, small, pure white variety, having a very delicate silver skin, flesh firm and mild in flavor. Its great merit over all others is its extreme earliness. For pickling purposes it is unequalled. Per lb., \$2; \(\frac{1}{2}\) lb., 60c.; 22, 20c; pkt., 5c.

60c.; ez., 20c.; pkt., 5c.

—White Queen. A silver skinned variety, of quick growth and remarkable keeping qualities. Particularly valuable for pickles. If sown in July thickly they will mature perfect, hard onions from ½ to ¾ of an inch in diameter. Per lb., \$2; bl., \$6c.; oz., 20c.; pkt., 5c.

—Mammoth Silver King. Large size, flat, skin silvery white, flesh pure white; exceptionally mild, delicate flavor. Per lb., \$2.20; ½ lb., 50c.; oz., 20c.; pkt., 5c.

Small Silverskin. Pickling. A small French variety, used extensively for pickling: very early. Per lb., \$1.65; ½ lb., \$5c.; oz., 15..; pkt., 5c.

Giant Velow Rocca. A splendid large variety, globular-shaped, bright brown or yellow skin and delicate flavor. Succeeds best in a warm situation. Per lb., \$1.40; \$1.0 ft., \$5. — Giant Brown Rocca. A well known variety, of very mild, delicate flavor, immense size, handsome globular shape, and light reddish brown skin. Per lb., \$1.40; \$1b., 40c; oz., 15c; pkt., 5c.

**S.140. \$ 1.6.; pkt., \$c.; pkt., \$c. |

-Welsh Red. Skin reddish brown and remarkably hardy; used for fall sow ing. Per lb., \$1.40; \$\frac{1}{2}\$ lb., \$0c; oz., 15c.; pkt., \$c. |

-Giant White Italian Tripoli. Large size, beautiful form, fine, white skin. First season will grow an onion. of from x to x\$\frac{1}{2}\$ lbs.; but to attain full size, bulbs should be set out the following spring. Per lb., \$2; \$\frac{1}{2}\$ lb., \$60c.; oz., 20c.; pkt., \$c. |

-Giant Red Italian Tripoli. In shape and size like the Giant White Tripoli. Skin thin, rich blood-red, flesh white, fine grained. Per lb., \$1.65; \$\frac{1}{2}\$ lb., \$5c.; oz., 15c.; pkt., \$c.

EXTRA EARLY PEAS

Peas, The Steele, Briggs' Best Extra Early. (2 feet), white dented. This "First of All" Pea possesses all the qualities most essential for a first-class variety, being extra early and ripening with great uniformity. About 45 days from planting is the average time for gathering the crop. Per 15 lbs., \(\xi\)1.30; lb, \(\xi\)15c.;

planting is the average time for gathering the crop. Per 15 lbs., §1.30; lb, 15c.; lkt. 5c.

Extra Barly. A good standard sort. Per 15 lbs., §1.20; lb, 15c.; pkt., 5c.

Alaska. This blue Pea has become a standard variety, and is the earliest of all blue Peas; twenty inches high; very uniform, maturing crop for one picking; of excellent quality. Per 15; lbs., §2.6; pkt., 5c.

American Wonder. (9 inches). Green wrinkled. One of the earliest; finest quality, productive, of dwarft, compact growth. Per 15 lb., \$2.00; lb., 25c; pkt., 5c.

Nott's Excelsior. (12 inches). Vines
larger and more vigorons than

larger and more vigorous than American Wonder; earlier and more prolific than Premium Gem. Pods well filled. Peas for sweetness and tenderness have no equal. Per 15 lbs., \$2; lbs., 25c.; pkt., 5c.

lb., 25c.; pkt., 5c.

Premium Gem. (15 ins.) A great
improvement over the Little Gem,
nearly as early as the American Wonder,
and the vine is decidedly larger, bearing
an immense crop of pods, well filled with
peas of the best quality. Per 15 lbs.,
\$1.90, lb., 20c.; pkt., 5c.

Rural New Yorker. Very early, prolific and uniform in ripening. Per
15 lbs., \$1.30; lb., 15c.; pkt., 5c. Premium Gem.

MEDIUM OR SECOND EARLY

Peas, The Admiral. (3½ ft.) A grand second early variety; vines vigorous; pods large, usually borne in pairs, and filled with from 6 to 8 large peas of finest quality and color. Per 13 lbs., \$150; b. 20c.; pkt., 5c.

norsiord's Market Garden. (5 ft.)

A grand wrinkled variety, coming in

Torsford's Market Garden. (5 tt.)
A grand wrinkled variety, coming in
between Premium Gem and Advancer.
It is a prolific bearer, pods of medium
size, and literally packed with peas of a
delicious sweet flavor. 15 lbs., \$1.50;
lb., 20c.; pkt., 5c.

Duke of Albany. The pods are of
immense size, of the style of "Telephone," except that they are dark green
—and are filled with fine large peas. It
grows about four feet high, is very prolific, matures very quickly, has the great
advantage of possessing a rich flavor.
15 lbs., \$1.75; lb., 20c; pkt. 5c.

McLean's Advancer. (2 ft.) Green wrinkled variety; broad long pods of fine flavor and productive. Largely used among canners. Per 151bs., \$1.50:1b. 20. pkt. 5. Shropshire Hero. (2 ft.) A second early wrinkled variety, covered from top to bottom with long, handsome and well-filled pods, with from 6 to 8 peas of superior flavor and quality. Per 15 bs., \$1.20; lb., 15c; pkt., 5c. Heroine. (2 ft.) Medium early green wrinkled pea, large, recurved, showy pods, immense cropper, finest quality. Per 15 bs., \$1.25; lb., 20c.; pkt., 5c. New Dwarf Telephone. We have much pleasure in introducing this Pea, as we feel sure its dwarf vines, large handsome pods, well filled with Peas of the highest quality, will make it exceedingly popular. Height, 18 ins.; habit, dwarf, stocky and vigorous. Season, medium. Pods frequently 5 ins., broad, rounded or curved at end, color, pale green, good lasting quality for market purposes. Seed of largest size, tender and of delicious flavor. Per 15 lbs., \$1.90; lb., 20c.; pkt., 5c.

Peas, Pride of the Market. (2f.) Is a strong-growing Pea, wonderfully productive. The pods are of large size and handsome appearance, and the peas are of splendid quality. Per 15 18s. \$1.60; lb., 20c; pkt., 5c

Improved Stratagem. (2 ft.) One of the very best. A heavy cropper, and pro-duces large, remarkably well filled pods of excellent flavor. Per 15 lbs., \$1.75; lb., 20c.; pkt. 5c. Yorkshire Hero. (2 ft.) A splendid main crop Pea; very prolific, finely flavored, great cropper; branching. Per 15 lbs., \$1.20;

Champion of England. (5 feet). One of the richest and best flavored Peas grown; very productive Per 15 lbs, \$1; lb 15c; pkt., 5c.

Telephone. (4 ft.) Wrinkled variety of strong growth; a good cropper, bearing immense pods of large peas of excellent flavor. Per 15 lbs., \$1.75; lb., 20c.; lent flavor.

EDIBLE PODDED OR SUGAR PEAS

This is a favorite class of Pea, with very tender, edible pods, and for table use is served up after the manner of green beans.

Peas, Extra Early Dwarf Brittany. (2 ft The earliest; pods long, somewhat sickle haped. Per lb., 50c.; \(\frac{1}{2}\) lb., 15c.; pkt., 5c.

Large, Crooked or Scimitar. (4 feet). Large, often twisted, sometimes five inches long, and one inch or more broad. The best. Per lb., 50c.; ½ lb., 15c.; pkt., 5c.

NEW AND SELECT VARIETIES

Note our low prices

NEW EXTRA EARLY "HERO" The Earliest Potato In existence and the Heavlest Yielder known

This splendid new variety is somewhat similar to that grand old sort "Early Rose," originating from a seed ball of that variety. In shape and color it is much similar though not quite as dark, but much earlier, larger and of better quality, cooking dry and floury whether baked or boiled. Like the Early Norther it seems to prosper in every condition of soil and climate. It is the largest yielding early sort we know of, being fully four days ahead of the Early Obio, and yielding nearly double the quantity of marketable potatoes of the very best quality. Price, per lb., 25c.; 4 lbs., 75c., post-paid; by freight or express at purchaser's expense, pk., 75c.; bush., \$2; bag, \$2.50.

NEW EXTRA EARLY "THE BOVEE" One of the Earliest, and a Great Cropper

Not only is this one the earliest, but it takes a leading place among the heavy cropping varieties, an unusual thing among first earlies. The vine is dwarf and stocky, enabling it to be planted six inches closer than most other varieties, which results in a much larger return per acre. It sizes up to a marketable size more evenly than any Potato we ever saw; the whole crop being merchantable and the quality perfect. It is apt to prove disappointing on poor soil or with poor cultivation, as it sets so freely the tubers are apt to be small. But well fertilized and cultivated, no early Potato compares with it. Price, per lb., 20c.; 3 lbs., 50c., post-paid; pk., 40c.; bag, \$2. By express at purchaser's expense.

LIGHTNING EXPRESS Extra Early and a Heavy Yielder. Great claims have been made for this potato from reliable sources as to earliness and yield. It is said to be a week earlier than the "Early Norther."

compact in the hill, with very few small ones, almost every one being of marketable size the eyes are very shallow and the surface is smooth and regular. It is easily cultivated, the vine being strong and erect. Its exceptionally fine quality makes it an excellent variety for the table, and its earliness renders it a very profitable potato for the market. Price, 1 lb., 20c.; 3 lbs., 50c., post-paid; pk., 40c.; bush., \$1.50.

By express at purchaser's expense.

EARLY OHIO (True Stock,)

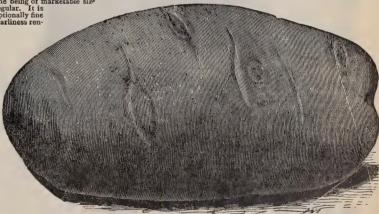

We have a limited supply of this splendid sort, which is too well known to require description. Per bag, \$1.75.

GEM OF AROOSTOOK

A robust, healthy grower, of excellent quality for table use, either baked or boiled; is dry, floury and white. For handsome tubers and large yield it is nor surpassed. The shape is well shown in the engraving. Potatoes color differently in different soils and localities, and this one came pure amber color the past season in one locality and pink in another, where it was sent for trial. We recommend this as the best second early. Price, per lb., 20c.; 3 lbs., 50c., post-paid; peck, 50c.; bag, \$2. By express at purchaser's expense.

TUMBO OR MAMMOTH PUMPKIN

GEM OF AROOSTOOK

PARSLEY

Parsley succeeds best in rich, mellow soil. The seeds germinate very slowly. It should be sown early in spring, previously soaking the seed for a few hours in tepid water. Sow thickly in rows a foot apart, and half an inch deep. For winter use protect in a frame or light cellar.

Parsley, Champion, Moss Curled. Very select stock, leaves crimped and curled; very fine for garnissing. Lb. \$1; ½ 10, 35c.; oz., 15c.; pkt., 5c.

—Fine Triple Curled. A fine dwarfish curled variety, hardy and slow in running to seed. Lb., 75c.; ½ 10., 25c.; oz., 10c.; pkt., 5c.

PUMPKINS FR., Potivon; GER., Kuberis.

PUMPKINS FR., Potivon; GER., Kuberis.
One ounce will plant 15 hills; 1½ pounds for an acre.
These are easily grown and profitable for stock feeding. At time of corn planting scatter a few seeds in the bills, or for a large crop sow in May, in good warm soil, in hills 10 to 12 feet apart each way.
Pumpkin, Japanese Pie. Crook-necked variety, with extremely small seed cavity; nearly all solid meat; quality extra fine; productive; ripens early; medium size; good keeper. Lb., \$1; 1b., 30c.; oz., 15c.; pkt., 5c.
Jumbo, or Mammoth King. This is the variety to be grown when the "biggest pumpkin" is wanted. The color of skin is a deep yellow, the flesh being of a lighter shade, somewhat resembling a squash. Per 1 b., 5c.; oz., 25c.; pkt., 10c.
Grey Mammoth. A French variety; grows to an enormous size, frequently roo to 150 pounds, specimens have weighed 200 pounds; used mainly for stock feeding; oblong in shape, of a greyish colored rind and very large seeds. Per lb., \$17; \frac{1}{2}\$ lb., 50c.; oz., 20c.; pkt., 10c.
Large Cheese, or Kentucky. One of the best for table use; productive; skin, orange; flesh, yellow and sweet. Per lb., \$0c.; de.; de.; oz., 10c.; pkt., 5c.
Nantucket, or Negro. Small dark shell, warted; fine flavor; the variety from which the old-fashioned pumpkin pies were made. Per lb., \$1; \frac{1}{2}\$ lb., 30c.; oz., 10c.; pkt., 5c.
Sweet, or Sugar. Small, but fine grain and very sweet. Per lb., \$1; \frac{1}{2}\$ lb., 5c.
Connecticut Field. Very productive; largely grown for feeding stock. Lb. 25c; \frac{1}{2}\$ lb., 10c.; pkt., 5c.

GER., Rettig, oder Radischen. FR., Padis, Rave Petite et Tongue,

Radishes thrive best in light, rich, mellow soil, and to bring out their mild qualities they must make a quick and tender growth. Sow for very early use in hot-beds during the winter and early spring, or later on in sheltered borders, in well-manured, deeply-dug, finely-raked soil; if not well stimulated into a rapid growth they become fibrous and tough; sow in drills ro inches apart, and thin to 2 inches in the rows. Sow at intervals of two or three weeks until September for a succession. Sow winter varieties in July and August, like the turnip, they make the best growth in autumn, and must be taken out before severe frost, and stored away in a cool cellar in sand, or a pit, where they will keep tender and crisp all winter; before using put in cold water, which adds to their freshness.

EARLY ROUND, OR TURNIP SHAPED

EARLY ROUND, OR TURNIP SHAPED

ish, Earliest Deep Scarlet Turnip, White Tip. (Forcing or rapid appraance to the bunches when ready for market, the tradishes are ready to pull 15 to 20 days after sowing. Per lb., \$1.00; \(\frac{1}{2}\) lb., 30c.; oz., 15c.; pkt., 5c. arry Scarlet Turnip, White Tip. (Forcing), same as above, only not so deep in color. Per lb., \$1.00; \(\frac{1}{2}\) lb., 30c.; oz., 15c.; pkt., 5c.

Early Scarlet Turnip. White Tip. (Forcing), same as above, only not so deep in color. Per lb., \$1.00; \(\frac{1}{2}\) lb., 30c.; oz., 15c.; pkt., 5c.

Early Scarlet Turnip. Very early; in great demand for home use; small, round, with short top Per lb., 75c.; \(\frac{1}{2}\) lb., 25c; oz., 16c.; pkt., 5c.

Parly White Turnip. Very early; in great demand for home use; small, round, with short top Per lb., 75c.; \(\frac{1}{2}\) lb., 25c; oz., 16c.; pkt., 5c.

WHITE

TIPPED

Early White Turnip. Pure white, with small top; flesh pure white and semi-transparent. Per lb., 75c.; 4 lb., 25c.; oz., 10c.; pkt., 5c.

Non Plus Ultra. One of the best forcing Radishes in cultivation. Roots small, round, deep scarlet, crisp and tender; with a white flesh. Per lb., 90c.; 1 lb., 30c.; oz., 15c.; pkt., 5c.

EARLY OLIVE-SHAPED

Olive-Shaped Earliest, Deep Scarlet, White Tip. (Forcing). Mild and tender, and one of the best for forcing; oval form, scarlet, tipped with white. Per lb., \$1.00; 1/2, 10.30c.; oz., 15c.; pkt., 5c.

French Breakfast or Scarlet, Olive-Shaped, White-Tipped. Of quick growth, mild and tender, one of the best for forcing; oval form, scarlet, tipped with white. Per lb., 90c.; 1/2 lb., 30c.; oz., 15c.; pkt., 5c. Barly Scarlet, Olive-Shaped. In the form of an olive, terminating in a very slim tap-root. Skin soarlet; neck small, flesh rose-colored, tender and excellent; early and tal adapted for forcing or general crop. Per lb., 75c; 1/2 lb., 26c; 20x., 10c; pkt., 5c.

Early White Olive-Shaped. Like the olive-shaped varieties in everything except color. Per lb., 75c., ¼ lb., 25c.; oz., 10c.; pkt., 5c. SCARLET OLIVE

CHARTIER

TURNIP' SCARLET TURNIP

LONG EARLY AND SUMMER Early Long Scarlet Short Top, The leading out-door quick growing variety; grown in rich, light soil; its average length is about eight inches; grows half out of the ground, streight, uniform in color, brittle and crisp; bright scarlet; small tops. Per lb., 75c.; ½ lb., 25c.; oz., 10c.; pkt., 5c.

Wood's Early Frame. Ten days earlier than the long scarlet; an excellent variety for forcing. Per lb., 75c.; ½

Dearl Forcing. The color is pearl white, with wary appearance, and the texture and attractive sort. Color of the top is scarlet-rose, shading into a pure wary white at the tip. Attains a large size before it becomes unfit for the table; undoubtedly the best all seasons radish for the open ground. Ready for use or market nearly lase and yas Long Scarlet Short Top, and keeps crisp and tender. Planted late is makes a good winter keeper. Per lb., 90c.; ½ lb., 30c.; oz., 15c.; pkt., 5c.

The color is pearl white, with wary appearance, and the texture is very firm and solid. It is about a week later than Wood's Early Frame, but after they are ready for marketing they remain in eatable condition fully two weeks as early as Long Scarlet Short Top, and keeps crisp and tender. Planted late is makes a good winter keeper. Per lb., 90c.; ½ lb., 30c.; oz., 15c.; pkt., 5c.

The color is pearl white, with wary appearance, and the texture is very firm and solid. It is about a week later than Wood's Early Frame, but after they are ready for marketing they remain in eatable condition fully two weeks as early as Long Scarlet Short Top, and keeps crisp and tender. Planted late is sort, for forcing or open ground. Per lb., 90c.; ½ lb., 30c.; oz., 15c.; pkt., 5c.

The color is pearl white, with wary appearance, and the texture is very firm and solid. It is about a week later than Wood's Early Frame, but after they are ready for marketing they remain in eatable condition fully two weeks as early as Long Scarlet Short Top, and keeps crisp and tender. WINTER VARIETIES

Sown in summer and used in the fall, or put away same as turnips. For winter use store in the cellar.

California Mammoth White. Grown extensively in California; 8 to 12 inches long, 2 to 3 inches in diameter; white; solid; good flavor. Per lb., 90c.; ½ lb., 30c.; oz., 15c.; pkt., 5.

Rose, or Scarlet China. Certainly one of the best, and would be grown generally by radish growers if better known. Per lb., 75c.; ½ lb., 25c.; oz., 10c.; pkt., 5c.

Long Black Spanish. The popular winter sort. Per lb., 60c.; ½ lb., 20c.; oz., 10c.; pkt., 5c.

Round Black Spanish. Like the above, except in shape. Per lb., 60c.; ½ lb., 20c.; oz., 10c.; pkt., 5c.

Chinese White. Stump rooted, very like Nantes Carrot; 6 inches long; fine for winter. Per lb., \$1.75; ½ lb., 60c.; oz., 20c.; pkt., 5c.

ENCH BREAKFAST

20c.; pkt., 5

MIXTURES OF RADISHES

Summer Radishes Mixed. For use in family gardens we offer a mixture of seed of all the summer varieties. Per lb., 90c.; 2 lb., 30c.; oz., 15c.; pkt., 5.

Winter Radishes, Mixed. Seed of the best white, black and rose skinned varieties for autumn and winter use. Per lb., \$1; \(\frac{1}{2} \) lb., 30c.; oz., 15c.; pkt., 5c.

RHUBARB FR., Rhubarbe; GER., Rhabarber.

Sow in drills an inch deep, and thin out the plants to six inches apart. In the fall transplant the young plants into very highly manured soil, setting them three feet apart each way, and give a dressing of coarse manure every fall. The stalks should not be plucked until the third year, and the plant never allowed to exhaust itself by running to seed.

Rhubarb, Johnstoun's St. Martin. The finest and one of the earliest; an enormous size; the flavor is superior and requires less sugar than any other variety; color, delicate plnk, Oz., 25c.; pkt., 5c.

Myatt's Linnœus. A second early sort, with very long, thick stalks; deep green color; excellent flavor. Oz., 20c.; pkt., 5c.

Note of the dearliest; and the preceding; stalks red, thick, large, tender, of good quality.

Oz., 20c.; pkt., 5c.

Rhubarb Roots. Each, 15c.; 4 for 50c.; \$1.50 per doz., post-paid.

SPINACH FR., Epinard; GER, Spinat.

Sow in good rich soil, in drills one foot apart, covering the seed one inch deep, at intervals of two weeks from April to July. For winter use sow in August and protect with a covering of straw during cold weather. Sow 10z. to 100 feet of drill; 12 lbs. per acre.

Price, each, Ib., 30c.; 1/4 Ib., 20c.; oz., 10c.; pkt., 5c.

Spinach, Victoria. This grand spinach has shown on trial grounds a distinct improvement on any of the old sorts. The foliage is heavy, the broad, dark green leaves being of the true Savoy appearance and of the finest quality, but the most remarkable feature that will make it of special value, both for market and family gardens, is the fact that it was in prime condition from two to three weeks after all other varieties had run to seed.

Bloomsdale, Savoy-Leaved. The leaves are numerous, succulent, curled and wrinkled like a Savoy Cabbage. It produces a larger crop than the ordinary sorts, and is also the hardiest of all the varieties. Flanders. A large, broad-leaved, hardy variety, very productive, and good for either fall or spring sowing.

Round Thick Leaved Summer. Produces large, thick, dark green leaves, somewhat crumpled, and possesses the valuable quality of standing a long time.

Long Standing. An improved round-leaved strain of excellent merit, having all the good qualities of the ordinary sorts. It is especially desirable as it goes to seed much later than any other variety.

Monstrous Round-Leaved Viroflay. Resembling the preceding in shape of its leaves, but is of much larger size.

Prickly or Fall. One of the earliest, most generally used for fall sowing.

SQUASH FR., Courge.
The squashes are of tropical copiant them until the soil is quite warm, and all danger of frosts and cold rich soil; it is best to manure in the hill. Allow for the bush varieties from three to four feet each way, and for the running sorts six to eight feet. Eight or ten seeds should be sown in each hill, thinning out affer they have attained their rough leaves, leaving three of the strongest plants. One ounce for fifty hills; five or six pounds in hills for an acre.

out after they have attained their rough leaves, reaving tirree of the strongers plants. Strongers plants wills; five or six pounds in hills for an acre.

SUMMER VARIETIES

Price, each, ib., doc; ½ ib., 20c; oz., 10c.; pkt., 5c.

Squash, Golden Bush Scalloped. Deep orange color, grown for first crop, esteemed for earliness. White Bush Scalloped. Like the above except in color, which is a creamy white.

Summer Crookneck. One of the best summer squashes. Of dwarf bush, habit and exceedingly productive. Flesh greenish yellow, dry and of the most agreeable flavor found in squashes.

white Bush Scalloped. Like the above except in color, which is a creamy white,

Summer Crookneck. One of the best summer squashes. Of dwarf bushy habit and exceedingly
productive. Flesh greenish yellow, dry and of the most agreeable flavor found in squashes.

VEGETABLE MARROW

English Vegetable Marrow. Skin greenish yellow; flesh white, soft and of a rich flavor; quite
distinct. Perlb., \$1,25; ½ lb., 45c; oz., 15c; pkt., 5c

Long White Bush Marrow. Longer than preceding; creamy white; good quality. A profitable
market sort, Perlb., \$1,75; ½ lb., 66c; oz., 20c; pkt., 5c.

**Tailian Striped Marrow. Fruit slightly narrowed at stalk; skin smooth, dark green, striped
yellow or paler green; tender, delicately flavored. Per lb., \$1,75c; ½ lb., 60c; oz., 20c.; pkt., 5c.

AUTUMN AND WINTER SORTS

Squash. Mammoth Whale. This new squash produces the most magnificent mammoth squashes
we have ever seen. They are often three feet long, of a dark rich color, and sometimes weigh over one
undred pounds. Its greatest diameter is near the blossom end, and tapers from there to each end;
this peculiar form, together with its immense size, doubtless suggested the name Mammoth Whale. It is
very prolific; the vines are robust and hardy. The flesh is solid of excellent quality. It is a good winter keeper. Per oz., 30c; pkt., 10c.

Boston Marrow. A good, tender, rich variety, for fall and winter, very productive. Per lb., 70c.;
2 tb., 20c; oz., 10c; pkt., 5c.

Bush Marrow. A good tender, rich variety, for fall and winter, very productive. Per lb., 70c.;
2 tb., 20c; oz., 10c; pkt., 5c.

**Plet's Peak, 'o Sibley, The shell
is very thin, smooth and of a pale green
olor; flesh solid, thick, bright orange color,
with a delicate; rich flavor.

**Per lb., 81c.; † lb., 25c; oz., 10c; pkt., 5c.

**Plet's Peak, 'o Sibley, The shell
is very thin, smooth and of a pale green
color; flesh solid, thick, bright orange color,
with a delicate; rich flavor.

**Plet's Peak, 'o Sibley, The shell
is very thin, smooth and of a pale green
of the to

plet. 5c.

Red, or Golden Hubbard. A sport from
that old standard of excellence, the Hubbard; it is a perfect type of its parent except
in color, which is a bright deep orange-yellow;
flesh, deep golden-yellow, much richer color
than Hubbard, fine grained, cooks very dry,
and of excellent flavor. Its keeping qualities
are fully equal to, while in productiveness it
excels, the old variety. Its superior keeping
qualities, combined with its sweet, rich flavor,
attractive color and shape, are bound to make
it a popular fall and winter variety. Per lb.,
\$1.20; \(\frac{1}{2} \) lb, 40c.; oz., 15c.; pkt., 5c.

SQUASH, LONG WHITE BUSH MARROW SALSIFY OR VEGETABLE OYSTER MAMMOTH WHALE SQUASH

The Salsify is one of the most delicious and nutritious of vegetables, and should be more generally cultivated for use in winter, when the supply of really good vegetables is so limited. It has a grassy top, and a long, white tapering root, nearly resembling a small parsnip. It closely assimilates to the taste and flavor of the oyster when properly cooked, and is a good substitute for it; very wholesome and nutritious. The roots are either boiled or mashed and made into fritters, in which form they are delicious.

Salsify, Long White. The well known standard wrietly. Per lb., \$1.25; \dark lb., 40c.; oz., 15c.; pkt., 5c.

Sandwich Island Mammoth. Of extra large size, and fully equal in quality to the popular old variety mentioned above. Per lb., \$1.75; \dark lb., 60c.; oz., 20c.; pkt., 5c.

We prepay postage on all Seeds, Bulbs and Plants, except where noted, and guarantee safe delivery,

TOMA

FR., Tormate; GER., Liebesapfel.

1 oz. for 1,500 plants; 1 lb. (to transplant) for an acre.

Sow seeds in the middle of March and April in the hot-bed, or in a box in a sunny place in the house. To make very healthy stocky plants they may be transplanted when about 2 or 3 inches high. When 5 or 6 inches high, if the ground has become warm, transplant to the open ground. Set the plants 4 feet apart.

Tomato, The True Ponderosa. This grand variety is the monster of the Tomato family, the tomatoes often weighing 2 to 3 lbs. each; of a rich, bright crimson color and all solid meat, exceptionally free from seeds. \(\frac{1}{2} \) lb. \(\frac{3}{2} \) lc. \(\frac{7}{2} \) New Erliana. Claimed by the originators to be the earliest tomato in existence. It is very handsome in appearance, very productive, of the finest quality and of a bright red color. Splendid for Market Garden Trade. \(\frac{1}{2} \) lb., 75c.;

-The Aristocrat. An excellent sort, resembling in the little of the color.

guality and of a bright red color. Splendid for Market Garden Trade. \(\frac{1}{2}\) lb., 75c.; 02., 25c.; pkt. 5c.

-The Aristocrat. An excellent sort, resembling in habit and growth and foliage the Dwarf Champion, but the color of the fruit is a fine, rich, glossy red. It is solid and smooth, and in size from medium to large. Valuable for forcing. \(\frac{1}{2}\) lb., \(\frac{0}{2}\) c.

-Buckeye State. A fine, new extra large Livingston sort, nearly one-half larger than Beauty, deep color, heavy, and of splendid quality. Lb., \(\frac{0}{2}\) c.

-Earliest of All (Steele, Briggs'.) This Tomato has sustained its claim for extra earliness, and we consider it the earliest Tomato in cultivation. The Tomatoes are of a rich, dark red color and are entirely free from core. The vines are most profusely loaded with fruit and continue to bear throughout the season. \(\frac{1}{2}\) lb., \(\frac{0}{2}\) c.; pkt., \(\frac{5}{2}\) c.

-Golden Queen or Sunrise. Smooth, solid and productive. Color a beautiful yellow; and there is none better for preserving. \(\frac{1}{2}\) lb., 70c.; oz., 25c; pkt., \(\frac{5}{2}\)c.

Livingston's Magnus. The form is perfect, uniform, large and attractive; flesh is very firm. It is a robust grower with short joints, settling its fruit clusters closer together than most varieties, and is therefore a heavy gropper. The fruit is very deep from stem to blossom end. It ripens evenly, does not card; about the stem, and the flavor is most desirable. Oz. 30c; pkt. 10.

Early Ruby. The earliest of all the large-sized Tomatoes, which combines good form, color and solidity; is certain to prove the leading market variety.

Dwarf Champion. Quite distinct in foliage and habit, compact and upright; fruits early and resembles the Acme. 1b., 75c; oz., 25c; pkt., 5c.

The New Stone. Ripens for main crop; is very large and of bright scarlet color; very smooth; ripening evenly to the stem without a crack; exceedingly solid and firm fleshed; is an excellent shipper; quality the very best.

Livingston's Royal Red. Bright scarlet, and the reddest throughout of any. Size, smoothness, productiveness and solidity will please the most fastidious.

Mayflower. This is one of the earliest large Tomatoes. Of splendid shape, perfectly smooth, of a bright red color, and ripens uniformly up to the stem.

Mikado, or Turner's Hybrid. Purplish red; good when well ripened; foliage distinct; generally quite smooth, ½ lb., 70c; oz., 25c; pkt., 5c.

Atlantic Prize. One of the earliest; not only ripens its first fruits, but a large proportion of the crop, earlier than any other sort; valuable to all with whom earliness is an object. The originator claims it to be much earlier than any other; valuable to all with whom earliness is an object. The originator claims it to be much earlier than any other; a beautifity symmetrical and meaty Tomato.

In symmetrical and meaty Tomato.

Imperial. Is highly recommended by leading growers.

Acme. Medium; red; smooth and very fine.

Matchless. Of a rich, cardinal red color; symmetrical in form; free from core; of large size; a good healthy grower.

Ignotum. Very prolific; earliest of the large red smooth sorts.

Conqueror. A very early sort, with medium sized fruit of finest flavor.

Beauty (Livingston's.) One of the best; round, smooth, and a glossy crimson slightly tinged with purple; solid, free from cracks and rot.

NEW ENORMOUS TOMATO

P-New Enormous. An exceptionally large, round, smooth, red variety, very meaty and a very heavy yielder. Resembles the Stone, but is very much arger. One of the best shippers grown, ½1b., 90c.; oz., 40c.; pkt., 10c. P-Plentiful. A splendid main crop sort, Fruits of good size, round, uniform and smooth. Color, deep red; heavy yielder, ½1b., \$1; oz. 40c.; pkt. 10c. P-Perfection. (Livingston's). Early, evenly large and very productive. P-Ravorite; (Livingston's). One of the handsomest; very smooth. P-Trophy. An old favorite, unsurpassed in flavor and productiveness. Honor Bright. Fruit when fully ripe is a rich bright red. Skin is nearly crack-proof; an enormous cropper. ½1b., 75c.; oz., 25c.; pkt., 5c.

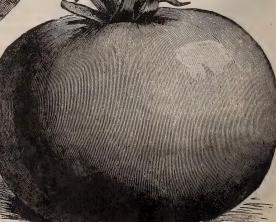

FANCY AND PRESERVING SORTS

Tomato, Purple Peach. Very distinct; fruit of uniform size, resembling a peach in shape, size and color, which is a deep orange rose, covered with a delicate bloom like a peach, the feash being of a rich and most delicious flavor.

a delicate bloom like a peach, the nesh being of a local series of the fruit has Per oz., 50c.; pkt., 5c.

- Strawberry, or Barbadoes Gooseberry. A distinct variety; the fruit has a juicy pulp of a pleasant strawberry-like flavor, with a certain degree of sweetness and acidity intermixed; with the assistance of lemon juice it is frequently preserved like plums. Per oz., 50c.; pkt., 10c.

- Pear-shaped, Yellow, Red Currant, Yellow Cherry, Red Cherry, Yellow Peach, Yellow Plum. Each, per oz., 50c.; pkt. 5c.

IMPERIAL.

Turnip, Extra Early Milan. Early, with purple top and strap leaf; mild and sweet Per lb., 80c.; ½ lb., 25c.; oz., 10c.; pkt., 5c.

Extra Early White Milan. As early as the Early Purple Top Milan, and possesses all of its good qualities. The entire bulb, inside and out, is clear ivorywhite in color; the outer surface is perfectly smooth. It grows so quickly that even the outer surface of the bulb is quite tender. Its table qualities are unequalled, being of most delicate flavor and tempting appearance. It will undoubtedly find a welcome in our markets, as, in addition to the heavy crop assured by its adaptability or close planting, it will be found to be fit for use at least a week earlier than any other white writery in cultivation. Per lb., 90c.; ‡ hb., 25c.; oz., 10c.; pkt., 5c.

Early Snowball, or White Stone. A fine garden variety; globe shaped; medium size; firm texture. Per lb., 50c.; ½ lb., 20c.; oz., 10c.; pkt., 5c.

Large Amber Globe. One of the best varieties either for table use or for a field crop for stock. Flesh yellow, fine grained and sweet, color of skin yellow, with green top. Hardy, keeps well, a good cropper, and grows to a very large size. Per lb., 50c.; ½ lb., 20c.; oz., 10c.; pkt., 5c.

Large White Globe, Strap Leaf. Flesh white, firm and crisp; a very desirable early variety. Per lb., 50c.; † lb., 20c.; oz., 10c.; pkt., 5c. Lodden Ball, or Orange Jelly. Of excellent flavor; globe-shaped; bright yellow color; a superior table variety. Per lb., 50c.; † lb., 20c.; oz., 10c.; pkt., 5c. Red Top, Strap Leaf. Rapid grower and of mild flavor; the most popular variety for early use for the table. Per lb., 50c.; † lb., 20c.; oz., 10c.; pkt., 5c. White Six Weeks, or Nimble Dick. Very early; fine shape; small top and excellent flavor. Per lb., 50c.; † lb., 20c.; oz., 10c.; pkt., 5c. Sweet German. Should be sown a month earlier than flat Turnips. The flesh is white, hard, firm and sweet, and keeps well. Per lb., 50c.; † lb., 20c.; oz., 10c.; oz., 10c.; pkt., 5c.

10c., p.c., 5c. Early White Flat Dutch, Strap Leaved. Roots medium size, flat; color white; sweet and tender. It is desirable for table use. Per lb., 50c.; 2 lb., 20c.; oz.,

Tobacco, the seed should be sown as early as possible after the danger of frost is over. A good plan is to burn a quantity of brush and rubbish in the spring on the ground intended for the seed bed; then dig, and thoroughly pulverize the earth and mix with the ashes, after which the seed may be sown and covered very lightly. When the plants are about six inches high transplant into rows six feet apart each way, and Tobacco, Connecticut Seed Leaf. This is an old and well tried variety; produces immensely on good soil. Per oz., 25c.; pkt., 5c.

—Bradley Broadleaf. The popular variety for several types—noticeably manufacturing and cigars. Per oz., 36c.; pkt., 5c.

—General Grant. It produces leaves forty-four inches in length, and matures very far north. Per oz., 30c.; pkt., 5c.

—Improved White Burley. This is largely used in the manufacture of cigars where a light and colored wrapper is desirable. The leaf is light colored, very fine texture, Per oz., 40c.; pkt., 5c.

—Quesnelle. One of the best. Per oz., 25c.; pkt., 5c.

—Quesnelle. One of the best. Per oz., 25c.; pkt., 5c.

SWEET, POT AND MEDICINAL HERBS

No garden is complete without a few herbs for culinary and medicinal purposes, and care should be taken to harvest them properly. This should be done on a dry day, just before they come into full bloom, then dried quickly and packed closely, entirely excluded from the air. Sow in spring in shallow drills, one foot apart, and when well up thin out and transplant to a proper distance apart.

A size (Pimpinella Anissum) Used for cordial, garnishing and flavoring; the seeds have an agreeable, aromatic taste. Per oz., 20c.; pkt., 5c.

Balm (Melissa Officinalis). Principally used for making balm tea or balm wine for use in levers. Per oz., 25c.; pkt., 5c.

Basil, Sweet (Ocimum Basilicum). The leaves and tops of the shoots are used for highly seasoned dishes, soups, stews and sauces; a leaf or two is sometimes in troduced into salads. Per oz., 25c.; pkt., 5c.

Borage (Borago Officinalis). Much used in clarets and other drinks. An excellent bee plant. Per oz., 26c.; pkt., 5c.

Carraway (Casum Caruu). The seeds are used in confectionery and medicine; in spring the under leaves are sometimes put in soups. Per oz., 15c.; pkt., 5c.

Carraway (Casum Caruu). The seeds are used in confectionery and medicine; in spring the under leaves are sometimes put in soups. Per oz., 15c.; pkt., 5c.

Carraway (Casum Caruu). Used for garnishing, and the seeds are used by confectioners. Per oz., 15c.; pkt., 5c.

Dandellon, Improved Cabbaging. The improved variety makes one of the earliest and best greens in cultivation. Per oz., 50c.; pkt., 5c.

Dandellon, Improved Cabbaging. The improved variety makes one of the earliest and best greens in cultivation. Per oz., 50c.; pkt., 5c.

Dandellon, Improved Cabbaging. The leaves boiled enter into many fish sauces, and raw form a beautiful ornament. Per oz., 20c.; pkt., 5c.

Fennel (Anthum Fravoculum). The leaves boiled enter into many fish sauces, and raw form a beautiful ornament. Per oz., 20c.; pkt., 5c.

Horehound (Marrubium Vulgare). Principally used for cough remedy. Per oz., 20c.; pkt., 5c.

W

Wormwood (Artemesia Absinthium). Used for medicinal purposes; it is also beneficial to poultry, and should be planted in poultry grounds. Per oz., 25c.; pkt., 5c

OUR FAMOUS FARM SEEDS

TO INSURE A GOOD CROP USE OUR SEEDS

ROOT CROPS FOR FARM STOCK

A good crop of Field Roots is a source of profit to every grower; to attain such results, much time, expense and labor are required in the preparation, cultivation and attending the crop, but unless good seeds are used the labor is in vain, and disappointment the reward. It is inferior, cheap and unknown strains; the grower cannot afford such chance; the cordinary risk of an unfavorable season and contingencies over which he has no control is very great with any and all crops; the use of good seeds will save the double risk. Thousands of agriculturalists in the Dominion attest to the good quality of our seeds, and will use no other. We have a supply of the same good quality sufficient for thousands more. Our prices are right, and the facilities for every grower to obtain them are the most favorable.

them are the most tavorable.

AGRICULTURAL SEEDS BY MAIL.—Our postal arrangements enable us to forward parcels under five pounds in weight to any Post Office in the Dominion of Canada at four cents per pound. Prices quoted "by mail" include postage. When ordering in quantity for shipment by freight or express, please add sufficient to cover cost of bags, at the rate of twenty cents each. When this is omitted we require to reduce the quantity sent to cover the cost of packages, as profits would not allow such a discount. Note conditions of sale on page 1.

SUGAR BEET FOR STOCK FEEDING

The Sugar Beet is acknowledged to be the finest food for Milch Cows. It contains an immense amount of the most nutritious food, and imparts a richness and flavor to milk superior to any other variety of roots. They are easily grown and harvested, and keep well through winter. The ground intended for growing Sugar Beets should be manured in the fall preceding the seas on of crop; on freshly manured ground they are apt to be rooty should the season be dry. Prepare drills thirty inches apart as early in the spring as the ground can be worked, upon which sow from four to six pounds of seed per acre, covering about two inches deep. When harvesting care should be exercised to avoid bruising or breaking the roots. The following varieties are the best for stock feeding, but are not adapted for the production of Beet Root Sugar.

Steele, Briggs' Royal Giant Sugar Beet

A new and distinct type of Sugar Beet producing not only a "Royal" good crop, but roots of giant size and richest feeding quality. Upon our own grounds the past three seasons it gave a yield of nearly 55 tons of clean roots per acre, and 3% tons per acre more than the heaviest producers of other sorts on the list. They have a small, clean top, and are easily trimmed.

small, clean roots per acre, and 3½ small, clean top, and are easily trimmed. The roots are longer than Danish or any of the other varieties, heavy, even shaped, holding their size to the ground, when they gradually taper to a point; stand upright and three-fourths their length out of ground. They are so EASILY HARVESTED that they may be turned out by a push with the foot, free from small or prongy roots. The color of the roots is bronzy green nearest the top, the body a light green shaded, and changing to a bright rose above ground; the tip a lighter shade of rose. The flesh is white, solid, tender and very sweet, and imparts a rich, pleasant flavor to dairy products, when fed to mich cows. Our new "Royal Giant" is the heaviest cropping Sugar Beet known to us; the largest, hand-somest and cleanest roots, the most easily harvested and the most profitable Sugar Beet to grow that we have ever tried. It has fully realized all we claimed for it, and is now become the leading favorite variety. the leading favorite variety.

NOTE.—We supply "Royal Giant" Sugar Beet only in f lb. sealed packages as repre-sented in the adjoining cut. Price, lb., 30c., post-paid, 35c.

Steele, Briggs' Danish. Roots of medium length, shoulder broad with heavy body, gradually tapering to a clean point; grows half in the ground. Color, deep rose or red; flesh white, crisp and sugary; a heavy cropper and easily harvested. We offer a specially grown stock, and supplied in lb. sealed packages. Per lb., 30c., post-paid, 35c.

-RED TOP SUGAR. A standard variety of medium length, broad at shoulder and tapering to the point; a red shade of color above ground, rosered beneath. Flesh white, rich and sweet; a grand cattle-feeding sort, and a good crop producer. ½ lb., 10c.; lb., 20c., by mail, 25c.

WHITE GREEN TOP. Differs from the "Red Top Sugar" in being green above ground; white beneath, stands partly out of ground, very sweet, and an excellent producing sort. ½ (b. 10c; (b., 20c., by mail 25c.

SEED (LIMITED

CARROT VARIETIES

Sow seed in drills, eighteen to twenty-four inches apart, from middle of April to the first of June, and when about three inches high thin out from four to six inches apart. Carrots require deep, rich, loamy soil to produce heaviest crops, and should be prepared and manured in the fall preceding the carrot crop. Two or three pounds is the usual quantity per acre.

NOTE.—Our stock of Carrots is all clean-rubbed seed, and

Lb., 75c.; ½ lb., 40c.; ¼ lb., 20c.; oz., 10c.

STANDARD SORTS

STANDARD SORTS

Large White Belgian. Grows one-third out of the ground; roof pure white, green above ground, with small top; flesh rather coarse, but the roots on light, rich ground grow to a large size, and are extensively grown for stock feeding. Per ½ lb., 15c.; lb., 50c.; lby mail. 55c. lb.

Long Yellow or Orange Belgian. (Green Top). Not so heavy a cropper as the White Belgian, but of richer quality. Per ½ lb., 20c.; lb., 60c.; by mail. 65c.

White Vosges, or Giant. Produces a medium-sized root, very short, with heavy shoulder; pure white and of excellent quality; grows almost entirely underground, making it a little difficult to harvest. It is quite different in manner of growth and shape and yields less per acre than our "Improved Short White," for which in has been sold, but in no way to be compared to that variety. Per ½ lb., 20c.; lb., 70c.; by mail, 75c.

Long Orange or Red Surrey. A popular field variety, Long or quality, and tapers regularly to a point. Per ½ lb., 20c.; lb., 60c.; by mail, 55c.

Lames' Scarlet Intermediate.

Long Red Altringham. Bright red color and crisp; excellent for table. Per ½ lb., 20c.; lb., 60c.; by mail, 65c.

For a good crop of Mangels, select a deep rich loam. The heaviest crops are invariably grown upon laud which has been liberally manured and thoroughly cultivated Artificial manures applied at the rate of from 500 to 1,000 lbs. per acre, with the addition of 300 to 400 lbs. of salt, will increase the yield per acre to a very large and profit able extent. Sow any time from the middle of April to the end of May, in drills from 2 to 3 feet apart, covering the seed a uniform depth, and thin the plants to 12 to 15 inches in the row. The long varieties do best in a deep sandy loam; the round varieties the same, if possible, but the latter will succeed well on strong, stiff land,

Mangel, Glant Yellow Intermediate. A great improvement on Yellow Intermediate, of considerably larger size, growing more than half above the ground, Remarkably even in shape, rather elongated, of vigorous growth, and has a fine neck; flesh white, firm and sweet. We highly recommend this new variety, as it makes a magnificent root, is easily littled from the ground, produces enormous crops, and is an excellent keeper. ½ lb., 10c.; lb., 18c.; (by mail, postpaid 230).

Vellow Intermediate or Ovold. Same as above, but not as perfect in shape, \$\frac{1}{2}\text{ lb., 18c.; lb., 18c.; (by mail, post-paid, 23c.)}

Vellow Leviathan. Root long olive shaped, large, growing over one-half out of the ground; flesh white, sweet and tender; tops bright green, comparatively small; neck small, short. Fext to the Giant Yellow Intermediate, this is one of the best. Its fine flesh never becomes woody, and its roots grow so well out of the ground that the crop is easily harvested. ½ lb., 10c.; lb., 18c.; (by mail, post-paid, 23c).

Steele, Briggs' Prize Mammoth, or Ciant Long Red.

There is no other root crop grown which produces so large an amount per acreof desirable cattle food for winter feeding as the Prize Mammoth or Giant Long Red Mangel. Under high cultivation over 2,000 bushels per acre have been grown. To secure the best results good seed must be sown. Our strain of Mammoth Long Red is exceptionally fine and expressly grown for our own trade from selected well-shaped roots. Dealers and growers who have used it for years past prefer it to any other long red variety. Has a distinct appearance; roots are massive, straight and regular in size, broad shouldered, small top, free from coarseness and of most excellent feeding and keeping qualities. \(\frac{1}{2} \) b., \(10c \); (by mail, 23c).

—Mammoth Long Red, or Saw Log. A good variety. \(\frac{1}{4}\) lb., 10c.; lb., 18c.; (by mail, 23c).

-Long Red. (Selected Stock.) Roots of immense size; stands well out of

ground; color light red; flash white and rose, firm and crisp. Our stock is of superior quality. 1/2 lb., 10c.; lb., 18c.; (by mail, 23c).

-Red Globe. A large, round variety, of excellent quality, productive and a good keeper; color light red, fiesh white; better adapted to shallow soil than the long varieties.

† lb., 10c.; lb., 18c.; (by mail, post-paid, 23c).

Yellow Globe. (Select). Similar to Red Globe, except color; equally productive; color light yellow; handsome shape and good keeper. lb, 10c.; lb., 18c.; by mail, post-paid, 23c.)

Steele, Briggs' Ciant Yellow Oval. It is remarkably even in shape, rather elongated and of vigorous growth; it has a fine neck; large leaves with green stems and a very smooth, fine skin. The flesh is white, firm and sweet, greatly relished by cattle, easily lifted (growing more than half above the ground), producing an enormous crop, and is an excellent keeper. ½ lb., 10c.; lb., 20c.; (by mail, 25c.)

Golden Fleshed Tankard. Most nutritious variety in cultivation, roots large, ovoid, but filled out at top and bottom, terminating with a small tap root; flesh deep golden yellow, solid, crisp, sweet and rich; excels all others in milk producing qualities, and very productive. It has no superior as a keeper. We have known Mangels of this variety to be kept sound and crisp, and in full flavor until June. ½ lb., 10c.; lb., 20c.; (by mall, post-paid, 25c.)

Steele, Briggs' Giant Yellow Clobe. (New.) The Finest Yellow Globe in cultivation. Roots are of immense size, fine shape, single tap root and neat top. The fiesh being remarkably fine and fine grained, renders it an excellent keeping variety, \$10c. lb. 18c; (by mail, post-paid, 22c.)

Red Intermediate. Half long, of a somewhat oval shape, grows well out of ground, is easily harvested and well adapted to heavy soils; a good cropping variety; skin of a deep red color; fiesh firm, and a good keeper. 1/4 lb., 10c.; lb., 20c.; (by mail, 25c.)

ONE POUND *JEELE, BRIGGS, SEED ECTE 000 PURPLE TOP SWEDE TURNIP ONTO, ON SELECTED CATALOGUES FREE ON APPLICATION . SOLD IN SEALED PACKAGES

CWEDISH or RUTA BAGA TURNIPS

Sow from 2 to 3 pounds per acre in drills.

¼ and ½ lbs, post-paid, at prices quoted.
PURPLE TOP VARIETIES

SWEDE TURNIPS. THE STEELE, BRIGGS CO'S SELECTED PURPLE TOPS. Producing large, round, perfectly shaped bulbs, with very small top; flesh, rich yellow; firm, free from coarseness, and of excellent quality; skin yellow, with a deep purple top. A splendid keeping variety. There is no other sort which we have ever grown that yields a more uniform size and handsome crop, or that will produce a greater weight, if as much to the acre, which has been repeatedly proven on actual trials. It is a prize winner everywhere. The Turnip being one of the staple root crops of Canada, it has been our endeavor to obtain a variety of undoubted merit, and such that we could depend upon frow year to year. This variety has fully realized our expectations for the past ten years, and having become the universal favorite, with the leading root growers in Ontario, the demand has so increased as to require thousands of pounds annually to fill our orders. Sold only in sealed packets, as Illustrated. If your dealer does not keep it send direct to us. Price, ½1b., 10c.; ½1b., 15c.; lb., 25c.; (by mail, post-paid, 30c.)

Steele, Briggs' Jumbo (Extra select stock), A very large, handsome, tankard-shaped root, with small neck and top; color purplish flavor; stands well out of the ground, and is a giant compared with many varieties; a heavy cropper and a good winter keeping sort.

Sold only in the ground, and is a giant compared with many varieties; a heavy cropper and a good winter keeping sort.

STEELE, BRIGGS' PERFECTION

TURNIPS FOR FALL FEEDING

YELLOW AND WHITE FLESH VARIETIES

Sow 2 lbs. per acre in drills, or 4 to 6 lbs. broadcast

The following varieties are not so well adapted for late winter feeding as the Swede; being of larger and quicker growth, are coarser in texture and when kept too long in winter become spongy and lose their fine feeding qualities; but for fall and early winter feeding are grown with profit, producing a great bulk per acre, and may be sown much later in the season than the Swede varieties; Turnip, Aberdeen Yellow, Purple-Top. An excellent versety for early winter feeding, and deserves to be grown more generally. \(\frac{1}{4} \) lb., 10c.; lb., 25c. (by mail, 20c.)

-Aberdeen Yellow, or Bullock. Green Top. Similar in form and size to the preceding; the bulb is bright green above and yellow flesh. 10c.; lb., 5c. (by mail 30c).

the preceding; the bulb is bright green above and yellow nesh. 2 10., 10c.; 10., 25c. (by mail 30c).

Devonshire Greystone. A very useful kind of Turnip, which produces a immense crop, of excellent quality; it is of great value for feeding off early, and well adapted to late sowing, \$\frac{1}{2}\text{ b., 10c.}; \text{ b., 25c.} (by mail, 30c).

Purple Top Mammoth, or Improved Greystone. Produce a greater weight per acre in a given time than any other Turnip, and it will grow remarkably heavy crops on poor soils. Flesh very solid and nutritious. Fine shape, a certain cropper, and will stand the winter well if sown late in the season. \$\frac{1}{2}\text{ b., 10c.}; \text{ b., 25c.} (by mail, 30c).

Red Globe Norfolk. Medium sized; skin red where exposed to the sun, below ground white; should be fed early. \$\frac{1}{2}\text{ b., 10c.}; \text{ b., 25c.} (by mail, 30c.)

Pomeranian White Globe. Roots globular, large sized, adapted to early feeding, \$\frac{1}{2}\text{ b., 10c.}; \text{ b., 25c.} (by mail, 30c.)

Cow Horn. Matures very quickly; roots long, balf above ground; flesh white, fine grained. \$\frac{1}{2}\text{ b., 15c.}; \text{ b., 50c.} (by mail, 55c.)

Red Top, Strap Leaf. Early hardy, very prolific, of excellent quality. It so no of the best for late sowing. The bulbs are flat, smooth and regular in form; flesh clear, white and remarkably well flavored. \$\frac{1}{2}\text{ b., 10c.}; \text{ b., 50c.} (by mail, 55c.)

MAMMOTH RUSSIAN SUNFLOWER

The giant of all Sunflowers Growing to double the size of the common sunflower, and the yield of the seed is twice as great. One hundred and twenty-five bushels to the acre have been grown at less expense than corn. It is highly recommended for poultry; the best egg producing food known. The seed is good food for horses, and yields a fine quality of oil. The strong thick stalks are used for fuel. In fact there is no waste whatever, rolbs., \$1.00; r lb., 15c.; ½ lb., 10c.; pkt., 5c.; by mail, post-paid.

PURPLE TOP ARERDEEN YELLOW TURNIP.

WILD RICE

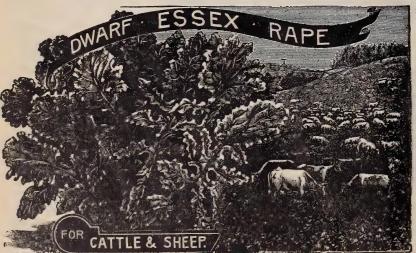

Wild Rice, Zizania. (For fall sowing.) The Zizania is valuable as a forage plant on inundated lands and along the shores of marshes. Cattle are fond of it when green, and it makes a good hay. As an attraction for wild fowl it is invaluable. In fish ponds and lakes it purifies the water and affords a refuge to the small fry from the large fish, and also furnishes them with food from the animalculæ on the stalks. The seed should be sown in the fall in six inches to six feet of water, having a soft mud bottom and where there are but few weeds. It commences to sprout in spring as soon as the water gets warm, and grows rapidly, ripening late in August and September, Per lb., 25c. (by mail, 30c.); rolbs. or over, 20c. per lb. (by mail 25c, per lb).

TEOSINTE

(Reana luxurians). Somewhat resembling corn in appearance, but the leaves are much longer and broader, and the stalks contain sweeter sap. In its perfection it produces a great number of shoots, growing as much as twelve feet high; very thickly covered with leaves, yielding such an abundance of foliage that one plant is considered sufficient to feed a pair of cattle for twenty-four hours. Eighty-five stalks have been grown from one seed, attaining a height of eleven feet. Horses and cattle eat it as freely as young sugar corn. About three pounds of seed will plant an acre. Price (by mail), post-paid, pkt, 5c; oz, 10c; ‡ lb., 30c; lb. \$1.

RAPE OR COLE

I to 2 lbs. per acre in drills; 4 to 6 lbs. broadcast.

to 6 lbs. broadcast.

English Sowing Rape, or "Dwarf Essex" Rape, is becoming more generally sown each succeeding year, and is one of the most easily grown and useful soiling crops we have. A field of Rape coming into use when the pasture is almost barren from continuous feeding and dry weather, is a boon to the farm. For feeding sheep and lambs, preparatory for the market, nothing is better, not only does it fatten quickly, but imparts a quality to the flesh superior to almost any other pasture. It has been estimated that one acre of Rape, when not preceded by any other crop the same season, will feed from thirty-five to forty lambs for two months, and that the gain in flesh per month was fromeight to twelve and one-half pounds on each lamb. Young cattle thrive on it as well as swine. Rape may be sown either in rows or drills and cultivated or sown broadcast. When sown in rows the plant will grow much stronger and more luxriant in foliage, and will also stand longer feeding as it is less liable to be tramped down. It may be sown in May, and when it is sufficiently advanced it can befed off, and then allowed to grow up again, thus giving a second crop the same season; but the usual time for sowing is the last half of June until the end of July, and it has been sown towards the end of August with success. As it will stand late sowing it can be sown after a Rye or Barley crop. The cultivation of Rape should commence as soon as it is well started, and with repeated cultivation until the leaves become too large to work between the rows. Poor soil is often sown with Rape and plowed under as a fertilizing crop, for which purpose few, if any other crop, is better. THE MOST PROFITABLE VARIETIES TO GROW

The following prices are f.o.b. Toronto, subject to market changes cash with order. Cotton Bags 20c. each extra.

Corn by mail: Any variety sent post-paid, 1 lb. for 15c., 2 lbs. 25c., 8 lbs. 90c.

CLOUD'S EARLY YELLOW DENT

Early, strong and vigorous, growing from 8 to 10 feet high, producing large, hand-some ears with unusually deep grain. The Guelph Agricultural College reports it "among the heaviest yielding varieties of those tested for six years." It is the earliest of all the heavy varieties, and produces a large amount of ears per acre, the average weight for six years being 3.21 tons, and for the whole crop 19.51 tons per acre. ½ bush., 55c.; bush., 51.

A fine early Yellow Dent Variety; ears of good size, cobs red and small, with large deep grains; a strong grower, and produces well on light and heavy land, where other varieties of Yellow Dent will not thrive. It has given great satisfaction the past two years. While not ripening in all sections, the ears arrive at a firm dough state at time for cutting, and make fine silage. The average weight of ears is 3 tons per acre. 1/2 bush., 50c.; bush., 90c.

MAMMOTH CUBAN YELLOW DENT

The beginning are reducing corn upon our lists and grows engrouse grows of expel-

The heaviest ear-producing corn upon our list; and grows enormous crops of excellent fodder. With a favorable season it will form parching ears throughout central Ontario. Ears very large, grain yellow, dented, the average yield of ears being 3.51 tons per acre as reported by Guelph Agricultural College. ½ bush., 55c.; bush., \$1.

WHITE CAP YELLOW DENT

A new variety, originated and introduced by Mr. Clark, of Ohio, one of the most famous corn growers of the United States. He claims for it the largest cropping variety upon the market; stands drought well, crops well on poor land; ears large, handsome and well filled; the tips of the grain are white, the inside yellow, thus giving it a beautiful color. One grower in Western Ontario reports having harvested the largest and finest crop he has ever grown. ½ bush., 45c.; bush., 80c.

GIANT PROLIFIC SWEET ENSILAGE

One of the most extensively grown varieties of Ensilage or Fodder Corn used in Canada. As a green fodder, dry, cured, or prepared as Ensilage, it is in the highest favor throughout the Dominion. The stalks are sweet, juicy, tender and covered with long, broad leaves. On strong soil will grow from 12 to 16 feet high. More fodder can be produced from an acre than from any other variety we have grown, and when well cured is quite equal to hay. Beef can be made cheaper by feeding it than with hay; it will increase the milk and cream production fully 10 per cent, as well as furnish cheap and acceptable food for the winter. As a green food for cutting in the latter part of the summer, one are is worth eight acres of ordinary pasture. Per bush, 90c.; ½ bush, 50c.; 5 bush, lots and up, 85c.

RED COB ENSILAGE

An old favorite variety, yielding very large crops of excellent fodder. Ears large, cob small and red, grains large, deep and white, indented. A heavy yielder on some soils. Per bush., 90c.; 5 bush. lots and up, 85c. per bush.

HORSE-TOOTH OR YELLOW DENT

Well known everywhere, but much inferior to many of the more recently introduced sorts, both as to yield and quality of the product. Per bush., 90c.; 5 bush. lots and up, 85c.

FLINT VARIETIES

Corn, Compton's Early Yellow Flint Very extensively used for ensilage and for ag an producing crop. While not giving as heavy a green crop as many others, it is especially valuable for the quantity and quality of ears produced, and makes a rich, palatable food when cured as sitage. Its extreme earliness adapts it to eastern and northern Ontario, where it is a lavorite sort. Ripens well, yielding an average of 3.32 tons of ears per acre. ½ bush., 50c.; bush., 90c.

Longfellow Yellow Flint. One of the favorite varieties in eastern and northern Ontario. Grows quickly and fully ripens in nearly every section of the province. To grow as a fodder corn, or for the grain, it is one of the very best. Ears long, bright golden yellow grain, smooth and very hard. None better for grinding. ½ bush., 50c.; bush., 90c.

—Large White Flint. Ears long pearly white, and of a beautiful appearance. ½ bush., 50c.; bush., 90c.

LATHYRUS SYLVESTRIS OF FLAT PEA

This new forage plant is truly an agricultural wonder. Two cuttings may be made in one season, and a vast amount of rich hay can be secured from a comparatively small area. It affords an excellent pasturage also, as it produces heavily of fodder. The mature plants root 20 feet deep, ensuling them to stand the severest drouths and extreme cold. It starts earlier in the spring than Alfalfa and continues later in the fall. It lasts 50 years without reseeding. On very poor, unimproved, sandy soil it makes a top growth of to 8 inches and a root growth of 12 to 15 inches the first year. On sandy soil that has been cultivated it does much better. It grows slowly at first and needs care to keep down the weeds. Pkt., 10c.; ½ lb., 50c.; lb., \$1.75, post-paid.

EARLY AMBER SUGAR CANE

Well known in many parts of Canada. We have seen magnificent crops, and it should be more generally grown, as it makes a valuable green cutting crop, which is relished by all kinds of stock. Usually grows from ten to twelve feet high, stands up well, produces small, tender, sweet and juicy stalks, well covered with leaves. When allowed to ripen the seed is valuable for poultry. Price, by mail, post-paid, pkt., 5c.; lb., 15c.; 3 lbs. for 40c.

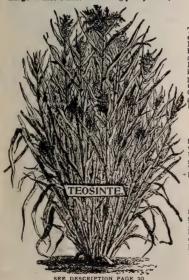

JERUSALEM CORN

This corn belongs to the non-saccharine sorghums, and comes from the arid plains of Palestine. It is pronounced the best and surest grain crop for dry countries and seasons, even superior to Dhoura or Milo Maize. It grows about three feet high, makes one large head on main stalk, and several smaller heads on side shoots, even as many as eight heads on a single stalk. The grains are pure white and nearly flat. Three pounds will plant an acre. Price, by mail, post-paid, per pkt., 5c.; lb., 15c; 3 lbs. for 40c.

When comparing prices please keep in mind that we send out only the best selected seed.

SIANT PROLIFIC SWEET ENSILAGE CORN

DOM TO DODGO

This is undoubtedly the leading black out of the day. It is extremely hardy, grows with vigor and rapidity, stands well, and adapts itself to almost any soil. It is the darkest of the black varieties, a sure and heavy yielder, and large and plump in the grain. Its thin hull makes it a valuable feeding out, and is also an avantage in seeding, allowing it to germinate quickly. The fact of this variety having been grown for the past forty years and still being in the lead is the strongest recommendation we can give it. Our seed is grown from imported stock. Price per lb., 15c.; 4 ibs., 50c. post-paid; bush., 85c.; 5 bushel lots and over, 80c. per bush. Bags, 20c. each extra.

SANDVETCH OR VICIA VILOSA

SELECTED AND RECLEANED SEED GR

Please Read This

We devote special care to the selection of Seed Grain, and our custemers may rest
assured that every effort has been made to supply the best varieties and finest samples
of Seed Grain that it is possible to obtain. The grain is thoroughy cleaned over our
chasers when desired.

Seed Grain stade.

We shall be pleased to send samples to intending pur-

Seed Grain is always quoted and sold free on cars, Toronto, the purchaser to pay transportation charges on arrival. We quote pound prices (post-paid), for the benefit of those desiring small quantities. Good cotton bags are supplied at 20c. each. Prices quoted are subject to fluctuations of market.

BARLEY

Barley. Mandscheurl, An early six-rowed variety, very strong strawed and stools well, bearing large well-filled heads of beautiful grain, possessing malting qualities of a high order and adapting itself readily to a great variety of soils. It has occupied first place at the O.A.C., Guelph, for some time, having given an average yield of over 60 bushels per acre. We offer specially grown seed from the genuine imported stock, thoroughly cleaned. Per lb. 15c; 5 lbs. 50c. (post-paid); per bush., 85c.; in 5 bush. lots and upwards, 80c. per bush.

80c. per bush.

Soc. per bush.

Black Hulless.

The grain of this Barley closely resembles that of the wheat or rye except in color. Its standard weight is the same as that of wheat; 60 lbs. per measured bushel, but is frequently exceed shis weight. This variety stands at the head of the list of hulless varieties in yield of grain per acre. Its splendid yield, heavy weight, and good feeding quality, make it a most valuable variety. On account of its superior feeding qualities we would recommend those who are troubled by the pea bug to use this variety as a substitute for peas.

Per lb, 15c.; 5 lbs., 50c. (post-paid); per bush. of 60 lbs.

Sl. 10; in 5 bush. lots and up, Sl per bush.

Mite Hulless.

Yields well on poor soils is easily grown, and is an excellent food for hogs, cattle and poultry.

making better pork than corn, the straw making good hay. It should be sown a week earlier than ordinary barley, and at the rate of 1/½ bushels per acre (60 pounds per bushel).

Pluckbill Two-Rowed. A variety of merit, succeeding well on most soils. Per bush, 90c.; five bushel lots and upwards, 81.15 per bush.

DDAC Whether for fodder. in mixture with oats. sown at the cate of two bushels.

-Duckbill Two-Rowed. A variety of merit, succeeding well on most soils, see, new soils, such that see the per acre, or the Peas sown alone at PEAS. Whether for fodder, in mixture with oats, sown at the rate of two bushels each per acre, or the Peas sown alone at PEAS. Whether for fodder, in mixture with oats, sown at the rate of two bushels each per acre, or the Peas sown alone at a row or the rate of three bushels per acre for plowing under, there is no crop that we can so strongly recommend for more extended culture. Like all leguminous crops, Peas have the power of extracting nitrogen from the air, and the soil from which a crop of peas has been harvested is richer in nitrogen than before the peas were sown upon it, and there is no kind of live stock on the farm to which peas and oats in mixture cannot be fed with positive advantage.

-Dwarf White Marrowfat. Hardy, strong and vigorous, broad, thick, leathery pods borne near the top of the vine, containing four to five large peas good substance and flavor, but not so sweet as wrinkled sorts. Seed large, round, white, slightly oval; height 3½ feet Per lb., 15c; 4 lbs., 50c. post-paid, per bush., \$1.25: in 5 bush lots and over, \$1.20

-Black Eve Marrowfat. While growing resembling

BUCKWHEAT

Carefully Recleaned

Buckwheat, Japanese. Enormously productive; the kernels are nearly twice the size of any other variety, and of a distinct shape; the color is a rich dark brown; very heavy straw, branches more and does not need to be sown as thickly as other sorts. Per lb., 15c.; 5 lbs., 50c.; (post-paid); per bush., of 48 lbs., \$1; in 5 bush. lots, 90c. per bush.

90c. per bush.

-Silver Hull. Superior to the common variety; in bloom longer; matures sooner and yields much more per acre; thin husk and of a silvery grey color. Per lb., 15c.; 5 lbs. for 50c. (post-paid); per bush., 90c.; in 5 bush. lots, 85c. per bush.

-Common Grey Varlety. Excellent for plowing under. Lb, 15c.; 5 lbs. 50c. (post-paid); per bush., 90c.; in 5 bush. lots, 85c. per bush.

FLAX

Sow as soon as danger from frost is past, and early enough to secure the early rains. A fair average quantity of seed to be sown on an acre is one-half bush, when cultivated for seed; if for the fibre, a larger quantity should be sown. Cut before quite ripe.

Plax, Cholce Screened, for seeding; 4 lbs., 50c. (by mail, post-paid); per bush, of 56 lbs., \$2.25.

-Prime, for feeding, Per bush., \$2.00; in 5 bush. lots and over, \$1.90 per bush.

RYE

There are two varieties of Rye—the Fall Sowing and the Spring Sowing varieties. Fall Rye can be sown from the middle of August to the end of September; the Spring varieties as soon in spring as the ground is warm and in good working condition. If the crop is cut before fully ripe the grain makes better flour and more in quantity, but if intended for seed it should be fully ripe before harvesting. Rye makes an excellent green crop cut for early spring feeding. Sow from one and a half to two bushels per acre.

Spring Rye. Per lb., 15c.; 4 lbs., 50c. (post-paid); per bush., \$1.00; in 5 bush. lots and over, 95c. per bush

WHITE HULLESS BARLEY.

TARES OR VETCHES A specie of the Pea which is grown to a considerable extent with Oats, which assist in keeping the growing crop upright, besides increasing the quantity and quality of feed. -Black. Per lb., 15c.; 4 lbs., 50c. (post-paid); per bush., \$1.50.

Sandvetch, Vicia Vilosa. The Sandvetch prospers in the most barren soils, even in those too poor to grow the winter tare. Six tons per acre of green; foliage have been harvested in one cut in poor silicious soils, with a second cut for seed or plowing in green. Sow end of August, alone or together with a cereal, rye preferred, because this Vetch, reaching a length of 34 to 5 feet, must have a support, otherwise it would lay down and deteriorate quality and yield. To the acre sow 65 to 85 pounds, Can stand any frost. This Vetch is eaten by all farm animals without it being necessary to add any condiments. Lb., 35c.; 3 lbs. for 90c. (post-paid).

SPRING WHEAT —Colorado. Per bush. \$1.20; in 5 bush. lots and over, \$1.10 per bush.

—Red Fife, White Fife, White Russian, Wild Goose. These four varieties, per bush, \$1.20; in 5 bush. lots and over, \$1.10 per bush.

FALL WHEAT Descriptive list will be issued about the 15th of August, and sent free to all who apply. Ask for it.

TERMS.—All Seed Grain, Clovers, Timothy and Grasses are sold on very close margins and for spot cash; a remittance for full amount must accompany all orders, and 20c. each for bags included.

We do not pay freight or send goods C. O. D.

cled sorts. Seed large, round, white, slightly oval; height and over, \$1.20

—Black Bye Marrowfat. While growing resembling closely the preceding, but the mature seed having a distinct black eye. Per lb., 15c.; 4 lbs., 50c. (post-paid); per bush., \$1.25; in 5 bush. lots and over, \$1.20 per bush.
—Prusslan Blue. A very popular variety, one of the heaviest yielding and best strawed peas known, very early. Per lb., 15c.; 4 lbs., 50c. (post-paid); per bush., \$1.25; in 5 bush. lots and over, \$1.20 per bush.
—Canadian Beauty. A variety of White Marrow, Which in most sections has given splendid results. The seed is large, and of a bright color, straw strong, but not course and of good quality. An enormous yielder, and one of the most profitable sorts grown. Per bush. \$1.25; 5 bush. lots and upwards, \$1.20.
—Egyptian Mummy. This variety has given excellent results in many sections of the country. A great improvement on the old Crown pea. It is much larger, more prolific, and with a stronger and better straw. It ripens about the same time as the Marrow-fat, and bearing its pods, as it does on the top of the vine, it is freer from mildew, and in consequence, a most profitable sort to grow. Per bush, \$1.20; 5 bush. lots and upwards, \$1.15.
—Grass Pea. This can be successfully grown in sections of the country where bugs destroy the ordinary sorts, as it effectually withstands the onslaughts of this insect. The shape of the pea is nearly triangular, and is about the size of the Golden-Vine. It is claimed to be equal to the ordinary varieties for feeding purposes. The vine is not quite as large as that of the ordinary sorts. Frice per bush, \$1.10; 5 bush. lots and over, \$1 per bush.
—Golden Vine. A standard sort, not much troubled by buss. Per lb., 15c.; 4 lbs., 50c. (post-paid); per bush.

SPELTZ GERMAN, Emmer.

A WONDERFUL GRAIN FROM RUSSIA.

A WONDERFUL GRAIN FROM RUSSIA.

Speltz Is a species of wheat and is splendid for dry and poor soil. It has been grown extensively in Dakota, where it has given fairly good results, and has also been grown with fair success in our North-West, and while it is undoubtedly valuable for milling purposes, its present use will be for feeding hogs and cattle, for which purpose it is very superior. It is also splendid for green pasture, and when dried and used as hay, it is relished by cattle equally as well as hay. Prof. Sheppard, at the North Dakota station, says: "We have grown Speltz here for several years, and have obtained very good results indeed as to yield and drought resistance. Last year (1900) it suffered somewhat on the high land, but on the lower land it gave good returns, for instances, on the College farm, it yielded 63 bushels per acre, and reports from practical farmers in drier districts of the state claim it to withistand drought much better than oats or barley."

We think it well worthy of a trial. Price, per lb., 20c.; 6 lbs., \$1.00; per pkt., 5c.; post-paid. By express or freight, peck, 50c; bush., \$1.50.

THE FODDER GRASS

For the North-West and British Columbia.

Bromus Inermis (Awnless Brome Grass). This has proved to be the best grass of any yet tried. From Winnipeg to the western coast it has stood the rigor of the winter, has yielded from three to four tons of hay per acre. Comes early into growth, thrives well in loose soil, withstands dry weather, grows freely in rich damp soil, and forms a close sward; produces a heavy aftermath of succulent leafy shoots. Where a permanent hay is desired Bromus Inermis will fill the bill. Sow twenty-five pounds per acre. Price, per lb., by mail (post-paid), 30c.; for 10 b. lots, 25c. per lb., (post-paid); special prices on application for 25 lb. lots and over,

KAFFIR CORN

(White). Grows from five to six feet high, making a straight, upright growth. The stems are stalky and very thickly clothed with wide leaves. The stalks keep brittle, tender and juicy, not hardening like many of the sorghums. Makes excellent fodder either green or dry, which is highly relished by cattle or horses. For fodder sow one-half to three-quarters of a bushel per acre in drills. Price, by mail (post-paid), 5 lbs., 50c.; lb., 15c.; pkt., 5c.

BROOM CORN

Improved Evergreen. This variety of Broom Corn is more largely grown in the Western States than any other. The brush is noted for its fine quality, good length and handsome appearance; cut before the seed is ripe, it is a beautiful pea green color. Brush very fine and seldom gets crooked. It ripens early and yields heavy crops. Price, by mail (post-paid), 3 lbs., 40c.; lb., 15c.; large pkt., 5c.

JAPANESE MILLET

Recently introduced from Japan, greatly surpassing the ordinary millet or Hungarian grass in vigor of stalk, yield of seed and value of crop. From reports received those who have grown it are loud in its praise. The plant attains an average height of six feet, short jointed, and at every joint there is put forth an immense number of long, thick, when cured as hay, chopped, moistened and sprinkled with meal, it is readily eaten by cattle and horses. Sow in drills fitteen inches apart, with twelve to fitteen pounds per acre. It should be generally tried this season. Price, by mail (post-paid), 3 lbs., 50c.; lb., 20c.; pkt., 5c. Prices for larger quantity on application.

CO.'S PERMANENT GRASSES FOR ALL SOILS THE FINEST QUALITY OF SEEDS AT SPECIALLY LOW RATES.

Grasses. Timothy, Italian 1970.
Schrader's Brome Grass.
Clovers. Red Scarlet, Alsike, Lucerne.
a. On light soils, per acre, \$2.60; per lb., 15 cents.
b. On medium soils "\$2.60; per lb., 15 "
2.50; heavy soils "\$2.50; per lb., 15 "
2.50; per decre.

Allowing 22 pounds per Acre.

No. 2 For Two Years' Mowing or Grazing Grasses, Italian Rye, Perennial Rye, Kentucky Blue. Orchard, Meadow Fescue, Timothy

Clovers. Red, Scarlet, Alsike, Trefoil, White.

a. On light soils, per acre, \$3.25; per lb., 16 cents.

b. On medium soils, \$3.20; per lb., 16 "

c. On heavy soils, \$3.20; per lb., 16 "

Allowing 25 pounds per Acre.

Grasses and Clover for One Year's Hay No. 3 For one Year's Hay and Two Years' Pasture

Timothy, Italian Rye. Perennial Rye, Orchard, der's Brome Grass.

Grasses. Italian Rye, Perennial Rye, Kentucky Blue. Orchard, Meadow Fescue, Hard Fescue, Timothy, Tall Oat.

Tall Oat.

Clovers. Red, Scarlet, Alsike, Lucerne, White.
a. On light soils, per acre, \$3.50; per lb., 16 cents.
b. On medium soils "\$3.55; per lb., 16"
c. On heavy soils "\$3.55; per lb., 16"

Allowing 26 pounds per Acre For Three Years' Mowing, Grazing in Orchards and Shade

Grasses. Evergreen Meadow, Hard Fescue, Italian Rye, Meadow Foxtail, Perennial Rye, Orchard, Tall Meadow Oat, Timothy, Wood Meadow, Clovers. Alsike, Mammoth, White.

Allowing 25 pounds per Acre. Price, per acre, \$4.25; per lb., 20c.

PERMANENT PASTURE MIXTURES

Quotations are for the price of seed for an acre; for less than will seed one acre, the pound prices are charged. Light and heavy seeds will be sent separately. Add 5c. per lb. to prepay postage.

No. 5 For Pastures on Light or Medium Soils

Grasses, Hard Fescue, Kentucky Blue, Meadow Fescue, Meadow Foxtail, Orchard, Perennial Rye, Timothy, Sheep's Fescue, Red Top, Yellow Oat. Clovers. Alsike, Lucerne, Red, White, Mammoth.

Allowing 28 pounds per acre. Price, per acre, \$4.50; per lb., 20c.

No. 6 For Sandy and Gravelly Soils.

Grasses. Crested Dogstail, Hard Fescue, Kentucky Blue Perennial Rye, Red Top, Sheep's Fescue, Tall oat. Clovers. Trefoil, Lucerne.

> Allowing 30 pounds per acre. Price, per acre, \$4.50; per lb., 18c.

No. 7 For Moist Lands and Those Occasionally Overflowed.

Grasses. Creeping Bent, Kentucky Blue, Meadow Fox-tail, Orchard, Red Top, Rough-stalk Meadow, Timothy, Clovers. Alsike, white.

Allowing 28 pounds per acre. Price, per acre, \$4.50; per lb., 20c.

No. 8 For Pastures and Well Drained Soils

sses. Meadow Fescue, Meadow Foxtail, Orchard, Kentucky Blue, Perennial Rye, Red Top, Timothy, Grasses. Yellow Oat.

Clovers. Lucerne, Alsike, Red, White, Yellow.

Allowing 28 pounds per acre. Price, per acre, \$4.25; per lb., 20c.

No. 9 For Pastures or Orchards and Shaded Places.

Grasses, Evergreen Meadow, Kentucky Blue, Italian Rye, Hard Fescue, Perennial Rye, Orchard, Sweet Vernal, Timothy, Wood Meadow. Clovers. Red, Trefoll, White,

Allowing 28 pounds per acre. Price, per acre, \$4.20; per lb., 20c.

Mixture for Renovating Old Pastures.

Grass lands, which have been frequently mown without receiving a proportionate supply of manure, always become deficient in the most valuable and nutritive grasses. By sowing about fourteen pounds of Renovating Mixture per acre the sward will be wonderfully improved both as regards quantity and quality of produce. Sow in April or May, or after the hay is taken off, and previous to rain if possible. 25 lbs. or over, 17c. per lb.; less quantity, 20c. per lb.

AGRICUI

Crested Dogstail (Cynosurus cristatus). May be advantageously sown on lawns kept under scythet; forms a close turf, remaining green a long time; valuable for sheep pasture; succeeds on dry, hard and gravelly soil. Height 1 to 1½ feet. Sow 25 lbs. per care. Per lb., 60c; post-paid, 65c.

Creeping Bent Grass. (Agrostis stolonifera). An excellent variety for pastures when mixed with other grasses; succeeding well in most situations, and thrives in moist land. Sow 40 lbs. per acre. Per lb., 30c; post-paid, 35c.

Evergreen Meadow Grass (Page symbosium). Near the page symbosium of the page sym

Evergreen Meadow Grass (Poa sempervirens). Noted for perpetual greenness, earliness in spring, and the rapidity with which it reproduces leaves after being eaten or cut; its thick growth, fineness of foliage and capability of growing under the shade of trees render it a most desirable grass for lawns and parks or pasture. Sow 40 lbs. per acre. Per lb., 55c.; post-paid, 60c.

Hard Fescue (Fescue advisceula). Thrives in a great variety of soils. One of the best grasses for general purposes, and resists the effects of drought well. It grows easily; the foliage is fine and nutritive. Height, 1½ feet. Sow 30 lbs. per acre. Per lb., 25c.; post-paid, 30c.

**Italian Rye Grass (Lolium Italicum)*, One of the best. Yields crop first season, then disappears, as it will not stand our winter frost. It should only enter into mixtures for one year's crop. Sow 40 lbs. per acre. Per lb., 15c.; post-paid, 20c.

True Kentucky Blue Grass (?oa pratensis), Also known as "Green Grass," June Grass," etc.; does best in rich land, but will thrive in dry and somewhat shady locations; it stands the hottest summers. Sow 40 lbs. per acre. Per lb., 15c.; postpaid.

Canadian Blue Grass (Poa compressa). Somewhat like Kentucky—and as price is lower than above, may be used as a substitute. The hay, although short, is very heavy and rich. Per lb, 10c.; post-paid, 15c.

Meadow Fescue or Sweet Grass (Festua pratensis). One of the most valuable grasses we have, thriving in almost all soils, and is used in all good mixtures. Makes excellent hay, early and nutritious, abundantly productive and tender. Height, from 2 to 3 feet. Sow 40 lbs. per acre. Per lb., 25c.; post-paid, 30c.

Meadow Foxtall (Alopecurus Pratensis). A favortic grass in England, both for meadows and pasture. It grows early and abundantly, and gives a large quantity of aftermath. It is best suited to a moist soil; bog, clay or loam. Sow 30 lbs. per acre. Per lb., 30c.; post-paid, 35c.

Orchard Grass (Dactylis Glomerata), One of the most valuable grasses. Its rapidity of growth, and its power of enduring the cropping of cattle, commend it bighly as a pasture grass. It blooms earlier than Timothy, and about the same time as common red clover, making an admirable mixture for meadows to cut and cure for hay. Stands drouth better than most grasses. Sow 28 lbs. per acre. Per bushel, price variable; per lb., 15c.; post-paid, 20c.

Lay be advantageously sown on lawns kept under scythe; forms a close turf, remaintures; succeeds on dry, hard and gravelly soil. Height 1 to 1½ feet. Sow 25 lbs. per Perennial Rye Grass, English (Lolium ferenne). Suitable to a great variety of soils, yields an abundance of foliage, valuable for hay, for which purpose it requires cutting when in bloom. Stands Canadian climate two seasons; good in mixture for two year's crop. Sow 48 lbs. per acre. Per lb., 12c; post-paid, 17c.

Red Top (Agrostis Vulgaris). Thrives best on low ground, where it cuts a good cropf rather light hay of fair quality. Suitable for low pastures. Sow 28 lbs. per acre. Per lb., 18c; post-paid, 23c.

Rough Stalked Meadow Grass (Poa trivialis). Of close, quick growth, productive and untritious; valuable in all permanent pastures on good soil, particularly those of a moist description, but does not thrive on dry soils. Prices variable. Per lb., 40c; post-paid, 45c.

Tall Meadow Fescue (Festuca Elatior). Very early, nutritive, productive, Smould form a portion of all pastures on wet or clay soils. Per lb., 40c; post paid, 45c.

Sweet Vernal (Anthoxanthum odoratum) (True Perennial). Its chief merits are its early growth, and continuing to throw up its root foliage until late in autumn. The fragrant odor which the leaves emit when drying improves and sweetens the hay. Height from 1 to a feet. Sow 30 lbs, per acre. Per lb., \$1.20; post-paid, \$125.

Sheep Fescue (Festuca ovina). This grass grows naturally on light, dry and sandy soils; smaller than the other Fescues, but from being very nutritious its should always enter into the composition of sheep pastures, as sheep are very fond of it, mutton from such pastures is of the finest flavor. Average height, 15 inches. Sow 30 lbs, per acre. Per lb., 25c; post-paid, 30c.

Tall Meadow Ord Grass (Avera Elatior).

The fragrant odor which the composition of sheep pastures, as sheep are very fond of it, mutton from such pastures is of the finest flavor. Average height, 15 inches. Sow 30 lbs, to the acre. Pe

CLOVER

Prices per bushel and 100 pounds given on application.

Clover, Lucerne, or Alfalfa (Medicago Sativa). The value of Lucerne is in its enormous yield of sweet and nutritious foliage, which is highly relished by stock, either when green or cured into hay. It will grow and yield abundantly in hot, dry sections, and on poor, light and sandy soil, where no other grasses can be grown, for it sends its roots down to enormous depths, consequently it consumes food, moisture and the leach of fertilizers which have been for years beyond the reach of ordinary plants. The best method is to sow broadcast 15 lbs, per acte where the land is in good condition. Cut when in full bloom, Try to cure without getting it wet. Do not let hungry cattle get it when green, especially it wet. If you wish to pasture them on it, first feed them all they can eat, and then turn them on the green Lucerne, and no harm will come to them. It is the best thing to renew old worn-out lands that we ever saw, and there is not a weed in this country that can stand before it. By mail, post-paid, 1 lb., 20c. Special prices for large quantities.

—Crimson or Scarlet (Trifolium Incarnatum). An annual variety. The yield of fodder is great, and after cutting it at once commences growing again, and continues until destroyed by frost. It can be sown in April or May, and produce an abundant crop in fall for feeding green or for hay, and is very highly recommended as a soiling crop for plowing under. It is being extensively tried in many sections of Canada, and while it is not yet an established fact that it will readily self-seed the same as in more southern latitudes, it is highly spoken of as a fine crop for spring sowing, when pasturage is likely to be short. Sow rolbs, per acre, or even more on poorer lands. Per lb., 15c.; by mail, post-paid, 20c. Special prices on application for large

-Bokhara (Melilotus alba). Grows 2 feet high; has a white and very sweet-scented blossom, most valuable for bees; sow in spring. Per lb., 20c.; post-paid, 25c.

-White Dutch (Trifolium repens). Most valuable in mixtures for permanent pastures, forming, in conjunction with natural grasses, the finest and most nutritious food for cattle or sheep. Price variable. Per lb., 25c.; post-paid, 30c.

—Red Clover (Trifolium pratense). The leading variety of clover for pastures or meadows. The seed we offer is recleaned and very fine. Per lb., 15c.; post-paid, 20c. Samples and prices on application.

-Mammoth; Late Large Cow Grass, or Pea Vine Clover (Trifolium pratense perenne). Of great value if sown upon exhausted lands; grown from 5 to 6 feet, and highly recommended for plowing under for manure. Price variable. Per lb., 15c.; post-paid, 20c.

—Alsike (Trifolium hybridum). It is deservedly in repute as one of the best perennial clovers, is well adapted to this country, and is now generally approved of in all mixtures of grasses and clovers. Market price variable. Per lb., 26c.; post-paid, 25c. Samples and prices on application.

AMPELOPSIS VEITCHII (BOSTON OR JAPAN IVY)

AGERATUM

ANCHUSA CAPENSIS

A hardy annual of more than ordinary beauty. It grows about two feet high, branching freely and bearing a profusion of the most lovely flowers, similar in all respects to the Forget-me not, though the blooms are much larger and of finer color. Its color is a deep, clear, brilliant blue, with a pure white eye; one of the trarest and most lovely shades of blue. It blooms early and continues all summer.

14 Anchusa Capensis 10

ALYSSUM

Very hardy, free-blooming, dwarf plants, growing readily in common garden soil. The pretty, fragrant flowers are much prized for bouquets; excellent for the summer garden and for blooming in the con-

watory in winter.

Alyssum, Tom Thumb. One of the finest for edgings and low beds, flowering in unparalleled profusion for months. Very fragrant and about 5 inches in height. Per

AGROSTEMMA (Jove's FLOWER)

The Agrostemmas are free bloomers, make attractive beds, and are useful for cutting. They present a beautiful appearance when grown in masses, or in a border with tall plants. Hardy annual.

CENTAUREA (CORN BOTTLE)

The Blue Bottle or Bachelor's Button is one of the most attractive of all hardy annuals, the graceful beauty of its old-fashioned flowers being universally admired. A hardy annual of the easiest growth, and flowers freely and continuously; height 2 to 3 feet; flowers excellent for cutting.

excellent for cutting.

160 Centaurea Cyanus (Corn Flower), mixed, valuable for cutting

161 — New Double. So perfect that fully 80 per cent. of the flowers are double and semi-double; they are also increased in size and present many bright colors and distinct markings hitherto unknown.

162 — Margarita. Distinct from all other Centaureas, and undoubtedly the most beautiful variety known. The large flowers are of purest white, deliciously scented, and freely produced on long stems.

163 — Imperialis, "New Imperial Giant Sweet Sultans." New giant-flowering hybrids, excelling in beauty and size. They are the result of crossing C. Moschata and C. Margarita, taking from the former the iuxurious growth of the plant, and from the latter the noble flowers, the colors of which are infinitely varied from glistening white through shades of red, from flesh pink to crimson, and through blues from sivery lilac to royal purple, etc.; fragrant; the airy grace of the giant long-stemmed flowers renders them of exceptional value. If cut scarcely opened they will last ten days in water. The plants are of the easiest culture, flowering freely in the garden the first summer from seed sown in the spring. 3 feet high

GRANDIFLORA

CENTROSEMA GRANDIFLORA

GRANDIFLORA

We quote from the description of the introducer: "I have carefully watched its growth and development, and consider it a perfectly hardy vine of rare and exquisite beauty, which from seed sown in April, even in the porcest soil, will thrive from early June until cut down by frost, and produce in the greatest profusion large clusters of inverted pea shaped flowers, delightfully fragrant, one-and-ahalf to two-and-a-half inches in diameter, and ranging in color from rosy violet to reddish purple, with bright feathered markings through the centre. The large buds and back of the flower are pure white, making it appear as if one plant bore many different colored blossoms. It is well adapted for every purpose desired for a climber, running 6 to 8 feet in one season." As the seed germinates slowly, we advise soaking it in warm water over night before planting. 164 Centrosema Grandiflora

scarlet; 2 feet.....

MARIGOLD, "GOLDEN BALL"

MARIGOLD

Wherever a rich display of bloom is desired, the Marigold is almost indispensable. The African varieties are tall, growing usually two feet or more, while the French are more dwarf. Succeed well in ordinary garden soil. Hardy annual.

m ordinary garden soil. Hardy annual.

Marigold, Golden Ball. This is without doubt the finest double Marigold yet introduced; when grown to perfection the heads attain an enormous size, and are as globular and as dense as a knited ball, 4 to 5 inches in diameter and beautifully finished. Awarded first class certificates by the Royal Horticultural Society, London, the Manchester Royal Botanical and Horticultural Society, and thousands of first prizes. A mass of these in a bed is as fine an object as one can wish in the garden during the autumn, and the length of time the plants continue to flower is much in their favor. We offer the Golden Ball in two separate colors and mixed.

285 —Golden Ball, Deep Orange Yellow,

STOCK, TEN WEEKS

NEWEST SWEET PEAS

Our sweet peas are unsurpassed, having been selected from the finest strains of American and English growers. They include all the improved large-flowering varieties of recent introduction.

The seed should be sown as carly as the ground can be worked in the spring, to enable the vines to get a good strong growth before the warm weather comes. Prepare the ground by thoroughly working in a large quantity of well-rotted manure. Make a trench 6 in. deep, in this sow the seed and cover 2 in. deep. As soon as the plants begin to show through fill in the trench. This will secure a deep planting without the bad effect of deep covering of the seed at first, and so enable the plant to bloom continuously through the heat of summer. As the flowers come into full bloom or fade they should be cut off, for if the pods are allowed to form the plant will stop blooming.

SWEET PEA "MONT BLANC"

700 The introducer says: "It gives me exceptional pleasure to be able to introduce to the gardening world a splendid new pure white Sweet Pea, which by the extreme precocity of its bloom may be regarded as the forerunner of an extra early flowering race.

Wont Blanc has not the rank habit of other varieties, but is of a much neater and more graceful growth, the plant hardly attaining the height of the average sweet pea. The individual flower is very large, and of the purest white. In shape it resembles Emily Henderson, but the

varieties, out is of a much neater and in the average sweet pea. The individua resembles Emily Henderson, but the standard is somewhat wider, well clear of the foliage, so that scarcely a single flower is hidden. Its great value lies in its extreme earli-ness. Our trials have proved that it beats all other varieties sown at the same time by 10 to 12 days. oz., 20c.;

"SADIE BURPEE"

701 This variety is sure to become immensely popular, as Sweet Pea growers have waited expectantly for years for a really first-class giant flowered, black seeded, White Sweet Pea, and the peculiarity of "Sadie Burpee" appearing in both black and white seed renders it additionally interesting. The plant is a strong grower, a very free flowerer, and the color pure white \(\frac{1}{2} \) b. 30c.; oz. 15c.; pkt.

"NAVY BLUE"

702 An entirely distinct color from any variety in existence. The color is true blue. A vigorous grower, flowers of good form, fair size and substance. The only really blue pea yet introduced. 1 lb. 35c.; oz. 20c.; pkt.....

DWARF SWEET PEA "CUPID"

SIS Our "Complete Flower Garden for 50 cents," offered last season gave such universal satisfaction and met such ready demand that we have prepared another asortment for the present that will flower the first season and yield a beautiful and abundant display of bloom until destroyed by frost.

Aster, mixed varieties.
Alyssum, Sweet.
Alyssum, Sweet.
Alyssum, Sweet.
Calliopsis, mixed.
This collection will be mailed (post-paid) to any address in the Dominion for 50 cents, or three collections to any one address for \$1.25. Everybody try it.

SPECIAL MIXTURES OF FLOWER SEEDS

OUR CHOICE WILD GARDEN SEEDS

To those who cannot bestow the necessary care required in a neatly laid out flower garden, the "Wild Garden" presents a substitute, which for its unusual and varied effect, for cheapeness and small amount of labor necessary for its construction, has no rival. We have had many satisfactory endences of the estimation in which the "Wild Garden" is held from those who used our seed during the past season.

520 "Wild Garden Seeds" are a mixture of over 100 varieties of hardy flower seed mixed together, and wherever planted will ensure something new almost every day. Per oz.; 20c.: per large pkt. 5

SEEDS FOR THE GREENHOUSE

AND WINDOW CULTURE

UNDER this head are included tender annuals and perennials, or those requiring special care in sowing the seed, and during the growing of plants. Many of them make useful decorative plants for the conservatory and window, while others can be transplanted to the garden, or summer bloom, or as decorative foliage plants for beds and borders.

To start seed use shallow boxes or pans, about two inches deep, in which place rich, mellow soil, mixed with about one-fourth sand; sow the seed upon the surface, but do not cover to more than a depth of four times the diameter of the seed sown, then press down gently and smoothly. Very fine seed should have no covering, only press the soil after sowing. Water gently with a spray, place the box or pan in the window, covering with glass. Judgment must be used in giving ventilation. Do not allow the soil to become too dry nor too wet, or they may damp off after starting. As soon as plants are in second leaf transplant to pots or boxes, and again into larger boxes soon as making further growth. When weather becomes warmthey may be removed to the bed or border in open ground, but require protection from heat and cold until hardened to the outdoor atmosphere. Some of the varieties listed below will not stand outdoor weather, but must be kept indoors. Failure will at times attend the most experienced grower, while another planting with the same lot of seeds will give excellent results; the seed must not, therefore, be considered faulty if a failure occasionally happens. With proper conditions of culture and care success is easy.

SUPERB ENGLISH CALCEOLARIA

ABUTILON (FLOWERING MAPLE)

For early bloom the seed should be started in the house and the young plants set out in the garden when the weather is warm and settled. They also make splendid house plants, blooming freely in winter. 522 Abutlion, prize mixed. Embracing the most elegant colors, both selfs and streaked

and veined

See Plant List.

AZALEA

Shrubby plants for greenhouse; large heads ot beautiful many colored flowers, borne in profusion during winter and spring. Tender perennial.

523 Azalea Indica. Finest mixed, 1 to 4 feet.. 25

CYCLAMEN GIGANTEUM

ASPARAGUS

- Asparagus, Sprengeri. The plants grow in suspended baskets, for greenhouse or or outdoors in summer. The fronds frequently grow 4 ft. long and are considered indispensable in all fine decorations; grow readily from seed.
 -Plumosus Nanus. A greenhouse perennial climber, with exquisitely graceful and feathery lace-like foliage; extensively grown by florists for cutting

CINERARIA HYBRIDA GRANDIFLORA

BEGONIA

Magnificent flowering plants for pot culture. The "tuberous-rooted" varieties are becoming deservedly popular for garden bedding, flowering in the greatest profusion all summer. Individual florets will average from 6 to 9 ins, in circumference and are of all roots. I foot.

- Begonia, Tuberous rooted.
 Single, mixed...

 Tuberous rooted, double,

CALCEOLARIA

Hybrid, spotted and mottled. Varieties mixed.....

CUPHEA (CIGAR PLANT)

CYPERUS (UMBRELLA PLANT)

A strikingly handsome foliage plant, equally well adapted for the greenhouse or open ground. The leaves are striped with white, giving the plant a distinct and fine appearance. Sow early. It is of easy culture. Half-hardy perennial.

CINERARIA

For a showy flower the Cineraria has few equals, bearing, as it does, hundred of large showy flowers of various colors and markings.

534 Cineraria Hybrida Grandiflora. A splendid strain of large flowering hybrids; dwarf, compact and bushy,

COLEUS

CYCLAMEN

mixed

—Persicum Giganteum. Very large flowers; from prize collection. The flowers are of mammoth size; are borne well above the foliage on long, stiff stems. The coloring includes the most brilliant as well as the most delicate shades—deep crimson, purest white, rose and white with carmine spots and flakes. The foliage is also handsome being thick, fresh and large, deep, rich, and green, with showy white markings. The culture of Cyclamen from seed is comparatively easy. . Very large flowers; is comparatively easy......

GERANIUM

Gorgeous flowers of numerous shades of color, borne continuously, render this the most popular plant grown, for pot culture in winter or for bedding out in summer.

554 Geranium, large flowering, single, mixed, from new varieties

-Double Mixed, includes many varieties and the newest shades..... 50

556 —Pelargonium Mixed (Lady Washington).
From finest fancy spotted large flowering. (See Plant List).....

GLOXINEAS

Charming greenhouse plants of dwarf habit-Flowers of the most exquisite and gorgeous colors are produced in greatest profusion. They are often 3 to 4 in. across, and many of them are magnificently spotted, mottled and blended. Under the common est culture they bloom continuously for months, and by starting at intervals a succession of splendid flowers may be had nearly the whole year round. They are also exceedingly useful, if planted out in a warm frame and shaded from the bright sun, for cut flowers during summer. 1 ft. Tender perennials.

557 Gloxinea, Grandiflora Erecta, of great beauty and diversity, mixed varieties, saved from the finest erect growing sorts

Large Flowering Mixed. Choice. (See Bulb List).....

GLOXINIA

NEW CRESTED BEGONIA

CLIANTHUS (Australian Glory Pea)

A trailing plant with very beautiful foliage and bunches of immense scarlet flowers with black centres, which form a most showy contrast. The best way to grow this beautiful flower is to prepare a hill in the garden as you would for melons, in which plant a few seeds, where they will grow and bloom beautifully until frost, then lift carefully and bring inside for winter bloom. 544 Clianthus Dampieri. Magnificent color......

CHRYSANTHEMUMS

545 Chrysanthemum Indicum. The varieties are numerous and are divided by florists into various classes, "Chinese," "Pompon," "Japanese," etc. Our strains are unexcelled.......

—Japonicum. The Japanese long-petaled or fringed varieties, now so popular, double mixed colors

Valuable plants for ribbon bedding, the silvery whiteness of the leaves being very effective with other colored leaved plants.

DRACÆNA INDIVISA Dracæna Indivisa. A foliage plant extensively used for the centres of vases and for pot culture; thin arching leaves, 2 to 3 feet Dracæna Indivisa.

ECHEVERIA

Very desirable plants for bedding or for borders, blooming the second season. They can be wintered in a light cellar free from frost. Tender perennial.

550 Echeveria Secunda Glauca, or "Hen and Chickens." Small bluish white leaves; 2 to 4

inches .

FERNS

Graceful plants, giving a beautiful appearance to the conservatory or window; the hardy sorts, grown in rockeries, etc., are beautiful.

St. Greenhouse varieties. This mixture includes scores of many fine greenhouse or tender evergreen varieties, which are desirable for pot culture in the house or on the verandah during the summer months. Seed should be sown in boxes of light rich soil; keep partially shaded and quite moist until the young plants appear, when they can be transplanted to pots filled with light loose woods earth. Mixed

FUCHSIA (Ladies' Ear Drop)

GREVILLEA (AUSTRALIAN SILK OAK)

HELIOTROPE

10

SOLANUM

MUSA ENSETE

(ABYSSINIAN BANANA TREE)

Lantana, mixed .

LANTANA One of the most desirable half hardy perennial greenhouse or bedding plants, bustantly in bloom; Verbena-like heads and changing in hue; 2 to 5 ft.

KENILWORTH IVY A charming, small, neat, hardy perennial trailing plant, suitable for baskets, vases, 567 Kenilworth Ivy (Linaria Cymbalaria), lavender and purple...... 15

PASSION FLOWER

Handsome and rapid climbers for greenhouse decoration and sunny positions in the open ground in summer. Coerulea is sometimes hardy in a sheltered situation.

564 Passion Plower, Passi-flora Coerulea, large flowers of violet and light blue, slightly fragrant.....

ROSES

565 Rose, "Little Midget."
These little roses belong

These little roses belong to the Polyantha or Japanese many-flowered section. The roses are only about an inch across, usually very double, but occasionally semi-double and seldom single; they are borne in many-flowered clusters, and contain all the tints of cultivated roses. What is most remarkable, these "Little Midget" roses grow only ro in. Midget" roses grow only 10 in. high, and commence blooming a few weeks after the seed is sown, and continue to bloom year after year

PASSION FLOWER

PRIMULA OBCONICA (JAPANESE PRIMROSE)

A profuse blooming Primrose, bearing on long stems heads containing from 10 to 15 flowers. It thrives in a cool house, and will grow in favor with those desiring plants that will grow easily. The flowers are pure white, shading occasionally to lilac, and have the true primrose fragrance.

have the true primrose fragrance.

581 Primula Obconica.

582 — Obconica Fimbriata. A profuse blooming fringed variety of the well-known large flowering Primula Obconica. The flowers are as finely fringed as the Chinese Primrose, and are delightfully fragrant. It thrives well with ordinary house culture, and will grow in favor with those who wish easily grown plants.

We pay postage to any address in Canada on all Plants, Bulbs and Seeds, except where noted.

PRIMULA

(CHINESE PRIMROSE)

Charming, profuse-blooming plants, indispensable for winter and spring decoration in the flouse. Seed should be sown in February or March, in a light sandy soil, but slightly covered and kept moist. Transplant as soon as the second leaves appear, and continue shifting the plants as they grow. Our seed is from the best European collections.

flowers 21/4 in. across; large yellow eye..

PRIMULA SINENSIS

578 — Forbesi, the "Baby Primrose." Blooms in three months from seed. This is unquestionably one of the most profitable plants to grow for cut flowers. It begins to bloom in a months after sowing and continues to produce flowers for nonths in succession. The flowers are very graceful, not quite half an inch across and are of a most pleasing rose color with a yellow eye. They are borne on erect stems, no to 12 in high, in tiers, and remain fresh over a week after being cut, new buds opening everyday. The plant is a vigorous grower, thrives in the shade or sunshine, even in a cool house.

SOLANUM

(JERUSALEM CHERRY)

It is well adapted for garden or pot culture, bearing numerous little red fruit, which remain on for a long time and look very ornamental.

579 Solanum Capsicastrum, 1½ tt....... 10

AMARYLLIS, OR KNIGHT'S STAR LILY

AMARYLLIS, OR KNIGHT'S STAR LILY

An interesting class of plants, desirable for growing in pots, preducing showy, lily-shaped flowers, which are very attractive and handsome. The bulbs should be potted in light, sandy loam, with good drainage. They are of vigorous growth and will repay the care required, being almost sure to bloom the first season. If planted outside after spring flowering, it makes a good growth and is ready for a second blooming in the fall. They require abundant moisture when growing, but at the season of rest water should be given sparingly. Our stock is very fine.

Amaryllis, Crimum Kirkli. Magnificent flowers, Usually two flower stalks of dark purplish color are sent up at the same time, each bearing a large umbel composed of a dozen or more of enormous lily-like flowers of the greatest beauty and fragrance. The petals are broad and pure white, with a deep reddish purple stripe through the centre. Free bloomer. Extra large bulbs, each, 50c.; large, 30c.

— Johnsonii (Spice Scented). This magnificent bulbous plant throws up an 18-inch spike bearing from 2 to 6 flowers, averaging from 4 to 6 inches across, of a bright, rich red color, with a white stripe down each petal; it also has a rich, spicy fragrance. It is robust, luxuriant and the earliest Amaryllis; prolific bloomer; easy culture. Extra large, each, 50c.; large, 30c.

— Treatea (Fair Lily of the South). A native of Florida. The flowers are pure white; sweet scented; bulbs quite small; 4 or 5 can be grown in 3 or 6 inch pot. Per doz., 50c.; ea., 5c.

— Formosissima (Jacobean Lily). Intense crimson flowers, with most charming and graceful appearance. The bulbs are dormant during winter, and can be kept like Dahlias. Doz., \$1; ea., 10c.

— Vallotta Purpurea. A beautiful pot plant, requiring similar treatment to the Gladiolus. It sends up a flower stem about 18 inches in height, bearing from four to eight handsome scarlet flowers. Very easy of cultivation. Each, 25c.

ATAMASCO LILIES (ZEPHYRANTHES)

Atamasco Lilies. These beautiful zephyr flowers, or "Fairy Lilies," are gems of rare beauty. Planted in pots or in the open ground, they produce very beautiful lily-like flowers all summer, and will be greatly admired by all who see them. They are easily grown and succeed everywhere. Bulbs, mixed colors, per doz., 50c.; each, 5c.

ALSTROMERIA

ALSTROMERIA

(THE PERUVIAN LILY)

Tuberous-rooted plants with beautiful large, lily-like flow-ers of great beauty, borne in clusters during the summer; during the summer; they are splendid for cutting, being of great substance and lasting in perfection for a long time. In dry, well drained positions they form the of the most type. positions they form one of the most useful groups in cultivation; hardy when well established, and very varied in colors (orange, yellow, scarlet, pink, white and black, beautifully blended, many sorts being striped and blotched), Free bloomers. Plant the tuberous roots one foot deep.

foot deep.

Alstromeria.

Mixed varieties, per doz., \$1; each, 10c.

AGAPANTHUS

(THE GREAT AFRICAN LILY)

Splendid ornamental plant, bearing clusters of bright blue or white flowers on long flowerstalks, and lasting a long time in bloom. There is no finer plant than this for outdoor decoration, planted in large pots or tubs. It does well in the house or greenhouse in the winter, but will not stand frost. It is a rapid grower and increases in size and beauty every year, the chief point in its cultivation is to divide the plants before the pots or tubs become overcrowded with roots.

Agapanthus Umbellata. The old favorite; flowers bright blue, Each, 20c.

APIOS TUBEROSA

(TUBEROUS-ROOTED WISTARIA)

Apios Tuberosa. One of the grandest and most Aplos Fuberosa. One of the grandest and most beautiful climbing vines in cultivation. It grows very quickly and attains a great height, making, with its dense foliage and beautiful flowers, a most attractive screen. In vine and foliage it resembles the common Wistaria. It blooms most profusely, bearing lovely clusters of rich, deep purple flowers possessing a strong, delicious violet fragrance. Plant the bulbs press trailing face the complexery a real drawing. near a trellis, fence, tree, or wherever a rapid growing climber is desired. The bubs are perfectly hard and need not be taken up over winter. A vine so sure to grow and give satisfaction should be in every garden. Bulbs, per doz., 50c.; each, 5c.

BES ELEGANS

TUBEROUS-ROOTED

BEGONIAS

Every succeeding year, as this class of Begonias becomes better known the demand for them keeps increasing. All the varieties are beautiful, many of them charming. The flowers of all of them are much larger than those produced by any of the other sorts, and some of them bear flowers of an almost incredible size. Not unfrequently we see them four inches in diameter. Furthermore, the numerous varieties produce many colors, varying through all the shades of crimson, scarlet, orange and yellow, and many are pure white. They are not grown to the extent they pure white. They are not grown to the extent they should be, as they require no more care than geraniums, have as fine a range of color, and will bloom continuously throughout the summer. Planted either in the rockery or flower border, they rival the geraniums with their rich and varied colors, the bulbs succeeding best in light, loamy soil, and a somewhat shaded situation. After blooming all summer, the bulbs, if in beds, should be taken up in November, dried off like Gladiolus or Tuberoses, and packed in a box of coarse sand or saw-dust, placed in a dry place secure from cold; they will then be ready for the next season. If in pots, they can be gradually dried off in November by withholding water; when well dried out, put the pots containing bulbs in a dry, warm place until next April, when the roots can be shaken out and replanted for summer flowering as before. before.

TUBEROUS-ROOTED BEGONIAS Superb Mixed Colors

Our superb collection of Tuberous-rooted Begonias, mixed, embraces the most gorgeous array of colors ever see. A bed of a dozen bulbs, costing but \$5.75, will excite admiration in any locality, while single bulbs, planted in the mixed flower beds, will appear edingly handsome contrast. 10c. each; 12

Single Tuberous-Rooted Begonias

Large white flowers, very distinct. 10c. each, or \$1.00 per dozen.

Begonia, Superb Yellow. Brilliant and glowing yellow color. 10c. each,

or \$1.00 per dozen.

SPECIAL OFFER—One Bulb each of the six Superb Colors described

above for suc.

Tuberous-Rooted Begonias, Double Varieties, Mixed, all colors.

Each, 20c.; per doz., \$1.75.

Tuberous-Rooted Begonias, Double Varieties, to color as above. Each, 20c.; per doz., \$2.00.

NEW TUBEROUS-ROOTED BEGONIA

("Duke Zeppelin")

A most useful and attractive variety that should soon become a favorite for bedding, possessing the great advantage over other tuberous-rooted Begonias of delighting in full sunshine. It is of dwarf-habit, growing from 6 to 8 inches high, throwing up well above the foliage numberless stems bearing full, double-dazzling scarlet flowers, giving the whole plant a brightness, grace and elegance difficult to describe.

CALADIUMS, FANCY LEAVED

Nothing can equal the variety and gorgeous coloring of these ornamental leaved plants when grown on verandahs or in situations partially shaded. They are easily grown, thriving in pots or boxes in the house or in shaded situations out of doors. The bulbs should be dried off in October, and kept in a warm, dry place during the winter. They should be started into growth about April 1st, requiring strong bottom heat. Choice fancy varieties, 25c. each; 5 for \$1.

CALADIUM ESCULENTUM

(ELEPHANT'S EAR)

Upon the lawn, as single specimens, nothing will give a more sub-tropical appearance and pleasing effect than C. Esculentum; ance and pleasing effect than C. Esculentum; it will grow in any good rich garden soil. To obtain best results it should be planted where it will obtain plenty of moisture; when well grown it will stand five feet high and bear immense light green leaves 3 to 4 ft. long, by 2 to 2½ ft. wide. As soon as the foliage is touched with frost, remove the bulbs to the cellar, and give same care as Dahlias. Price, large bulbs, each, 25c.; medium size, each, 15c.

CALADIUM ESCULENTUM

FANCY CALADIUMS

BESSERA ELEGANS, OR CORAL DROPS

Bessera Elegans, or Coral Drops. A summer flowering bulb requiring the same treatment as the Gladiolas. It is a splendid companion to Milla Biflora, as it grows about the same height, and makes with that lovely flower a pretty contrast. The flowers are 1 inch in diameter, drooping in clusters, fine scarlet, with a white band through centre of each petal. It is easily grown and sure to please all. Native of Mexico. Dozen. 75c. each &c. Dozen, 75c.; each, 8c.

CAMASSIA ESCULENTA

(Indian Hyacinth)

Camassia Esculenta. A lovely bulbous flower which should have a place in every garden. Hardy and robust as a tulip, producing each spring tall graceful spikes of lovely blue flowers, resembling to some extent the Hyacinth, though more graceful. It increases rapidly and soon forms a dense clump, in bloom a beautiful sight. A magnificent pot bulb for winter blooming. Per doz., 30c.; 3 for 10c.

TUBEROUS-ROOTED BEGONIAS

[&]quot;Royal Giant" Sugar Beet is the heaviest yielder grown, and is acknowledged to be the finest food for Milch Cows

SPOTTED LEAF CALLA

WHITE CALLA LILIES

White Calla (Lily of the Nile). A well known plant of easy culture, and in winter is one of our best window plants. The only special treatment it requires is abundance of moisture, this trait making it invaluable for aquariums, etc. Give the leaves an occasional spraying to clear from dust; water with tepid water, and keep in a warm room. To aid profuse blooming, keep them dormant during the fall, and repot in November. Price, each, 20c.

DWARF CALLA

(OR LITTLE GEM CALLA)

Calla, Little Gem (true). Should not be confused with the Gem, being entirely distinct. It is indeed a "pigmy," scarcely ever exceeding the height of one foot, yet producing good sized flowers in great abundance. Our stock of Little Gem Calla has been procured direct from the originator of this variety. The flowers will be found exceedingly useful for out flower work. Each, 20c.

NEW GOLDEN YELLOW CALLA

See Illustration on back page of Cover.

Richardia Elliottiana. The plant has the same habit of growth as the ordinary White Calla, R. Ethiopica, with flowers of the same size and shape, but of a rich, clear, lustrous golden-yellow color; the foliage is dark green, with a number of translucent creamy-white spots, which add to its beauty. We have been fortunate in securing a limited lot at a specially advantageous price, and are now in a position to offer good bulbs of the true variety at the low price of, large bulbs, \$2 50; smaller bulbs, \$1 each. smaller bulbs, \$1 each.

SPOTTED CALLA

(RICHARDIA ALBA MACULATA)

Spotted Calla. This beautiful and popular novelty gives the greatest satisfaction. The leaves are rich, deep green, finely spotted with white. Thus the plant, even when not in flower, is ornamental. It is easily grown, very distinct, free to bloom, and in all other respects is like the favorite old Calla. Two or three bulbs may be grown in a 5-inch pot. (See cut). Bulbs, each, 15c.; 4 for 50c.

LITTLE GEM

RED CALLA (NEW)

(ARUM CORNUTUM)

This exceedingly curious plant produces red flowers spotted with black, and is an object of attraction at all times. The stems are oddly mottled green and white; the foliage is very large, somewhat like a palm in appearance, and is very effective. It is quite easily grown, and will be sure to give satisfaction. Price, each, 20c.; 3 faction. Price, each, 20c.; 3 for 50c.

BLACK CALLA

(ARUM SANCTUM)

A magnificent and re-A magnificent and re-markable variety from the Holy Land. The plant pro-duces one large flower the shape of a Calla, and from 14 to 18 inches long, and 4 inches broad, and of a rich dark purple color and green underneath, somewhat wavy at the border and curled at the smaller end. The spathe

CALLA FRAGRANCE

flower is about to inches long, velvet like and quite black. It is raised on a slender but vigorous stalk of brown red, shading to green at the upper end. The leaves are large and very wavy, of a rich green color, veined light green and resemble exactly those of the Calla Ethiopica. Price, each, 20c.

NEW SWEET SCENTED CALLA

The Fragrance of Violets and Lilies. In this we have not only a charming and useful flower produced in a profusion never before surpassed, if equalled, in a Calla, but also with a genuine, sweet, lasting fragrance all its own, yet similar to that of Violets and Lilies, which has never before been obtained in Callas. Flower is of purest white, the foliage is also unique, being handsomely fluted. To introduce this queen of novelties we offer same at following prices.

Each, 25c.; 5 for \$1.

GIANT CYCLAMEN

Not only are the flowers of striking beauty, but the foliage is also highly ornamental, consequently they are very decorative even when not in bloom. Most of them are, moreover, delicately fragrant. The flowers of this magnificent strain are of extraordinary size for a Cyclamen, and of great substance. Leaves are proportionately large and beautifully marked. Cyclamen, Giganteum Rubrum. Crimson.

—Giganteum Rubrum. Crimson.

—Giganteum Album. White.

—Giganteum Mixed varieties.

Price for any of above, 20c. each, or \$2.00 per doz.

CHLIDANTHUS

Chlidanthus Fragrans is indeed a "delicate flower," delicate in looks and delicious in perfume. The flowers are borne in dense clusters during the months of July and August, and are of a deep canary-yellow; quite large (often 3 or 4 ins.), extremely fragrant. The name of Golden Lily, given to Glycorus Aurea, should by right belong to this. It is one of many new bulbs received by us direct from Peru. Each, 10c.; doz, 75c.

CYCLOBOTHRA FLAVA

Cyclobothra Flava. A lovely little bulb from Mexico, producing 6-pealed cup-shaped blossoms, yellow spotted with brown, and drooping. It is closely allied to the Calochorus, but it does not succeed well for winter blooming, and should be treated like a summer-flowering bulb, planted out in the spring and taken up in the fall, and kept dry over winter. Its foliage is narrow and grass-like. Each, 8c.; perdoz, 75c.

THRA FLAVA

==CANNAS=

The Canna is the coming flower. It is here to stay. Imagine this most beautiful plant, bearing above its broad leaves spike upon spike of the most lovely scarlet and gold Gladiolus-shaped flowers, easier to raise than a Dahlia, and as hardy as a Chrysanthemum; as beautiful as any Orchid, and far more stately, and perfectly adapted for ornamenting every lawn or flower garden from early spring till latest autumn. We have not to be satisfied with flowers of scarlet and gold alone, for there are now varieties reveiling in hues of palest lemon-yellow, deepest orange, pretty fawn and mankeen buit, darkest shades of crimson, and blood red and pure white; others masquerading with particolored, splashed and spotted petals and speckled throats. They are simply grand. For outdoor cultivation plants should be purchased in the spring, and planted in beds or borders; the ground should previously be prepared and well enriched, adding a little sand if the ground is stiff and heavy. The plants will flower through the summer and autumn months. Cannas will repay good treatment and plenty of moisture, but must be lifted as soon as touched with frost and stored in a cool dry place, or under the greenhouse bench during winter. For winter decoration plant in a good sized pot in the fall using light, rich soil, and water well. The varieties we offer are perpetual bloomers, specially selected for their fine foliage and bloom, and of dwarf habit, averaging 3 feet in height; many only grow from 2 to 2½ feet high. height; many only grow from 2 to 21 feet high.

NEWEST CANNAS

Australia. Grows to a height of about 4 feet, leaves dark green with a brown border, flowers very large, salmon red striped with a dark sulphur yellow. One of the best in cultivation. Each, 25c.

best in cultivation. Each. 25c.

Britannia. Height, 3½ feet, with splendid Musa-like foliage, and very large flowers, yellow ground flamed with carmine. Larger than Italia. Each, 25c.

Professor Treub. Height, about 4 ft., with broad lanceolated leaves of a brownish redwith a dark green hue. Flowers large, minimum scarlet striped with salmon red. Among the red leaved Cannas this is one of the most striking and beautiful. Ea., 25c.

Bavaria. Height, about 3 ft. Leaves large, green with a bluish hue. Very larges pixes and flowers of a brilliant golden yellow covered all over with scarlet spots. Quite unique and extremely handsome. Each, 25c.

Asia. Height, about 3 ft. Numerous stalks, dark green foliage, very effective. Very large green greyluar flowers of a rich golden yellow. Inner petals dotted scarlet. Splendid. Each, 25c.

SPECIAL OFFER-One each of above 5 varieties for \$1.

Alphonse Bouvier. Of the many crimson varieties yet introduced, this is, all points considered, probably the grandest and most effective. In color it is a rich brilliant crimson, almost approaching scarlet when it first opens, changing to a deep, dazzling crimson as the flowers fully develop. Each, 16c.

Brilliantissima. Foliage dark metallic bronze, slightly tinted scar-let, giving it a very lustrous and handsome appearance. 3\frac{1}{2} ft. Ea., 10c.

Sam, Trelease. This is one of the finest introductions in the new Sam. I Felease. In its is one of the nnest introductions in the new Cannas. Flowers are of almost ideal form and size, petals being very broad and overlapping each other, making the contour of the flower almost circular. It is the most brilliant of all the scarlet Cannas, being an intense, vivid scarlet. Base of the petals is bright golden yellow, giving the flower a decided yellow centre, a very beautiful combination, producing a very striking effect. It is one of the earliest varieties to come into flower. Each, 20c.

Queen Charlotte. Flowers are large with broad rounded petals, slightly recurved; immense heads; stand well above the foliage and are most attractive in color, being a bright orange scarlet, deeply edged with bright canary yellow. Each, 10c.

Florence Vaughan. A grand bright golden yellow, heavily dotted with bright red spots; very broad petals; spikes large and compact. Of dwarf habit. Each, 10c.

J. D. Cabos. Four feet high. Purplish green follage, stalks umerous, flowers large and round, color exceedingly distinct apricot. Each, 10c.

Mad. Crozy. One of the finest; foliage bright green. Bears immense trusses of orange scarlet flowers, each petal bordered with golden yellow. About 3 feet high. Each, 10c.

Pres. McKinley. It is of medium height, about three feet, and an exceedingly free bloomer, bearing large clusters of massive flowers. The flowers are brilliant crimson with scarlet shading. Each, 20c.

H. Wendland. Undoubtedly the finest Canna now in commerce, Unlike some others the flowers are of excellent substance with heavy, massive petals. Flowers of extraordinary size and beauty, produced in large trusses well above the broad, handsome green leaves. Outer petals scarlet with golden-yellow border, fiery red inside and yellow in centre. It is the best we have yet seen. Height, 4 feet. Each, 20c.

America. The first gigantic flowering Canna with red leaves. Height, about 4½ feet. The beautiful foliage has a dark background, shaded and flamed with green, bronze and purple, and shines as if varnished. The spikes are very large and the flowers enormous, with a yellow throat and petals of glowing red, flamed and streaked with purple—a combination of colors not seen in the Crozy class. Each, 20c.

"Italia." Very distinct in coloring; flowers very large and always show five and frequently six segments. Three of the segments are golden yellow in color and have a large blotch of orange scarlet, surrounded by smaller blotches. The centre and lower segment is scarlet and bordered by a narrow edge of golden yellow. The lower petals are the largest and frequently measure 21 inches in width and are peculiarly fringed and twisted. Each, 15c.

"Austria." While not so gorgeous in coloring is considered superior to Italia, owing to its larger flowers, its rapid growth and majestic Musa-like foliage; comes quickly into bloom, and throws up numerous flowering stems, each being surmounted by tall spikes of large flowers, standing upright like large lilies. The flower is pure yellow, the lower and fifth petals only being slightly spotted with crimson. Each, 10c.

Oceanus. Flowers warm flame color with broad, golden-yellow border, spotted. Inner petals vivid scarlet; leaves green. Remarkably fine. Each, 15c.

SPECIAL OFFER-One each Standard Sorts post-paid for \$1.50.

DAHLIAS

The Dablia is the grandest autumn flower we have. It is in its glory during September and October, when other flowers have faded; they surrender only to the frost. Our collection of Dahlias is grown upon our own grounds, and is without doubt one of the finest in the country. We carefully grow and test new sorts every season; if such are found desirable they are retained, otherwise discarded. Our assortment has taken first premium wherever shown, and cannot but please all buyers. Put Dahlia tubers in the ground when the season becomes warm, covering the neck some 3 in. If many shoots start, thin them out. After flowering, and before hard frosts, take up the plants, remove the tops, dry the bulbs a little and put into the cellar until spring, when they can be divided and replanted. Look at them occasionally to see that they are not shrivelling from too dry an atmosphere, nor starting the eye early in consequence of too much moisture and warmth. Tubers can be forwarded as soon as dange, from frost is past, about 1st April.

-Rossland. Pure deep yellow, turning a little lighter at the tips of the petals, large and very double; a profuse bloomer. Each.

-Sunbeam. Rich crimson shaded maroon, tipped pinkish white. Each

SPECIAL OFFER- Set of 7 illustrated above for \$1, Post-paid.

Collection of 12 your Selection from above Varieties for \$1.50, Post-paid.

"MONT BLANC'

JAPANESE IRIS.

For grand distinctive flowers, yielding a liberal bloom, there is nothing so satisfactory and gratifying as a good assortment of Lilies. All Lilies require deep planting and should not be disturbed for several years. In almost every case flowers will be obtained the first summer after planting, but it will be quite as well for the health of the plant if there is no bloom until the second season. In our northern climate it is well, before winter, to cover the publis with three or four inches of leaves or straw, or coarse manure, as a winter coarse manure, as a winter tection.

-Superbum. Beautiful and rich as many of our native Lilies are, this far excels them all, bearing a pyramid of yellowish red flowers. Blooms early in July; 3 feet. 4 for 50c; each.

-Tiger Lily, Double (Tigrinum Fi. Pl.) A plant to 6 feet high, with dark green foliage, double bright orange-red flower. 4 for 35c.; each.

-Candidum (White Garden Lily). This Lily is the Candidum (White Garden Lily). The regression of the contrast beautifull with the water between the regression of the contrast beautifull with the water beyons. The fragrane is delicious, newer pressive. He yells of 10 st. distinct new varieties, which, both for pato tulure and for masses of color in the open garden, are unsurpassed. All are early flowering and sure to bloom in June or July. They are very bardy, and grow and thrive under almost any conditions. 3 for 50c.; 12 for \$1.75; each...

DIELYTRA, OR DICENTRA

forcing, each

IRIS or Flowering Flag

Iris, Japan (Iris Kæmpferi) The magnificence of these splendid new Iris sur-

these splendid new Iris surpasses description; in beauty, size of flower, richness of coloring, they are grand. The flowers are of enormous size, averaging from 6 to 8 inches across, and of indescribable and charming hues and colors, varying like watered silk in the sunlight; the prevailing colors being white crimson

the sunlight; the prevailing colors being white, crimson. rose, lilac, lavender, violet and blue, each flower usually representing several shades, while a golden yellow blotch surrounded by a halo of blue or violet at the base of the reals intensification.

of blue or violet at the base of the petals intensifies the wealth of coloring. The Japan Iris is hardy; flowers in great profusion in June and July. Attains greatest perfection if grown in a moist soil, or if plentifully supplied with water while growing and flowering. Bulbs, per doz., \$2.00; each 22nc.

of the grandest classes
of Irls. Plants form dense clumps, which send up many flower stalks, each one bearing several large, beautiful flowers
of various colors. No garden should be without them. They bloom early and are very sweet; mixed varieties. Per
doz., 30c.; each, 5c.

-English (Anglica). Large, handsome flowers, with rich purple, blue and lilac colors predominating; grows 18 to 20 inches high; perfectly hardy; mixed varieties. Bulbs, per doz., 25c.; 4 for 10c.
-Spanish (Hispanica). This variety is well adapted for pot culture, blooming in the spring, earlier than the above, but smaller; beautiful shades of violet, yellow, blue and white; mixed varieties. Per doz., 25c.; 4 for 10c.

CINNAMON VINE

Cinnamon Vine. A pretty, hardy vine, with edible roots and neat, glossy cordate foliage. In midsummer it bears clusters of tiny but exceedingly fragrant flowers with an odor like cinnamon. A very pretty vine to train over a trellis or around a window. Each, \$c.; 6 for 25c.

GLOXINIAS

Charming greenhouse plants of dwarf habit. Flowers of the most exquisite and gorgeous colors are produced in greatest profusion. They are often 3 to 4 in. across, and many of them are magnificently spotted, mottled and blended. Under the commonest culture they bloom continuously for months, and by starting at intervals a succession of splendid flowers may be had nearly the whole year round.

Gloxinia, in separate colors, crimson, spotted, white, blue, and blue with white throat. 2 for 25c.; each, 15c.

MILLA BIFLORA (MEXICAN STAR OR FROST FLOWER)

Milla Biflora. A beautiful Mexican summer-blooming bulb. Flowers star-shaped, two inches across, clear wary white, of great substance, enlivened by a frost-like sparkle; the fragrance is delightful. Place a stalk in water and the flowers will all open; we have seen 11 stalks shoot up successively from one bulb. The bulbs flower profusely and with great certainty. Height, 12 to 18 inches. For an effective display, groups of 12 to 25 or more should be planted about 6 inches apart in a sunny bed. (See cut). Each, 8c.; per doz., 75:

Plants came to hand in Good Condition and are all growing nicely. Many thanks for the extra. J. F. W., Manor, Ont.

CHINESE PÆONIES

The old-fashioned Pæony has long been an inhabitant of our gardens. They are among the hardlest flowers we have, and are admired for their large and gay flowers, which are produced in the early summer. While many beautiful sorts have been offered in our Catalogue, we have this season imported, direct from the most celebrated grower in the world, the finest collection obtainable in any list, including new and rare flowering sorts, and many unique and gorgeous double varieties in various shades of colors and markings, and some with very delicious fragrance. The best season for planting Pæonies is the spring; they will succeed in any ground unless owet that the water will lie on the surface; but to obtain the greatest

surface; but to obtain the greatest size of bloom and strongest growth, the soil should be well enriched.

SELECT NAMED VARIETIES

Pæony, Anemonæflora. Crimson. Free flowering; one of best.

—Artimesia. Large bold flowers, guard petals deep blush; centre fawn and blush; a great favorite.

—Lady Bramwell. Light pur-—Lady Bramwell. Light purplish rose, delicate lilac shading; very large and double,
—Louis Van Houtte. Rich purple lake; a noble variety; extra

Striata Specosia. White, diffused with yellow and rose; novel.

Tenuifolia Latifolia. Deep rose, edged pink.

Virgens. White, lightly tinged yellow in centre. Whitlegia. Sometimes slightly tipped with carmine, then passing into pure white; a strong grower, with beautiful broad foliage; early to flower; very best white for cutting.

The above named varieties, each, 20c., or set of 8 for \$1.50.

GAY QUEEN

(OR QUEEN LILY)

(or QUEEN LILY)

Gay Queen. So
called on account of the
beauty of the flowers.
This is a most desirable
bulb called Phædrassa,
which bears large umbels of showy flowers of
a variety of colors. We
have three sorts, viz.:
purplish rose, tipped with
green; scarlet, yellow
and green; green and
yellow flowers. Fine
bulbs, 15c. each; 3 for 40c.

LILY OF THE VALLEY

This beautiful little plant is a universal fav-orite. It is extensively grown for forcing in the winter and early spring months, producing ten-der stems, set with tiny

LILY OF THE VALLEY

bells of snowy white-ness, diffusing a delicate odor. Lily of the Valley. Strong imported clumps; contain a number of large, strong crowns or pips. Each, 30c.

NEWEST VARIETIES OF DOUBLE **PÆONIES**

Pæony, Beaute de Française. Delicate pink, tipped with blush white, each, 65c.

—Candidissima. Double white, very large and full, each, 40c

Fragrans. Bright rose, very fragrant,

- Fragrans. Bright rose, very magazine, each, 65c.

- Globosa. Clear silvery rose, centre white, shaded fawn, immense size, each, 75c.

- Lilacina Superba. Rosy iliac, changing to creamy lilac, very novel, each, 75c.

- Officinalis Carnescens. Clear pink, changing to white; very early, each, 50c.

- Tenuffolia Plena. A distinct plant with elegant divided fennel-like foliage and large full double flowers of a deep rich chrimson; dwarf, compact grower, early bloomer, distinct in character from and other variety, each, 75c.

Set of above 7 varieties for \$4.00 (post-paid).

COOPERIA DRUMMONDI

(THE GIANT FAIRY LILY)

Cooperia Drummondi. It is a member he Amaryllis family, and should be planted of the Amaryllis family, and should be planted in the spring, either in open ground, or in pois (they do as well one way as the other), where they will bloom freely most of the summer, sending up beautiful lily-like white blossoms on stems to to 15 inches high. The foliage is quite long, and of peculiar lavender green color. In the fall the bulbs should be lifted and kept dry over winter, like Gladiolus. It is one of the easiest of all bulbs to grow, absolutely sure to bloom freely, and the beautiful, pure, fairy-like blossoms are ever lovely. Strong bulbs, ready for immediate use. Doz., 50c.; each, 50.

MONTBRETIA CROCOSMIFLORA

This is one of the most floriferous and showy of summer flowering plants, Planted 6 in apart in a group in a sunny position and allowed to remain undisturbed, they produce in great numbers graceful spikes bearing from 18 to 30 showy star-shaped flowers of orange suffused with red. They flower freely the first season. 3 for 10c.; per doz., 35c.

MADEIRA VINE

Madelra Vine. A popular climbing tuberous-rooted plant, sometimes known as "olimbing Mignonette," It is a rapid grower with thick dark green glossy leaves and graceful feathery racemes of fragrant white flowers in great abundance. Being easy to grow and such a beautiful vine and flower, it is deservedly a general favorite. The roots will not endure severe freezing; they should be taken up in autumn and kept over winter in a cellar, requiring no more care than potatoes. Per doz., 30c.; 3 for 10c.

TUBEROSE "SILVER LEAF"

Showy and effective, even when not in bloom, the toliage being distinctly striped white and green. Each bulb frequently throws up two or more spikes, 3 to 4 feet high, each bearing from 25 to 40 pure white, waxy flowers, much like an orange flower or Stephanotis, with a delicate and enchanting perfume. They flower several weeks earlier than double Tuberoses, and the bulbs bloom year after year. 5c. each, 50c. per doz.

This pure white, perfectly double, delightful fragrant flower, invaluable for bouquets, is too well known to need any description. It delights in a strong, rich, deep, well-drained warm soil; manure, beat and water are essential to its perfect development. This variety, which we introduced and named, grows only 24 inches, about half the height of the old double sort, and the flowers are nearly twice the size (often two inches in diameter), and imbricated like a Camella; deliciously fragrant, (See cut.) Extra size bulbs, 5c. each, 50c. per doz., \$3 per 100.

TUBEROSE "ALBINO"

EARLY-FLOWERING BRANCHING

A single white Tuberose. The flower spikes are very large and evenly filled; flowers in July and August, throwing from two to five flower stems from a single bulb, and these again are often branched. The petals recurve gracefully, which adds greatly to the size of the individual flower; it is entirely free from the brown tint common to the old sort on the back of the petals, being of the purest waxy white, making it most valuable for cut flowers. When first seen, it might be said to resemble a Stephanotis, or some species of Jessamine as much as a Tuberose, both in appearance and fragrance, for the odor is less heavy than that of the ordinary Tuberose. Sc. each, 50c. per doz.

TUBEROSE "ALBINO"

TIGRIDIAS

PEACOCK TIGER FLOWER, OR MEXICAN SHELL FLOWER.

Extremely handsome summer flowering bulbs, growing about 2 feet high, producing large gorgeous flowers, exquisitely spotted; blooms freely throughout the summer, particularly if the bulbs are planted in a warm, sunny position.

Tigridia Conchiflora. Mexican Shell Flower. Dark yellow, large red spots; 5c. each; per doz., 50c.

Tigridia Grandiflora, Peacock Tiger Flower. Very large, bright crimson centie, mottled with yellow; 5c. each; per doz., 50c.

Tigridia Grandiflora Alba. White Tiger Flower. Flowers large ivory white, spotted at base with red on a yellowish ground, contrasting finely with the white of the petals. (See cut). 10c. each; per doz.

VARIEGATED GLADWIN

HYACINTHUS CANDICANS (GIANT SUMMER HYACINTH)

Hyacinthus Candicans. This plant somewhat resembles the Yucca, although not so large. It throws up a flower stem about 4 feet high, on which it bears from 13 to 20 pure white bell-shaped flowers. They are very gracefully hung, forming an almost perfect pyramid. Give them a trial. 8c. each. Per doz., 75c.

SPIDER LILY

"WHITE"

Spider Lilly, 'White.'
A bulb of easiest culture, which freely produces cluerers of large white flowers of delightful fragrance. They may be grown in pots, in good rich soil, and will bloom well in the house or conservatory. When planted out in summer they must be taken up in the fall, potted, and little or no water given until the next season, when the bulb will have increased in size, and will bloom more abundantly. Large bulbs for immediate blooming 3 for 50c.; each, 20c. 50c.; each, 20c.

VARIEGATED CLADWIN

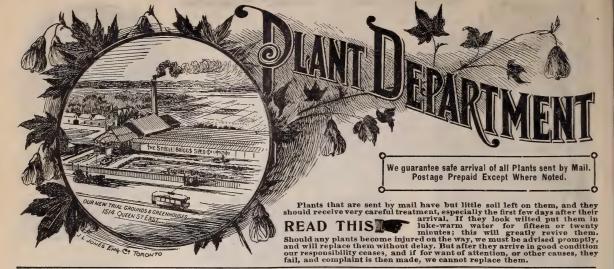

Variegated Gladwin. Variegated Gladwin.

A hardy ornamental plant.

Its leaves resemble those of
the Pandanus, being variegated with white and green
stripes. The flowers are of a
pleasing blue, and freely produced; and that is not all, for
they are succeeded by large
capsules, which burst open
when ripe and expose a
number of bright red seeds.
(See cut). Each 25c.

"Plants arrived in splendid condition, and are in every way satisfactory." M. H., Chester, N.S.

ABUTILON

ABUTILON

The Abutilons are often called flowering maples. They are well adapted for greenhouse or house culture; of vigorous growth, clean foliage, and give a profusion of beautiful pendulous bloom.

Abutilon, Eclipse. Excellent trailing plant for baskets, with large foliage beautifully marked with deep green and yellow. Flowers bright yellow with crimson throat. Each, 15c.

—Enfanta Eulalie. A superb new sort, remarkable for its great blooming propensity, coming into flower when only a few inches high and contuning throughout the summer and winter. The flowers are large and cupped, of an exquisite soft, satiny pink, Each, 15c.

—Golden Fleece (Golden Bell). Far eclipsing all others of its kind and color. The habit of the plant is perfect, and the rich golden yellow flowers are produced in great profusion. Each, 15c.

—Thompsonii Plena. The first double flowering Abutilon in existence perfect double, like a miniature holyhock; color a deep orange, shaded and streaked with crimson. Each, 15c.

—Souvenir De Bonn. A very distinct and striking new plant with large bright green leaves, distinctly edged with a pure white band. The plant is of strong, robust growth and forms fine specimens in a very short time. The long-stemmed flowers are bright orange, veined with crimson, and stand well out beyond the foliage. Each, 15c.

—Savitzi. This is one of the most beautiful variegated foliage plants, both for the house and outdoors. It somewhat resembles Souvenir de Bonn, but is superior to this, the variegation being pure white, the white predominating, and in some cases the leaves are almost entirely white. It is of dwarf, compact growth, it thrives well outdoors, retains its variegation in the hottest sun. It is most admirably adapted as a border for Cannas, Geraniums, and other taller growing kinds. We have tried it and found it most satisfactory. Each, 15c.

Special Offer—One each of the six varieties for 75c.

Special Offer-One each of the six varieties for 75c.

ASPARAGUS SPRENGERI

ASPARAGUS SPRENGERI

ASPAKAGUS SPRENOER!

A most desirable new species, especially useful to grow as a pot plant for decorative purposes or for planting in suspended baskets; the fronds are frequently 4 ft. long, are of a rich shade of green and most useful for cutting, retaining their freshness after being cut for weeks. It will make an excellent house plant, as It withstands dry atmosphere and will succeed in almost any position. No introduction of recent years has made such a favorable impression as this graceful Asparagus. We have a large stock of it and offer good strong plants at 25c.

ASPARAGUS

Plumosus Nanus. This graceful climbing Asparagus has to a great extent taken the place of the once popular Smilax in all fine decorations. It possesses the advantages of being much more graceful, its foliage being finer than that of the most delicate fern, and will last for weeks after being cut, the whole plant being of a bright, cheerful green. It is an excellent house plant, succeeding under almost any conditions. 25c. each.

COBEA SCANDENS

Elegant, rapid-growing climbers, 20 to 30 feet high, that can be grown in the greenhouse or conservatory, or in the gar-den in summer where from their luxuriance they are particularly desirable for covering arbors, walls, etc.; flowers are large and bell-shaped.

ARAUCARIA EXCELSA

NORFOLK ISLAND PINE

Araucaria Excelsa. Various names have been suggested for this grand plant to properly convey to the mind the appearance of it. Some bave called it the "Christmas Tree Palm," from its resemblance to a Christmas tree; others have called it the "Star Palm," because the leaves are arranged to form a perfect star, but no descriptive name can give any adequate idea of its beauty. It has deep green, feathery foliage, arranged in whorls, rising one above the other at regular distances; its symmetry of form, grace and beauty of foliage are unequalled in the vegetable kingdom. It is easily grown in the house and is highly ornamental. 5 in, pots, 12 to 15 in. high, \$1.50. By express at purchasers' expense.

-Excelsa Glausa. Similar to the above except the color of foliage, which is of a beautiful bluish color. 6 in. pots, 15 in. high \$2.00 each. By express at purchasers' expense.

-Robusta Compacta. Differing from the Excelsa in its more robust habit and compact growth; color deep rich green. 5 in. pots, 12 in. high, \$2.00 cach. By express at purchasers' expense.

ARAUCARIA EXCELSA

BEGONIAS

We know of no class of plants better adapted to amateur cultivation than these The beauty of their foliage, combined with their graceful flowers and free blooming qualities, tends to make them one of the quanties, tenus to make them one of the most desirable class of plants grown. They require an average of 70 degrees to bring them to perfection. As pot plants for sum-mer or winter decoration they have but few

MANICATA. Large glossy leaves beautifully blotched with creamy white, with carmine etchings in the mature leaves. Flowers, delicate blush white on long stems. It is easily grown, and is one of the finest ornamental foliage plants for the house imaginable. Each, 25c. SEMPERFLORENS GIGANTEA

carmine red, and are borne in large panicles. It is one of the best of the new Begonias, and possesses vigorous habit. The flowers are unusually large and brilliant, and stand well above the foliage. Each, 15c.

WELTONIENSIS. An exceedingly fine Begonia, with small leaves of a delicate shade of green, stems and leaf stalks bright crimson, blossoms of waxy pink, produced freely in summer and autumn. Each, 15c BEGONIA REX. We offer ten of the most distinct and handsomely marked varieties of this beautiful class of Begonias. They are grown for their variegated follage, and are very desirable for house and garden decorations, in shady positions, and especially well adapted for baskets, vases, etc. Each 15c.; 4 for 50c. ARGENTEA GUTTATA. A handsome foliage variety, purple bronze leaves, oblong in shape, with silvery markings, white flowers. An excellent pot plant. Each, 15c.

OLBIA. A grand variety. The leaves are from seven to ten inches in diameter, and are separated into deep, sharp points. The color is varying shades of brown and red, varying shades of brown and red, the young leaves being very bright. It has large flowers of lemon white; one of the richest colored foliage varieties. Each, 25c.

PRESIDENT CARNOT. A strong growing variety, of stiff upright habit; foliage large, somewhat in style of B. Rubra, but more than twice as large; upper side deep green, under side purplish red; flowers beautiful coral red in large pendant panicles. Each, 15c.

PROPUSION. Flowers bright pink, produced evenly all over the plant. One of the finest for house or summer bedding. Each, 15c

NEW BEGONIA MARJORIE DAW. A strong healthy grower, of semi-climbing or trailing habit. Foliage deep glossy green. Flowers a beautiful shade of salmon pink produced in long drooping clusters. An excellent plant for vases or large baskets. Each, 20c.

MARGUERITE. Leaves bronzy green, somewhat resembling Metallica, covered with large trusses of light rose colored flowers. Ea., 15c.

GLOIRE DE SCEAUX. Is of upright habit, producing during the entire winter, large, open-flat flowers, of a soft, silky pink. Ea., 15c.

GLOIRE DE SCEAUX

COUNTESS LOUISE ERDODY. This variety is sometimes called "Snail Begonia" on account of the peculiar formation of the leaves. The form is exceedingly odd and unique. The striking peculiarity which distinguishes it from all other Begonias consists in the fact that the two lobes at the base of the leaf do not grow side by side, but one of them winds in a spiral-like way until in a full grown leaf there are four of these twists lying on top of the leaf there are four of these twists lying on top of the leaf nearly two inches high. The leaf has a metallic lustre, dark silvery in the centre, shading into coppery red towards the margin, which is broadly and evenly edged with the same hue, but darker and more brilliant. An exceedingly curious and interesting variety. Each, 20c.

THURSTONI. A beautiful stately plant with

THURSTONI. A beautiful stately plant with remarkably handsome, glossy foliage. The under side of the leaves is a rich, purplish red, the veinings very prominent, while the face, or upper side, is a bronzy green, shaded with crimson and olive, with a peculiar glossy metallic lustre over all. Flowers rosy white in large clusters, well above the foliage. Each, 15c.

MANICATA

BEGONIA COUNTESS LOUISE ERDODY

ALBA PICTA. Leaves glossy green, thickly spotted with silvery white. Flowers white. An excellent sort. Each, 15c. ERFORDIA. We can recommend this variety as being one of the very best. It grows in symmetrical, compact form, with shining green foliage, while it is continually covered with clusters of rosy salmon flowers. Most prolific bloomer. Each, 15c. RUBRA. One of the finest Begonias in cultivation. Its dark, glossy green leaves, combined with its free-flowering habit, make it one of the very best plants for home or conservatory decoration. The flowers are a scarlet-rose color, and are produced in the greatest profusion. produced in the greatest profusion,

GOLIATH. This magnificent Begonia is of the Semperflorens type, with immense luxurious leaves and large apple-blossom flowers, is of French origin and considered to be one of the very best of this type. It is a very free bloomer and easily grown. Each, 25c.

BOUQUET PARFECT. A dwarf variety of French origin with small white flowers borne in greatest profusion. It is a most beautiful sight when in full bloom, the plant being literally covered with blossoms. Each, 15c.

SPECIAL OFFER.—One each of the 5 illustrated varieties for 75c. by mail (post-paid).

BEGONIA RUBRA

BRUGMANSIA ARBOREA

BECONIA GLOIRE DE LORRAINE

This is undoubtedly the greatest gem in Winter Flowering Begonias yet introduced. It grows from 12 to 15 inches high, forming naturally graceful bushy specimens, which, from October to April, are completely smothered with soft rosy pink flowers, and is a plant that is destined to become very popular. Nice young plants, each, 30c.

BECONIA TRIOMPHE DE LORRAINE

Compact dwarf habit, deep green foliage, a very profuse bloomer, flowers quite double; petals nicely imbricated; color of the buds and flower when opening a bright scarlet, the interior of the flower changing to a cherry-carmine when fully developed; the stamens are bright golden yellow, contrasting nicely with the colors of the flowers. This will prove a valuable sort for those who cannot grow Gloire de Lorraine, and it is a grand bedding plant as well. Each, 20c

BECONIA ERFORDII

This is the bedding Begonia par excellence. It is used in the Chicago parks by the thousands. The leaves are about the same size as those of Vernon. The habit is branching and very vigorous and free. Very dwarf, growing only about 12 in, high. The flowers are soft pleasing pink with yellow centres, and produced in the most wonder ful profusion that can be

BRUGMANSIA

Brugmansia Arborea, often called "Wedding Bells" and "Angel's Trumpet." This is one of the easiest to grow, and best hard wooded plants for pot culture. It forms a pretty bushy plant, and grows to several feet in height; when two or three feet high it is a marvel of beauty, being literally covered with large pendulous blooms, of a rich creamy white color and of long trumpet shape, often measuring from 8 to 70 inches long, and 5 to 6 inches wide, and of a texture like thick fluted satin. The fragrance is delicately sweet, and the flower lasts for days in perfection, while new buds are constantly forming. It can be wintered in a cellar without water, or kept in growing condition as a winter decoration plant, Very attractive for the lawn during summer. Each, 20c.

BOUGAINVILLEA GLABRA SANDERIANA

This new Bougainvillea, grown in a greenhouse, has continued flowering for seven months, small and large plants alike being covered with blossoms. Even plants in thumb-pots were laden with bloom. The house in which our plants have been cultivated has been a sheet of flowers from May until December. It produces as freely as a Fuchsia its dazzling rosy crimson flowers, lasting so long in perfection, and produced in smallest pots under all conditions, in amazing profusion. Each, 25c.

BOUGAINVILLEA

CAREX JAPONICA VARIEGATA

This new decorative gem will find a place among palms, ferns and dracenas, Its slender green foliage edged with white cannot be equalled by any other plant. It is extremely easy to grow, will stand heated atmosphere with impunity, and can be carelessly handled without being damaged. Decidedly a plant for florists and for Indoor culture, and yet it is hardy in the garden. Each, 15c.

CORDOLINE, or DRACENA

Cordoline Indivisa. One of the most useful classes of plants for decorative purposes. The narrow leaves are green and bronze; a very graceful plant for the centre of vases or hanging baskets. Each, 20c.

CYPERUS

(OR UMBRELLA PLANT)

A strikingly handsome plant, sultable for house or outside, of easy culture, and sure to give you complete satisfaction. It reproduces itself from the roots, and may be sub-divided. It requires an ample supply of water, and is almost an aquatic plant. Each, 10c.

EUPHORBIA, or THORN PLANT

Not many plants will give greater satisfaction than this, because of its easy growth and beautiful coral red flowers well set off by its clean, green foliage. Produced in abundant trusses during the entire season, and especially in winter, when flowers are scarce. The stems are not so thorny but that they can be trimmed into various graceful forms, as shown in cut. The Japanese have procured some wonderful examples in that line. Altogether it is sure to please, no matter how grown. Each, 15c.

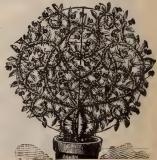

CAREX JAPONICA VARIEGATA

BUTTERFLY ORCHID

(EPIDENDRUM VERNOSUM)

This splendid Orchid is one of the very best. All that is necessary to grow it successfully is to secure the plant and a little moss bunched around the roots to a jece of board or bark, and suspend it, in a window or conservatory. Keep the moss wet and plant free from dust, and you will have a unique and beautiful object. It blooms freely, producing large panicles of gay flowers, which keep perfect a long time. The flowers are composed of several colors; delicate, butterfly-like. Strong plants of blooming size, each, 25c.

FARFUCIUM CRANDE
(LEOPARD PLANT)
A grand decorative plant and extra fine
for shaded rooms where few variegated plants
will retain their color or markings. This is
as easy to grow as Geranium. Round, thick,
leathery leaves, with large yellow spots contrasting beautifully with the dark green
groundwork. Each, 25c.

nealthy and vigorous. Each, 15c. —Melba. This is a grand combination of good qualities; free bloomer, early and continuous; in point of color the finest pink carnation yet produced; large and perfect form, very fragrant; long stiff stem. Each, 10c. —General Gomez, Brilliant cardinal maroon, 2½ to 2¾ inches in diameter. Strong, vigorous, very healthy habit. Flower is full and well fringed, and of a very pleasing form. Each, 10c. —Portia. A valuable addition to the list of Carnations. Flowers of a brilliant scarlet, and remarkably sweetscented; on this account the flowers are always in great demand. Plant a strong grower of bushy habit, Each, 10c. —Triumph. This grand variety will not take rust, though surrounded by it. Color, a pure bright pink; blooms of the very largest size. Each, 10c. KING CACTUS CACTUS A magnificent day bloomer. A fitting companion to the Queen. The enormous flowers are rich crimson, with a delicate purple shading towards the centre. Uncommon for a good plant to have more than 50 flowers standard open at once. Each, 25c. STADEL STAPELIA CACTUS Stapelia bears beautiful and very large flowers of valeathery texture, buff yellow with maroon markings of wonderful construction. Astonishes with its profusion of bloom and distinct character. It grows with the greatest ease in any kind of soil, and flowers when quite small. Each, 15c.

EVER-BLOOMING = CARNATION =

No other flower is more admired for winter-flowering in the No other Hower is more admired for winter-flowering in the greenhouse or window garden. They are the main dependence of the average florist for cut bloom during winter. The best way to obtain them is to get young plants in the spring and put them out in the garden. Keep the tops of all long shoots pinched off so as to form compact plants; and nip off all buds that appear previous to the first of August; after that allow all to grow. Take up and pot the plants the first of October and remove to the house; they will soon commence to bloom and continue through the winter.

Carnation, The Marquis. In our estimation this is one of the very best. The color is a true pink with no trace of magenta or purple, an exquisite shade, soft, yet rich, that is equally beautiful by artificial or daylight. Its form is perfect; full and double with nicely raised centre and fringed petals, very fragrant. In size 3 to 3½ ins. in diameter. Each, 15c.

— General Maceo. Brilliant cardinal maroon, 2½ to 3 ins. in diameter. Flower is magnificent; in fact no crimson Carnation possesses such a vivid brilliant color. Each, 16:

Glacier. A charming white, flowers of good size, a heavy cropper. Each, 15c.

-America. Color a pure scarlet of soft even shade. The variety has been and still is in perfect health. We have never seen rust, spot nor stem rot attack it. It is a vigorous grower of medium height. Each, 10c.

—G. H. Crane. We do not hesitate to recommend this as the coming scarlet Carnation. Flowers are of the very largest size, intense brilliant scarlet, showing no tendency to fade, delightfully fragrant. Stems are long and remarkably firm, holding the flowers erect. It is a strong, healthy grower, beginning to bloom very early in the season; an exceedingly tree bloomer—much freer than most of the large-flowered sorts. Foliage is clean and healthy. Each, 15c.

—Daybreak. Of perfect habit and a very healthy grower; every flower is borne on long individual stems, there never being more than one bud on a stem. Flowers are of largest size and perfectly double. Color, clear, bright flesh tint, without shading. Each, 10c.

-Flora Hill. A grand white variety, and destined to be found in every greenhouse because of its easy management. Each, 10c.

-Gold Nugget. A really nice, clear yellow, with very little markings; good sized flowers produced on good stiff stems and very free; the plant is also very healthy and vigorous. Each, 15c.

—Victor. Is considered by many expert Carnation growers the best dark pink variety. It has all the good qualities of the parent, besides being a more vigorous grower and having a longer and stronger stem. Each, 10c.

—White Cloud. Unquestionably the finest bold handsome white we have to date, the flowers are large, well built, with good calyx and extra fine, strong stem; plant strong and very vigorous, producing flowers very freely. Each, 10c.

Wm. Scott. Flowers large and non-bursting, of a deep pink, a little irregular, but not to any disadvantage. Each, 10c.

SPECIAL OFFER-6 of above, your selection, for 65c.

FICUS OR INDIA RUBBER TREE Ficus Elastica.

one of the very best for table or parlor decorations; its thick leathery leaves enable it to stand excessive heat and dryness, while its deep glossy green color always pre-sents a cheerful aspect. 15 to 20 inches. Each 75c. (post-paid)

CHENILLE PLANT (ACYLPHA SANDERI)

The most sensational new plant introduced for many years, and one of the most sensational new plant introduced for many years, and one of the most striking flowering ornamental plants we have ever seen. It is of strong free growth with large dark green leaves, from each axil of which one or two feet long and nearly one inch thick rope-like spikes of velvety crimson flowers are gracefully suspended, as shown in our illustration, which conveys but a faint idea of the beauty and distinct warm coloring of this splendid acquisition. The plant is in flower the year round and is as easily grown as a coleus, simply requiring a warm temperature to develop its full beauty. Each, 25c.

NIGHT BLOOMING CEREUS (THE QUEEN OF NIGHT)

Imagine a dozen flowers unfolding with the setting sun their hundreds of white war-like petals, encircled-by a wreath of gold. Imagine such a flower two feet in circumference, perfuming the surrounding air with the most delicious fragrance known. It grows and blooms with the greatest ease, requiring absolutely no care, living for months without water, increasing in value yearly. Each, 25c.

LOTUS PELYORENSIS

Coral Gem. The Garden says of it: "Its cylinder branching habit is most striking, and the silvery foliage even more so. Without its flowers it might also be described as a "Silvery Asparagus." But the bright coral-red flowers, measuring two inches in length, are really beautiful, greatly reminding one of a rare and beautiful Clianthus, so difficult to grow, while the gem is of the easiest possible management. Its drooping habit also makes it useful for hanging baskets." Each, 20c.

OSTRICH PLUME CHRYSAN-**THEMUMS**

Chrysanthemum, Mrs.
Alpheus Hardy. Pure
white, immense, broad potalled and incurved, the surface downy, like loose-piled
plu sh, frosted glittering
white. Each, 15c.
—Mr. Higginbotham.
A rich bright yellow, very
hardy. Each, 15c.
—Monarch of Ostrich
Plumes. Deep chrome yel
low, shaded buff and orange
long broad petals curiously
cut. Each, 15c.
—L. Boehmer. Color

cut. Each, 15c.

—L. Boehmer. Color an exquisite shade of silvery pink, with deep rose on the inside of petals, These curve gracefully inward, and have the same wonderful hair-like growth on them as Mrs, Alpheus Hardy. Each, 10c.

—W. A. Manda. The new golden yellow hairy Chrysanthemum; flower very large; borne upright on a stout stem. Each, 10c.

—Enfant des Mondes. A magnificent white sport from L. Boehmer, partaking of all its good qualities. Creamy white, free flowering with a perfect habit. Each, 15c.

SPECIAL OFFER.—The set of 6 Ostrich Plumes for 65c.

SPECIAL OFFER.-The set of 6 Ostrich Plumes for 65c.

GOLDEN STAR OXALIS (OXALIS ORTGIESI)

This may well be called the "Everblooming Oxalis," as it blooms almost the Ins may well be called the "Everlooming Oxalis," as it blooms almost the whole year round. Being of rapid and busby growth, it is soon covered with hundreds of its clear yellow flowers, lasting many days and succeeding each other continually. The foliage, as will be seen from our illustration, is-of peculiar, fish-tail form, dark clive green above and purple beneath, colors which contrast beautifully with the golden yellow flowers. It will prove a very valuable and ornamental pot plant for the parlor or the garden, and a source of delight wherever grown—winter and summer. Plants, 25c.; 3 for 60c.

PLUMBAGO,

Capensis. A plant worthy of more general cultivation; producing large trusses of delicate azure blue flowers. Excellent for bedding out in summer or growing in pots for single specimen plants. 10c.

Capensis Alba. Equally as desirable as Plumbago Capensis and identical in every respect but color, which in this variety is beautiful creamy white. 10c.

STEELE, BRIGGS' DOUBLE FRINGED PETUNIAS

We devote much effort to the cultivation of the Double Petunia; we spare no pains or expense to obtain the best results, and as a consequence we succeed annually in raising a succession of fine varieties, which were the admiration of thousands of people who visited our Trial grounds the past summer. They are all beautifully fringed and exhibit every shade and marking found in Double Petunias. Each, 15c.; \$1.25 per doz.

CHRYSANTHEMUMS

Young plants should be obtained in the spring, and may be either planted in ground or remain in pots, by sinking the pots well below ground; in this way they will require repotting about twice during the season. As soon as the plants begin to throw up shoots pinch off the tops, and repeat this two or three times up to August 1st not later, as the buds then begin to form. In September or October those planted in the open ground should be lifted and potted after copious watering the day before. The plants will soon recover the effects of lifting if kept in a sheltered, shaded place a few days. They must be fed liberally with water and liquid manure, or water and mulching with well rotted oow manure. Never let your plants wilt, nor expect large perfect flowers, allow only one bud, not more than two buds, to each shoot; remove all other buds as soon as or before they reach the size of small peas, but exercise care not to injure the shoots when disbudding.

The Following Varieties 10c. each; \$1 per doz., except where noted. Chrysanthemum, Timothy Eaton. Is the largest globular Japanese incurved variety introduced; the stem is stiff and flower round in form. Color, creamy white and texture good. Each, 25c.

—Polly Rose. A pure white sport of Glory of the Pacific. Each, 15c.
—Pennsylvania. Bright clear yellow, fine form and splendid bloom.

Each, 15c Each, 195:

—Col. D. Appleton. A magnificent Japanese incurved, bright yellow in color, of great depth and solid build, not showing centre. It is of immense size, very strong in stem, and with good strong foliage. Each, 15c.
—Peter Kay. An immense yellow variety, a favorite for exhibition purposes. Each, 15c.

Peter Kay An immense yellow variety, a favorite for exhibition purposes. Each, 15c.

Adula. Pure white and fine, bold, handsome flower, incurved with good stem, and foliage nearly up to the flower; the very best late white we have ever tried, and a good keeper.

—Glory of the Pacific. Pink, of good form, large size, with broad, finely reflex petals, showing lis clear, pink color to great advantage.

—Ivory. Snow white, perfect form, flowers large, incurved; very early; 2½ leet.

—Mrs. Trenor L. Park. Deep clear yellow, incurved, the lower petals reflexed, forming a bold, handsome flower; extra good stem, with foliage close up to flower. Each, 15c.

—Wivian-Morel. Deep rose, reflexed, one of the best. Each, 15c.

—Major Bonaffonn. Soft clear yellow; globular incurved, full centre, 3 ft.

—Geo. S. Kalb. Reflexed. 2½ to 3 feet. Extra early. Terminal buds, 5 to 6 inches, full centred bloom, pure white. Strong stems foliaged well up to bloom. One of the very best early whites.

—Mrs. Henry Robinson. Purest white, immense, incurved, broad and channelled petals; bloom large and globular, very early. 3 feet.

—Mrs. H. Weeks. An immense flower with broad claw-like petals, incurving to form a globe of white, a few outer petals reflexing; medium height. A grand variety and sure to become a leader.

—Philadelphia, White, illuminated with lemon yellow, blooms large, globular, incurved and whorled; indispensable for exhibitions. 3 feet.

—Pink Ivory. Shell pink, incurved, large, early; florists' favorite. 2½ feet.

—Pronto. This splendid new variety is of Canadian origin and received a certificate of merit at Toronto Chrysanthemum Show. The color is a deep golden yellow, the blooms are of the largest size without a trace of coarseness; stem strong with good foliage right up to the flower, 2½ feet. Easy to grow and a splendid keeper. Each, 15c.

OXALIS GOLDEN STAR (ORTGIESI)

MADAM BRUANT

—Speciosa. This is a genuine winter bloomer, and all who know it value it very highly for this quality. The habit of the plant is erect and compact, presenting a decidedly neat and attractive appearance as a pot plant. The flowers are four inches or more in length; the tube and sepals bright rose; corolla brilliant carmine. It blooms quite freely, plants in two-inch pots frequently producing flowers; but large, well-established plants will bloom more freely and produce larger clusters. Each, 10c.

Trailing Queen. The Fuchsia differs from all others in habit of growth. Instead of growing upward the young branches spread out toward the edge and then droop downward, continuing this way until the vines are 4 feet or more in length, and covered with handsome foliage. The flowers are borne in clusters, large, long and graceful. The corolla at first is deep violet purple, changing to crimson; buds, tubes and sepals rosy scarlet. Each, 15c.

SPECIAL OFFER—We will mail (post-paid) the above 10 varieties of Fuchsia for \$1.

GLOIRE DES MARCHE

FUCHSIAS

Fuchsia, Madam Bruant. This is a novel and destinct new Fuchsia, entirely different in color from any other variety with which we are acquainted. The flower is very large and double. A fine large rounded corolla with strongly recurved sepals as shown in our engraving. The corolla is a delicate heliotrope color, suffused with rose, slightly marked and veined with carmine; sepals deep coral red. Plant avigorous grower and of fine graceful habit. This is a decided new color in Fuchsias, which, combined with its fine large flowers and splendid habit, will make it popular with all lovers of this beautiful class of plants. Each, 20c.

—Gloire des Marches. A new distinguished French Fuchsia, which promises to be a most useful variety. It is a strong grower, of fine upright branching habit, very abundant in bloom. Corolla large, double and pure white; sepals bright red. One of the finest double white Fuchsias we have yet seen. Lovers of this most attractive flower will find it a gem. Each 20c.

—Phenomenal. A giant among Fuchsias. The largest that has ever come to our notice; a reddish crimson color, corolla very full and double, of a beautiful azure violet, flaked with red. Each, 10c.

-Storm King. One of the numerous varieties of Double White Fuchsias sent out the past few years; this is certainly perfection. It is of strong, vigorous growth, of elegant habit, free from all disease, and produces its pure double white flowers in the greatest profusion. Each, 10c.

—Sunray. A fine and distinct decorative Fuchsia, being by far the best, with red variegated leaves; quite ornamental and beautiful. Each. 15c.

Fuchsia Fulgens. The grandest of all winter bloomers. This is really one of the most charming and desirable Fuchsias in cultivation. It is a genuine winter bloomer, and all who know it value it very highly for this quality. The habit of the plant is erect and compact, presenting a decidedly neat and attractive appearance as a pot plant. The flowers are four inches or more in length; the tube and sepals bright rose; corolla brilliant carmine. It blooms quite freely, plants in two-inch pots frequently producing flowers; but large, well-established plants will bloom more freely and produce larger clusters. Each, 15c.

—Little Beauty. A real gem; begins to bloom when only 2 or 3

Little Beauty. A real gem; begins to bloom when only 2 or 3 in. high, and continues loaded with flowers the whole seas on; more than one hundred flowers and buds have been counted on a single plant at one time; the tube is bright red with purple corolla, one of the loveliest and most fatry-like flowers. Ea., ISc..

—Lord Macaulay. This splendld new single variety is a very rapid grower and free bloomer, with a large expanded corolla of the depets purple; sepals are a little lighter in color. We especially crommend this variety for house culture. Price, each, 10; ecommend to variety for house culture.

HOYA CARNOSA (WAX PLANT)

This is an old favorite whose popularity seems to steadily increase. The flowers are bluish white in color, resembling war, and are borne profusely in large umbels. Foliage is thick and fleshy, very handsome in appearance. A quick grower and good bloomer. For window and parlo fullure in winter it is a most beautiful and valuable plant. Fise plants, 20c.

FUCHSIA FULGEN

GERANIUMS Our list embraces many new and the most desirable old and standard varieties suitable for bedding and pot culture. Nothing is more desirable than a bed of bright

IVY-LEAF GERANIUMS

A splendid class of climbing or trailing Geraniums, adapted for baskets, vases, rock work and trailing on trelliess. They bloom with the greatest freedom during the spring and summer. The following are among the newest and best varieties in culti-

vation:

Geranium, P. Crozy, A grand hybrid between the Zonales and Ivies, having the foliage of the former, but very heavy in texture, while the forms of truss and florets are found only among the Ivies; the color isof soft bright scarlet, with veinings of maroon; the habit is perfect. A grand bedder.

—Beauty of Castlehill. A most beautiful variety, producing enormous flowers of a lovely soft shade of rose, with a dark blotch on the upper petals.

—Gen. Championnet. A grand scarlet, as double as a rose, and of large size.

—Souv. Chas. Turner. One of the finest of its class. The color is a deep bright pink, approaching to scarlet, the upper petals feathered maroon; quite double. This variety has been awarded numerous certificates at all the leading horticultural societies. societies.

Each, 15c.; the set of 4 for 50c.

PELARGONIUM

Sometimes called Lady Washington Geraniums. They are well adapted for pot and greenhouse plants, but unsuitable for bedding purposes; the flowers are very large and showy, the petals of which are usually blotched and striped. Each, 15c.

SINGLE VARIETIES

Geranium, Renomme Lyonnaise. This splendid single Geranium is one of the very best varieties we ever sent out. The flower is glowing rosy scarlet, with white eye and large white blotches on the upper petals; the flower is quite circular and dazzling beyond description. Each, 20c.

—Paul Kruger. This is the best single geranium yet introduced, In color it is orange scarlet with chocolate veins running to the centre. It is very free-blooming and throws its immense truss well above its fine foliage. It is a splendid bedder and one of the most compact growers we have yet seen. Plants, each, 15c.

—Madame Bruant. A grand variety wholly distinct from any other in cultivation. White, veined with carmine lake, florets regularly bordered with bright solferino, the arrangement of color is exquisite, often intermingling and producing a striped effect; the trusses are large and beautifully formed; the plant is a good healthy grower and very free flowering, Everything considered, this is the most distinct and wonderfully colored variety ever sent out. Each, 20c.

—Mrs. E. G. Hiil. A most pleasing shade of salmon, with light shading at the centre trusses, which are very large. Plants, each, 10c.

SWEET-SCENTED

Our collection contains roses, variegated, nutmeg. mint, apple and other beautiful sweet-scented varieties. Plants, each., 10c.; per doz., \$1.

Geranium, Mrs. Taylor. A variety of the Scented Geranium, with a rose fragrance and large deep scarlet flowers of the Hybrid Perpetual class. Combining, as it does, free flowering qualities with fragrant foliage, it is very useful for summer cut flowers, and as a pot plant it cannot be surpassed. Plants, each, 15c.

are among the best.

Geranium, Mrs. Pollock. Leaves bright bronzy red zone, belted with crimson and edged with golden yellow. A beautiful variety. Plants, each, 15c.

—Sunset. A rich, broad, golden outer belt, the inner margin of which is overlaid with a bright carmine, and zone of flame scarlet tints. Plants, ea., 15c.

—Mme. Selleroi (Silver Variegated). Very fine for massing or bordering. A thrifty, healthful grower, rarely reaching a height of more than 10 inches. Leaves very small, of a peculiar green, edged with pure white. Plants, each, 10c.; per doz., 90c.

Geranium, Ada Corette. Dark rose pink, of fine habit, and a splendid bedder. Plants, each, 10c.

Plants, each, 10c.

—New Life. The Double New Life, as may be judged from our illustration, is a much greater sensational departure in every way. The outer florets are brilliant red; in the centre of these appears another semi-double floret, pure white in color, effecting a very charming contrast, difficult to realize unless seen; and having the appearance of being produced artificially. Each, 15c.

—Mad. Landry. Flowers very long, in immense trusses on long, rigid stems; semi-double. Plant remarkably free in bloom, being a mass of flower until the end of the season; color, rich salmon, shaded orange, edge of petals of a brighter shade than the rest of the flower; beautiful and distinct. Each, 15c.

—Thomas Mechan. Double, extremely large to

orange, edge of petals of a brighter shade than the rest of the flower; beautiful and distinct. Each, 15c.

—Thomas Mechan. Double, extremely large trusses and very large florets; almost circular in form; color quite new in this type, brilliant rosy pink, the base of the upper petals marked orange; a noteworthy variety. Each, 15c.

—Mad. Turquin Noizet. A beautiful and peculiar shade of rose, deeper at centre with shading of orange. This is entirely distinct from all other varieties, and is, in our estimation, one of the best in the list of new varieties. Each, 15c.

—Mad. Barney. An excellent bedding variety. Plant a robust, free grower and constant bloomer, fine large, full double flowers in large well-shaped trusses on stout foot-stalks. Color bright clear rose, very effective. Each, 15c.

—Ville de Poitiers. One of the finest of the Bruant class. A double scarlet, very clear and bright; blooms freely in immense trusses; single florets are of extra size and perfect in form. Ea., 15c.

—Beaute Poitvine. Very large seemi-double florets of the most beautiful and distinct form, and borne in immense trusses; free bloomer; color, brilliant salmon.

—Mad. Jaulin. Semi-double. Blooms in large, grand trusses; florets very large with salmon pink centre, surrounded with a border of creamy white. For freshness and beauty it is unsurpassed; fine for outdoor bedding and equally good as a specimen plant.

—General Grant. A superb bedding variety, with very large truss and brilliant scarlet flowers.

—La Favorite. A perfectly double pure white variety. Remarkably free flowering, a perfect ball of snow-white flowers; as a pot plant for house it is very valuable.

—Le Cld. Very compact but vigorous in growth. Color brilliant crimson red. Truss and flower very large. Excellent bedder.

—Jean Vlaud. Beautiful soft, pure pink, semi-double. Plants of strong growth, and flowers are borne in immense trusses, which cover the plant from the time planted until frost. Plants, ea., 20c.

—Hubert Charron. Beautiful somi-double double ma

TUV-LEAR GERANIUMS

JUSTICIA

Justicia Velutina. Unlike the old Justicia Rosea, with its tall, lanky, straggling habit of growth, this new variety makes a dwarf, stocky, compact plant, and begins to bloom when the plant has only three or four leaves, and is never out of flower afterwards. If pinched back occasionally it makes a very handsome plant, frequently covered with 2010 olarge pinkfeathery flower heads, which last a long time. The foliage is heavy in texture and very velvety; a splendid free-blooming plant. Each, 20c.

MEXICAN PEPEROMIA

A new Mexican plant. It is a lovely trailer, to be used as one would use the cld "Wandering Jew." It makes an attractive trailing or creeping vine, as its leaves are exceedingly beautiful, being a dark velvety greenish black, freely blotched with silver. It 2: very beautiful for any position where a trailing plant can be used. Each, 15c.

and dust of living rooms. Ea., 15c.

A charming basket or pot plant, introduced recently, and is certainly an acquisition to this class of flowering and is certainly an acquisition to this class of flowering plants. It is strictly a perpetual bloomer, a good specimen, showing from 10 to 20 large saucer shaped blossoms, about 3 inches across, of a beautiful, bright clear pink color, veined with scarlet, and a white centre. The superb colors, combined with airy grace and a beautiful form, go to make a flower which is, in beauty, perfection itself. The plant grows about 10 inches high, inclining to a trailing habit, holding its large silky flowers erect. As a window plant or for open ground culture it is desirable, early frosts not injuring it, and will bloom on until frozen solid within the ground, or if taken in the house in the fall will bloom all winter, Plants, 3 for 25c.; each, 10c.

MANETTIA VINE

Manetta Bicolor. This beautiful vine can be grown either in the house or gat den and blooms the greater part of the year. In open ground it wan grown to fit, branching freely, showing thousands or bright blossoms. Flowers intense fiery scarles, sanding off into bright yellow they they are also covered with a scarlet moss of hairy substands. No plant is easier to grow, and it commences to bloom most profusely at all times. It is a grand plant, and of striking beauty. Strong healthy plants already budded and blooming, 3 for 25c.; each, 10c.

MEAICAN PRIMROSE

HYDRANGEA

Beautiful blooming plant, adapted to rather shady location. The large clusters of flowers resemble the Snowball, only much larger.

Hydrangea, Otaksa Monstrosa.

One of the most valuable plants that has been introduced in years and cannot fall to become very popular as a decorative plant. The trusses of flowers are of enormous size even on quite small plants. Color intense deep rose. Plant a strong free grower and remarkably free in bloom. A valuable addition to our list of plants for Easter decoration. Also makes ele-

A valuable addition to our list of plants for Easter decoration. Also makes elegant specimen plants for porch or lawn, being a mass of bloom the whole season. Plants, mailing size, each, 15c.

—Thomas Hogg. This is one of the finest varieties grown. The flowers are produced in large heads of white, shading to pink. It is hardy through the South, or can be cultivated as a tub plant. It tertainly has no equal for show or attractiveness. Plants, mailing size, each, 15c.

—Paniculata. (See Hardy Shrubs).

JESSAMINES

Jessamine, Grandiflorum. (Catalonian Jessamine). One of the most de-sirable. The plant is of shrubby, half-climbing habit, with very delicate follage, and its small, star-shaped, fragrant flowers are produced all the year round. Each, 15c.

—Revolutum. A strong climbing plant with glossy leaves and single deep yellow, fragrant blossoms. A beautiful plant and easily grown. Each, 15c.

NEW DWARF JUSTICIA VELUTINA

HYDRANGEA

MOONFLOWER

A very rapid growing vine, which will easily cover a surface of 25 by 40 ft. during the season. At night and during dull days the plants are covered with an abundance of pure white fragrant flowers, 3 to 4 in. in diameter. One of the most showy of the annual climbers. Each, 15c.

CLERODENDRON BALFOURI

A beautiful winter-blooming vine. We can safely recommend this grand Clerodendron as one of the most satisfactory plants for window culture now known. It is a vigorous, rapid and healthy grower, and produces an abundance of blooms, which are bright crimson, surrounded by pearly-white petals, producing a striking contrast against the dark green foliage. A partially shaded position is conducive to rapid growth. Good strong plants, 20 cents each.

MOON FLOWER

DECORATIVE PLANTS. . .

A few Palms and decorative plants are most useful and ornamental in the window or parlor; they are very hardy, easily managed, and will repay the small cost. No class of plant is in greater demand, and cost. No class of plant is metaere demand, and that our customers at a distance may obtain them, we will send any of the sizes under 20 inches high by mail, post-paid; those of 20 inches and upwards are too large for mailing; they can be sent only by express, purchaser paying carriage. We carry a large supply at all seasons of riage. V

KENTIA BELMOREANA

This is sometimes called the Curly Palm, and is recognized as among the best for all purposes, being capable of standing more ill usage than any other. The leaves have a tendency to curl as the plants grow older, hence its popular title of Curly Palm. Price, small plants, each 25c.; 12 to 15 inches, 75c.; 18 to 20 inches, \$1.50, by mail post paid; 20 to 24 inches, \$1.75; 30 to 36 inches, \$2.50; 40 to 48 inches, \$3.50, by express at purchaser's

LATANIA BORBONICA

MUSA ENSETE

The leaves are magnificent, long, broad and massive; of a beautiful green, with a broad crimson mid-rib; the plant grows luxuriantly from 8 to 12 feet high. During the hot summer, when planted out, if grows rapidly, and attains gigantic proportions, producing a tropical effect on the lawn, terrace or flower garden. It can be stored in a light cellar or cool greenhouse during the winter, with a covering of soil, or planted in a tub and watered sparingly. Plants, 40c. each, post-paid.

LATANIA BORBONICA

A very desirable species, one of the handsomest and most useful in the genus. It is of free and rapid growth, resisting dust and gas well, and showing its characteristic habit at an early age. Leaves very broad and beautiful; leaflets much recurved. Piice, 6-in, pots, 90c.; large plants, \$1.75, by express at purchaser's expense.

PANDANUS UTILIS

A grand decorative plant. Its glossy dark green foliage gracefully arranged, renders it particularly attractive. As a vase plant or single specimen in greenhouse or conservatory it cannot be surpassed. Post-paid, large size 60c.

KENTIA BELMOREANA

PANDANUS UTILIS

expense.

KENTIA FOSTERINA

The leaf segments droop instead or curving upwards as in K. Belmoreana, which it much resembles in other fine points. Price, small plants, each 25c.; 20 to 24 inches, \$1.50, by express at purchaser's expense.

ARECA LUTESCENS

A remarkably fine decorative Palm, with long arching fronds of firm texture, and rich shining green above and below. A robust grower, soon developing into fine specimens, well furnished with leaves. Nice plants, \$1.25 each, post-paid

COCOS WEDDELIANA

A perfect little gem; one of the most elegant and graceful little Palms that has ever been introduced. The plant is dwarf and very neat; leaves whitish green on the underside, and arching most gracefully. It is finely adapted for decorations of all sorts, and easily endures the hardships usually falling to house plants. Nice plants, 30c. and 60c. seach, post paid. house plants. Neach, post-paid,

SEAFORTHIA ELEGANS

Well known the world over for its feathery grace. One of the most elegant and useful species for conservatory or greenhouse. The fronds of old plants are from 6 to 10 feet long, dark green, perfectly smooth, and composed of many narrow pinnæ. Large plants, \$1 each; by express at purchaser's expense.

PANDANUS VEITCHII

We have an unusually fine stock of this elegant decorative plant, finely colored. The leaves are light green, beautifully marked with broad stripes and ngmt green, beautifully marked with orded stripes and bands of pure white, and most gracefully curved. One of the most satisfactory ornamental house plants. We have the largest and finest stock of it to be found in this country. \$1.25 each, post-paid.

CYCAS REVOLUTA

This is the so-called Sago Palm, and is sometimes called the Japanese Fern plant. In young plants the stem is bub like, but develops into a stem or trunk as it grows older. The leaves, which are like Fern fronds, are remarkable for their great beauty, which is retained for years, as the leaves do not die or drop off every year. While the frond-like leaves are of most graceful appearance, they are also of a firm, strong texture, and difficult to injure. They are of a dark, deep green, and look as if varrowing finer and more valuable every year. As a decorative plant, both for indoor and outdoor (in summer) use, it is without a rival, for its noble and majestic habit is most impressive; it is very hardy, its heavy glossy fronds resisting alike the gas, cold and dust. Pots should be well drained and water applied sparingly during the winter. We ofter fine plants 1 each, post-paid, and specimen plants 2 to 34 each, by express at purchaser's expense. at purchaser's expense.

MUSA ENSETE

NEW WEEPING LANTANA This is one of the most beautiful of flowering plants for baskets, vases and pots ever grown. It also grows to perfection in open ground during summer. The plant has a most graceful drooping habit, grows with wonderful rapidity and blooms persistently winter and summer, producing a cluster of flowers at each leaf. Color, delicate, clear 'lac-pink. Very distinct and pretty. Each. L.

HOUSE FERNS

Our collection contains the choicest of the "Maiden-hair" varieties and best basket and vase sorts. They are of easiest culture, and nothing adds more grace and beauty to a home than a few handsome ferns. Each,

NEW GIANT FLOWERED HELIOTROPE

Efforts to improve the Heliotrope have been persistently made by experts all over the world for a number of years, and at last these efforts have been successful; realiza-

15c.; 4 for 50c.

BOSTON SWORD

FERNS (NEPHROLEPIS EXALTATA BOSTONIENSIS!

Boston Sword Fern. A variety which originated in Boston, where it has been originated in Boston, where it has been in popular favor for a number of years under the name of Boston Fern. The fronds frequently attain a length of 4 ft., arching and drooping over very gracefully, on account of which it is called the Fountain Fern. This drooping habit makes it an excellent plant to grow as a single specimen on a table or pedestal. Each, 20c.

 —Nephrolepis Cordata Compacta. A beautiful dwarf compact variety of the sword fern. One of the best for house culture or window gardening. Each, 15c. sword fern.

Nephrolepis Exaltata. (Sword Fern). A graceful fern, multiplying very fast in throwing out vines, on
which grow several plants again. Each, 15c.

GENISTA FRAGRANS

GENISTA FRAGRANS

(SHOWER OF GOLD)

A most desirable spring flowering plant producing its fragrant, bright, golden-yellow flowers in the greatest profusion, flowering so freely as to literally cover the plant with its rich golden yellow flowers when well grown. It is grown in large quantities by florists for decorating purposes at Easter time. As a window plant of the easiest eulture it is unsurpassed. Each, 20c.

ENGLISH IVY

Ivy, English. Not hardy outside, but grand to decorate a room; grows well with but little light. Each, 10c.

-Variegated Leaved. Leaves completely a beautifully margined with white. Each, 10c. German, or Parlor lvy. A rapid growing kind, well adapted for covering trellis work or trailing well adapted for cove in the parlor. Each, 10c,

CYNURA AURANTIACA

One of the rarest and most beautiful foliage plants in cultivation. It is of exceedingly robust and branching growth, yet remains dwarf and compact. The leaves and stems are entirely covered with minute hairs, shining, glistening, reflecting many delightfully new colors, such as peculiar and beautiful shades of orange, crimson. purple. peouliar and beautiful shades of orange, crimson, purple blue, green—a veritable kaleidoscope. Any change of position appears to alter the color of the foliage, which appears thick and long lasting. An ordinary observer would pronounce the plants artificial, so unlike nature do they appear. In fact, it is so beautiful that flowers seem superflous, yet they are produced in brilliant orange clusters. Moreover, where a Geranium will languish this will thrive. Each, 25c.

LINUM TRICYNUM

As an early winter flowering plant it is simply indispensable. Its brilliant orange flowers are produced so profusely as to completely cover the plant, making it look like a golden ball. It is of easy cultivation and a most desirable house plant. Each, 15c.

GYNURA AURANTIACA (VELVET PLANT)

GIANT FLOWERED HELIOTROPE

OUR ROSES

Are all grown at our establishment in Toronto, on their own roots, from cuttings, in pots, under glass in ordinary field soil, and at a natural temperature of 50 to 75 degrees, with no stimulating fertilisers or forced heat to accelerate their growth. They are strong, healthy plants, kept from blooming, and with any fair treatment on the part of the planter are sure to grow and soon come into bloom. We cannot guarantee that any Roses or plants we send out cannot be killed by drouth, insects, accidents or frost after they are planted; we do, however, guarantee that they reach their destination in good growing condition; if they do not we must be informed by mail immediately on arrival and will replace them at once. When delivered in good order our responsibility ends. Plants which cannot be sent by mail will be delivered to express company in good order; we do not assume further risk. Customers must not expect all varieties to be of same size; some sorts, under the same conditions, make much stronger and larger growth than others, but very often the weaker grown produce the most beautiful flowers. We aim to please our customers; and while it is possible that some varieties may become exhausted before end of season, we reserve the privilege to send some other variety equal, or better, to take their place. We do not anticipate this necessity, but wish it understood in event of such. Are all grown at our establishment in Toronto, on their own roots, from cuttings, in

HOW TO CULTIVATE ROSES.—As the cultivation of Roses may not be understood by many, a few hints as to their care may not be amiss. Select, the country location, but away from heavy shrubbery or trees. Any good, behieved each soil will grow Roses, but must be well crutized with thoroughly decomposed sable manner; if this is not convexient, fine ground bone or other commercial fertilizers may be used, but such must be applied with judgment, for if used too freely the plants may be suprate. Manure may be applied late in the fall, in spring or middismust. It in the fall, as a surface dressing, which will serve as a partial protection for winter; if in spring or summer, it will be beneficial as a mulch. After the ground has been prepared, manured, and made mellow, make holes in the soil about rs inches "part; set the plants a little deeper than formerly, arrange the roots in their natural position, cover with fine earth, pressing it firmly down upon them and around the

stem, then water freely. When the weather is hot and the ground dry, give water as intervals as found necessary. Cover the plants with old newspapers through the heat of the day. When planting notice that the soil be not too wet, which will cause it to bake and harden, and possibly cause injury to the plants. Should the weather or ground be extremely wet when receiving your plants, they may be placed in the cellar; unpack and set them upright to allow air to circulate through them and water freely. They may thus be kept safely for several days. Should they have a withered appearance, caused by long distance or delay on the way, soak them for an hour or so in luke-warm water before planting. Keep the soil loose and free about the plants and free from weeds. Apply water at evening, which must be done judiciously, as too much water will more or less injure plants of any kind. Keep them free from insects, which may be easily done by the use of tobacco, whale-oil soap, or other insecticides.

WINTER PROTECTION.—In warm latitudes there is little danger from frosts, but in our northern climate winter protection is necessar — most access, and will amply repay the slight trouble: this most woo most his leaves, hay, straw, light manure, pine or cedar benefit, corn stalks or anything of such description, but do not cover vort alumps or beds until winter has fairly set in jf tovered too early may are in danger of sweating and injury; be careful to use dry material for covering, and to admit of free air about the plants. When standing alone a stake may be driven alongside and the plant tied to the stake; around this place some straw and tie with a cord to hold in position; or an old barrel may be placed over the plant and filled with leaves or loose straw, but break out an occasional stave to admit air. Hardy Perpetual and Moss Roses usually need no protection; we would, however, recommend a slight covering where our winters are severe. Half Hardy Hybrids must have protection in northern latitudes and throughout Canada. As most plants are grown in a warm temperature, they should not be exposed to extreme cold. We do not send them out until weather has become settled for spring gardening, and which will be in good time, but if they are required at an earlier date they will be sent entirely at the risk of the buyer for safe delivery. WINTER PROTECTION.—In warm latitudes there is little danger from frosts,

SOUVENIR DE WOOTTEN

Bright magenta red, passing at base to fine violet crimson, richly shaded; flowers are large, full and regular, with thick leathery perals, and delicious tea scent; makes beautiful buds, and is recommended both for open ground and conservatory; an immense bloomer. Each 15c.

BRIDESMAID

This splendid new rose is a sport from the well-known and highly-valued Catharine Mermet, which it closely resembles in size and beauty of form, but is thought to be superior to it, and is much brighter and deeper in color. The flowers are very large and fine, resular, full form, delightfully tea scented; color, clear rosepink, with delicate crimson shadings; a free and constant bloomer and a good healthy grower. Each 15c.

PERLE DES JARDINS

No rose of its color is more valuable than this. Tens of thousands of it are grown in the vicinity of New York for winter flowering; it is equally valuable for summer, flowers continuously. Its color is of a rich shade of yellow, large size, perfect form. Tea fragrance, a healthy, free grower, and unequalled in bloom. Each 15c.

THE BRIDE (A SWEET ROSE

A superb pure white Tea Rose, one of the best of its color; the buds and flowers are unusually large, finely formed, very double and full, and deliciously perfumed; it is a strong healthy grower and a quick and constant bloomer; does well in open ground and is particularly valuable for growing in greenhouse for cut flowers, as it produces abundantly and its blooms are of the most desirable form and quality for floral work, bouquets, wreaths, etc. There are many White Roses, but none more satisfactory than this lovely variety. Each, 15c.

For 50c.

We will mail the above four Grand Roses (post-paid) to any -address in CanadaFor 50c.

TEA ROSES

The following list of Roses is divided into two classes—Teas and Hybrid Teas. The former, being half-hardy, are too tender to remain in the open ground over winter. They may be planted in the gar-den during Summer, but require house protection for the Winter, where they will grow and bloom profusely. The Hybrid Tea varieties are semi-hardy, and by adopting some of the methods sug-gested under the head of "Cultural Dir-rections" as to winter protection, a beautiful display may be had from early Summer until Autumn.

For the convenience of our customers we have marked the Hybrid Tea varieties "H.T."

varieties "H.T."

Ro22, American Beauty. (H.T.) In

"American Beauty" we have a hardy rose of the
largest size, having the ever-blooming qualities of
the Tea Rose with the delicious odor of the Damask
or Moss Rose, consequently equally valuable for
winter or summer flowering. Each, 20c.

—Belle Siebrecht. (H.T.) An exceptionally
fine variety of deep rose pink color. Each, 15c.

Graden Gata. A manifector rose with large.

QUEEN'S SCARLET ROSE Unequalled for pot culture and for bedding out. The blooms are of good size, very double and of deep crimson in color and velvety texture. Its constant and continuous bloom and splendid depth of color render it well worthy of a place among the best, and it is so striking and brilliant in effect when grown in pots, that it is bound to become very popular. Each, 20c.

POLVANTHA POSE

POLYANTHA or FAIRY ROSE

Beautiful free-flowering miniature roses, admirably adapted to pot or window culture, and planted out they flower continually the whole season. The flowers are quite small, borne in large clusters, each cluster making a bouquet by itself. They are quite hardy, requiring but slight protection even in the north. An extra class for cemetery planting.

Rose, Clothilde Soupert. The color is a French white, deepening to rosy blush in the centre. Its greatest value lies in its compact, vigorous habit and wonderful profusion of bloom, even the smallest plants being literally covered with flowers. The form and substance of the flowers are so perfect that the hottest weather does not cause a deterioration of either, so that even in midsummer a bouquet of splendid buds and open flowers can be obtained from this fine variety. Each, 15c.

—Marie Payle. Medium size, very full and double, borne in large clusters and masses; excellent for cutting; color rich creamy white, finely flushed with carmine rose; delightfully perfumed, very pretty and bright. Each, 15c.

—Paquerette. Flowers pure white, about

Each, 15c

SPECIAL OFFER.—We will send one each (5) of these beautiful Fairy Roses for 50 cents.

DINSMORE

DINSMORE ROSE

A grand hardy Rose, very popular, and highly recommended for garden planting on account of its vigor of growth, and constant and profuse bloom. Flowers are large and perfectly double; color, rich crimson scarlet. Small plants, each, 20c.

NEW CEMETERY OR MEMORIAL ROSE

"Wichuriana." This specie Rose, "Wichuriana." This specie from Japan, is a perfect trailer, hugging the ground closely. It grows to to 15 ft. in a season, and is densely furnished with a dark green, glossy foliage, forming a dense blanket, always clean and perfect, with but few thorns. The flowers are single, pure snowy-white. They are borne in clusters and in such numbers as to fairly envelop the plant. It blooms later than most roses. Price, each, 25c. Large plants, 35c.

ROSA RUGOSA, or JAPAN ROSE APPLE

This is a large free growing single rose of rambling habit, luxuriant foliage of a shiny wrinkled, leathery appearance.

The flowers are wide open, 4 to 5 inches in diameter, and are produced in clusters in great abundance, they are followed by large crimson or golden fruits which are edible. The shrub bears both flowers and fruit at the same time. We have them in two colors.

Rosa Rugosa Rubra. Beautiful carmine flowers, crimson fruit. Each, 25c.
Rosa Rugosa Alba. Pure white flowers, golden fruit.
Each, 30c. The Two for 50 cents. ENGLISH SWEET-BRIAR ROSE A fine old favorite; the flowers are bright pink and single. The fragrance of the flowers, leaves and young branches in the early spring frequently perfumes whole neighborhood. Two year plants, each, 25c.

CLIMBING METEOR ROSE

A grand new velvety crimson, perpetual flowering, Climbing rose. Equal to Gen, Jacqueminot in deep rich color and size of flower. A color never before heard of in Climbing Roses. In Climbing Meteor we have a rose of strong, true climbing habit, that under favorable conditions makes shoots 12 to 15 feet long in a single season. Very free flowering, producing in profusion all through the growing season its rich, dark, velvety, crimson flowers perfectly double. Price, 1 year plants, each, 20c.

NEW CEMETERY OR NEMORIAL ROSE

HARDY CLIMBING OR PILLAR ROSES

PERSIAN YELLOW ROSE

Dark golden yellow. The best variety of its color; entirely hardy. It is difficult to imagine a finer sight than this when in full bloom, covered with its bright yellow blossoms, which are borne along the ripened wood so that they appear in sprays. Each 25c.

PINK ROAMER ROSE

This variety shows undoubted traces of descent from the Sweet Briar, both in the color and the shape of the blossom and in its exquisite fragrance. The single flowers are over 2 in. in diameter, a bright rich pink, with a large silvery-white centre and orangered stamens. 25c. each.

These are well adapted for the adorument of pillars, trellises, arbors, or for covering porches or the ends of houses. In their blooming season they are fairly covered with lovely flowers, and are much valued by all discriminating planters of roses. Being perfectly hardy and of vigorous growth their successful culture offers no obstacles.

Rose, Anna Maria. This rose is a fine hardy bloomer, quite double and of medium size, very fragrant, clear white, with centre changing to fine satiny pink.

-Baltimore Belle. Light blush and rose; fine and double, though of medium size; the blooms are produced in clusters, and the rapid growth is very graceful.

-Gem of the Prairies. Bright crimson, sometimes splashed with white; large, very double and fragrant. Exceedingly profuse, being literally covered with bloom.

-Greville, or Seven Sisters. Blooms in large clusters, flowers changing from pure white to -Tennessee Belle. Clear rose color, flowers in large clusters; a vigorous grower and free

bloomer.
2 year plants, 25c.; large plants, 8 year, 40c. (post-paid)

THE YELLOW RAMBLER ROSE

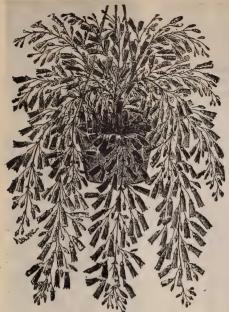

Is perfectly double, very fragrant, entirely hardy, having withstood, unprotected, a prolonged temperature of from zero to two degrees below. It is related to the Crimson Rambler, and, like it, blooms in large trusses. The flowers last three to four weeks without fading. It is a very vigorous grower, making shoots eight to ten feet in one season when well established, so that it possesses all the requisites for unbounded popularity. Two-year-old plants 40c. each.

CRIMSON RAMBLER ROSE

A hardy, ever-blooming, climbing Polyantha. It is perfectly hardy in the open ground, will grow 8 to 10 feet in a season, is in bloom all the time from early spring ill late fall, the flowers appearing in great panicles as large as a man's hat, and of a deep rich crimson color, like blood-colored velvet. The flowers last fully a month on the bush, which is a perfect mass of red crimson at all times. It can be grown in various ways, as a pillar rose, a trellis rose, and for covering a wall it has no equal, and when pegged down will form a bed of itself. Cut back it is a magnificent pot rose for the window. Price, each, 2-year, 25c.; 3-year, 50c.

CRIMSON RAMBLER

RUSSELLIA ELEGANTISSIMA

RUSSELLIA ELEGANTISSIMA (New)

A verv strible semi-trailing plant, especially adapted for hanging baskets, vases, or window boxes, where a delicate graceful effect is sought. Well grown plants, 3 to 4 ft, in diameter, look like a shower of delicate coral red blossoms. The effect is unique and graceful. Propagates easily, and is a rapid grower as soon as established. Each, 20c.

RUSSELLIA JUNCEA

This plant has long, wiry, leafless stems, which grow in graceful, drooping masses, flowing like hair. On these bare stems are borne quantities of long, tubular flowers of the most vivid scarlet color, something like a Manettia bloom, but more numerous. It is a novel, beautiful plant, suitable either for beds in summer or for pot culture. In pots it blooms the entire year, especially during the winter and early spring months. The great drooping masses of bloom are like a fountain of coral, scarlet and green. It is one of the very easiest of house plants to grow, and certainly one of the most brilliant and persistent bloomers. A valuable addition to our standard list of best plants. Ea., 15c.

OTAHEITE ORANGE

A very beautiful pot plant, with glossy, evergreen leaves, and producing flowers as large as the regular orange blossoms, and with the same delicate sweet fragrance, and bears a small pretty fruit resembling a ministure orange, that will remain on the little bush like balls of gold for many weeks after they are ripe. They will bloom and fruit in a two-inch pot, and if given a fair sized pot and good care they will yield bloom and fruit the greater part of the year. As a window plant they are unique and we know of no other that is more attractive; its delicate leafy sprays of bloom are indescribably dainty and fragrant. It is as easily managed as an ordinary geranium. Plants, 25c.

STROBILANTHES DYERIANUS

It forms a compact bush, 18 in, high, with leaves 6 to 9 in, long, 3 or 4 in, wide, and of the most intense metallic purple color, shading into light rose with a light green margin, a combination unapproached by any other plant; it easily surpasses a Coleus or Begonia for a novel effect. The flowers are a lovely violet blue, very beautiful. It has created a vertitable sensation wherever exhibited. Each, 15c.; 2 for 25c.

SMILAX

A very graceful climber, possessing the rare qualities of delicate and tolerably dense foliage, and vining habit, admirably adapting it to climbing or drooping, as may be required. It is also fine as a parlor or window plant. Each, 19c.; 6 for 50c.

NERIUM OLEANDER

Oleander, Splendens. White and pink, very fragrant. A beautiful variety, producing its flowers in great abundance. Each, 250.

VIOLETS

These popular and Magrant plants-can be forced in a cool window or cold trame, but must have lots of fresh air. The single varieties flower most abundantly, but the double flowers are much larger and more showy.

Violet, The California. The flowers are single, intensely fragrant and a clear violet purple that does not fade out. Each, 10c.; 6for 50c.

La France. Of the many new Violets introduced in the past few years, this, the latest introduction of a foremost French specialist, is unquestionably the best. Stems to to 12 inches long. The grand single flowers are of a rich violet purple, lighter centre. Almost as large as pansies and deliciously fragrant. Each, 10c.; 3 for 25c,

-Marie Louise. Rich dark blue, with white eye; very double and tragrant. Each, 10c.; 6 for 50c.

SPECIAL OFFER.-One each of the above three varieties for 25 cents.

THE HARDY DOUBLE **ENGLISH** VIOLET

This violet is entirely hardy, perfectly double, a deep violet purple color, and most deliciously fragrant. It surpasses the well-known "Marie Louise" known "Marie Louise" Violet in richness of col-or, being many shades darker, and far excels in its delightful odor; this is one of its greatest merits. It is entirely free from disease of any kind. will bloom grow in any garden and in any situation. Nothing is more appropriate for cemetery plots than the Hardy Double English Violet. (See cut.) Clumps, 20c. each; 3 for

PARROT'S FRATHER

PARROT'S FEATHER

(MYRIOPHYLLUM PROSERPINACOIDES)

An aquatic hanging plant is a novelty indeed, and we have it to perfection in this dainty little jewel. Its long trailing stems are clothed with whorls of the most exquisite foliage as finely cut as the leaves of the Cyprus Vine and much more delicate. Planted in a water-tight hanging-basket, so water can be kept standing on the surface of the soil, it will trail down over the sides in a most charming manner. In a tank or lake it prefers shallow water. Plant 3 in a pot. Each, 15c.

NYMPHÆA ODORATA

The well-known fragrant pond lily. Its pure lovely white flowers, so common in some locations, are worthly of a place among the choicest varieties where cultivated. All Nymphæs of this type are usefu! for naturalization. Each, 15c.

WATER HYACINTH

One of the most remarkably curious and beautiful plants we have ever grown. Instead of growing in soil it floats in the water, which it is enabled to do by means of its curiously inflated leaf stalks, which resemble bladders or balloons filled with air. A large mass of feathery blue roots grow downwards, their ends entering the soil. It forms a lovely rosette for the soil of their ends entering the soil. It forms a lovely fuseloof curious shining green leaves, and throws up spikes of the most exquisite flowers imaginable, resembling in form a spike of Hyacinth bloom. Color, a beautiful soft liliac rose, sparkling as if covered with diamond dust. Can be grown in the open air in summer and in the window in the winter, in anything which will hold water. Each, 15c.

SWAINSONIA GALEGIFOLIA

A most desirable ever-blooming plant, flowers produced in sprays of from 12 to an dowers each, the individual blooms resembling a Sweet Pea. As a decorative plant for the window or conservatory we know nothing that will give as much satisfaction as the Swainsonia. Its easy culture, growing in almost any light position, rarely ever being out of bloom, and the grace and beauty of the flower, and entire plant, will undoubtedly make this one of the most popular plants in cultivation. Swainsonia. White. Large milky white flowers, exquisite; each, 20c.

—Rose (new). Fine dark rose, white blotch on wings; a superb variety; each 20c.

SPECIAL OFFER-One each of above 2 Varieties for 35c.

SANSEVERIA ZEALANICA

A beautiful plant, splendidly adapted for house decoration, as it stands drouth and dust with impunity. The leaves grow to a length of 3 to 4 ft., and are beautifully striped crosswise with broad, white variegations on a dark green ground. It is a rare and beautiful plant, which should be abundantly grown for positions out of the reach of sunlight, where other plants will not thrive. Price, each, 15c.

THE CRIMSON SPIRÆA

(SPIRÆA "ANTHONY WATERER")
Is acknowledged as the ideal florists'
plant. When scarcely three inches high
it begins to bloom, and thereafter is seldom out of flower. As a house plant nothing can equal it. In the garden it will make a plant 3 feet high and wide, and will be covered with heads r foot across of brilliant crimson flowers. Mr. Golding, of the Royal Gardens, Kew, says of it: 'It is one of those exceptional novelties that occur at rare intervals." Plants, ea., 15c.; large plants, 25c.

CARYOPTERIS MASTOCANTHUS

SALVIA SPLENDENS SILVERSPOT

The most distinct feature of this novelly is its strikingly handsome spotted foliage. The leaves are rich, soft dark green with light sulphur or cream-colored spots of various sizes liberally sprinkled over them. The unique and elegant foliage is very abundant and has an extremely fresh and healthy appearance. The intense bright scarlet flowers are very large, and the plants of neat compact habit and very floriferous. A charming variety of great effect. Plants, each, 15c.

SOLANUM GRANDIFLORA

A beautiful plant that grows to the height of about 6 feet, and is covered with large clusters of fine star-shaped white flowers. It is a splendid pot plant for winter culture, and one of the best summer-blooming climbers ever introduced. It is indeed a grand sight to see this and Manettia Vine trained side by side on a trellis, minging their beautiful blossoms. The demand for this beautiful plant has decided us to grow a large stock this season, and we have made the price exceedingly low. White flowering varieties. Each, 15c.

SOLANUM

Wendland! Magnificum (New). A rare and beautiful species of climbing habit, beginning to flower early in July and continuing in full bloom until cut down by a severe frost. This is one of the most highly admired plants in our trial grounds, attracting attention at once on account of the large size of its flowers, which are over two inches in diameter, and are produced in large clusters, frequently over 100 flowers being on one truss. Color a mauve-blue of a distinct and pleasing shade. 25c. each.

50c. WINDOW COLLECTION

- Rose, Hermosa, Admirably adapted to 1 Fern, Pteris. A good plant for the
- 1 Mexican Primrose, A charming basket or pot plant; perpetual bloomer.
- Sword Fern. A splendid Fern, wonderfully adapted for house culture.
- Solanum Grandiflora. A beautiful pot plant for winter culture.
- Geranium, La Favorite. A perfectly double pure white flower; as a pot plant for house it is very valuable.
- 1 Fuchsia, Speciosa, A charming variety, and the freest flowering of all Fuchsias.
- 1 Begonia, Alba Picta. A pretty species from Brazil; distinct in character. It is shrubby in habit and of compact growth; the leaves are glossy green, freely spotted with bright silvery white.
- 1 Begonia, Vernon. A good house plant; flowers deep red, changing to rose.

HARDY SHRUBS AND STATE

HERBACEOUS PLANTS

By this term is meant such plants as may be allowed to remain permanently in the open ground.

HARDY SHRUBS. These are exceedingly attractive for lawns or borders, and will increase in size and beauty from year to year, some being valuable for their floriferous habits while others are prized for their ornamental foliage. They are a source of pleasure continually.

HERBACEOUS PLANTS are those whose foliage dies to or near the ground each autumn, coming forth again with rear yet but few who secure the best results from open air gardening, while anyone with a few rods of ground may enjoy a beautiful and permanent flower garden by planting these herbaceous or perennial plants, their first cost is the only cost, as they increase in size and beauty from year to year. The varieties herein will succeed each other and give flowers from early spring until cut down by frost in autumn, and make the garden a source of unflagging interest. With slight attention to their selections, varieties may be had for any condition of soil, wet, dry, sunny or shady—there are plants for all.

ANEMONE "WHILD WIND."

ANEMONE, "WHIRLWIND"

A new semi-double form of Anemone Japonica Alba, which is supposed to be a cross between this beautiful variety and A. Japonica Rosea. In general style and habit it is identical with the white Anemone. It is of the same strong habit of growth,

mone. It is of the same strong habit of growth, and is even more free flowering than the original type. The flowers, which are 2½ to 3 in, across, have several rows of pure white petals, and have the advantage of lasting much longer than the single varieties. We consider this a good acquisition, and cannot recommend it too highly. Clumps ea. 20c.

ACHILLEA ALBA

("THE PEARL")

One of the very best white flow-ered plants for the border. The flowers are borne in the greatest flowers are borne in the greatest, profusion the entire summer, on strong, erect stems. Pure white in color, somewhat resembling Pompon Chrysanthemums. As a summer cut bloom it is a great acquisition. Each, 10c.; 3 for 25c.

CATALPA

(JAPANESE CATALPA)

KÆMPFERI

(JAPANESE CATALPA)

Catalpa Kæmpferi. This variety is an elegant shrub of rather slender growth, producing large clusters of fragrant flowers of a yellowish cast; they remain in bloom a long time and are suceeded by seedpods; the leaves are of a dark purplish-green color. Bees are attracted by this shrub. Mailing plants, 55. 2 for file. 25c. ; 3 for 60c.

BERBERIS OR BARBERRY

(A GRAND FOLIAGE SHRUB)

(A Grand Foliage Shrus)

Japan Barberry, or Berberis Thunbergii. A most valuable and distinct shrub of dwarf compact habit, forming a low. globular bush of dense growth. Its leaves are small, glossy, very rich dark green, with metallic reflections, and so numerous as to completely conceal the branches; turning in autumn to the most brilliant scarlet imaginable, so vivid, in fact, as to suggest a ball of fire. The branches are thickly studded with coral-like betries which cling to the bush till May, and its numerous little blossoms are very unique. Each, 15c.; large plants, 2½ ft. high, 30c each, by express at purchaser's expense.

—Purple-Leaved Barberry, or Berberis Vulgaris Atropurpurea. One of the most valuable shrubs, especially for producing color effect in grouping. Its abundant handsome foliage is always clean, of a deep, rich plum color, and does not fade out in summer, as do most purple-leaved plants. Like the type, it produces fruit freely, of a bright crimson color, that remains upon the plant until spring. It forms a beautiful hedge, and is also erocedingly pretty as a single specimen. Each 15c.; large sized plants, 2½ ft. high, 30c. each, by express, at purchaser's expense.

AQUILEGIA

(COLUMBINE)

These make excellent border plants, unrivalled for beauty of form and rich blending of colors. Our collection includes a variety of colors, although not offered separate; they will give a pleasing effect to any flower garden. Each, 15c.; 2 for 25c.

ALTHEA

or Rose of Sharon

Flowers are of large size, very double and full, and of various brilliant and striking colors; they are borne in August and September, when other flowers are scarce. The plant is of regular and compact growth, with deep, glossy green leaves; thrives in all ordinary situations, and is entirely hardy They make beautiful ornamental hedges. We offer four distinct varieties, all very beautiful, viz., Double Purple, Double Striped, Double White and Variegated. Plants, each color, 30c., post-paid. 30c., post-paid

FLOWERING ALMOND

(AMYGDALUS))

This is one of the earliest flowering This is one of the earliest flowering shrubs, and one you cannot afford to do without. The stems are literally covered with most beautiful blossoms, which make it a thing of beauty. Double Pink and Double White, 40c. each, post-paid; large plants, 60c. each, by express at purchaser's expense.

ALTHEA, OR ROSE OF SHARON

ACHILLEA ALBA, "THE PEARL"

the early summer. The flowers are borne in slender racemes, of eight to ten florets each, on light and wiry branches, that bend beneath their load of bloom just enough to be airy and graceful. When in full bloom, the young growth and soft, green follage are advanced sufficiently to afford just the right toning tint of green to produce the most pleasing effect. Each, 20c.

CYDONIA

(QUINCE)

The flowering varieties of the Japan Quince rank among our choicest shrubs. Although of straggling growth, they bear the knile well, and with proper pruning may be grown in any form. As single shrubs on the lawn they are very attractive, and for the edges of borders or groups of trees they are specially adapted. Their large, brilliant flowers are among the first blossoms in spring, and they appear in great profusion. Their foliage is bright green and glossy, and retains its color the entire summer. Special attention is invited to this plant for ornamental hedges. It is sufficiently thorny to form a defence.

to fine peate for ornamental acuges. First same only to form a defence.

C. Japonica. Scarlet Japan Quince. Has bright scarlet crimson flowers in great profusion in the early spring. One of the best hardy shrubs in the Catalogue. Each, 20c.

CLETHRA (SWEET PEPPERBUSH)

Clethra Alnifolia. (4 to 5 feet.) A large and most useful shruo, bearing a profuse number of upright spikes of yellowish white, sweet scented flowers, which open about the 1st of August. It will flourish in shady places, and is used to a great extent for massing in woods or to give a natural effect to landscape work. A hedge of it fully equals the wonderful Jessamine hedges of the South, both in beauty and fragrance. Mailing plants, 20c. each.

CLETHRA (PEPPER BUSH)

HELIANTHUS

(PERENNIAL SUNFLOWER)

These flowers will well repay the slight trouble they give, flourishing splendidly in any garden soil, and for the second or back row in borders or for shrubberies, they can hardly be

Helianthus Multiflorus, fl. pl. (Double Hardy Sunflower or Dablia Sunflower). Perfectly hardy and produces large Double Dablia-like golden-yellow flowers in great profusion during the entire summer and fall. Each, 15c.

Lactiflorus. One of the most beautiful plants for the garden; flowers about 4 inches in diameter, of the richest golden yellow color; habit very distinct, of pyramidal growth; leaves narrow, of a bright sea-green color; perfectly hardy; flowers from July to September. Each, 15c.

-Soleil d'Or. This grows about 4 feet, com-posed of numerous rigid stems smothered with large golden yellow flowers; very fine for cutting and general decoration. Each, 15c.

1 each of the above 3 varieties, 40c.

Gaillardias are among the showlest and most effective of hardy perennial plants; beginning to flower in June, they continue one mass of bloom the entire season; they will thrive in almost any position or in any soil, but respond freely to liberal feeding; being perfectly hardy they require absolutely no protection. The flowers are large, 2½ to 3½ inches in diameter, produced on long stems, are excellent for cutting; most gorgeous coloring. The centre is dark red brown, while the petals are variously marked with rings of brilliant scarlet crimson, orange and vermillion. Assorted colors, each 10c.; per doz., \$1.

SWEET SCENTED SHRUB

Calycanthus Floridus. A native species growing 6 to 8 feeth high. Flowers of a chocolate brown color, and have a powerful aromatic and fragrant odor; from May to August. The leaves and wood are also fragrant. Blooms freely, is hardy and succeeds everywhere. Often termed Strawberry Shrub from the resemblance of the fragrance of its flowers. Each, 20c.

FUNKIAS, OR DAY LILIES

Handsome hardy foliage and flowering plant. Their noble aspect, elsegant outline, and bold, luxuriant foliage render them exceedingly attractive for large effective clumps, succeeding in sunny positions, and equally well in sunny positions, and equally well in shady places where many plants would not exist. They are also much grown in Europe for greenhouse decoration in winter.

Funkia, Aurea Maculata. Beauti-ful, golden striped foliage, very handsome. Each, 20c.

-Subcordata Grandiflora (White Plantain Day Lily). Very showy, splendid milky white flowers, nearly 4 inches long; very frag-rant. Each, 20c.

DEUTZIAS

Early spring flowering shrubs, with long graceful spikes of flowers from every bud or eye, pretty foliage of upright growth, and forming handsome lawn shrubs. They flower early in June.

Deutzia, Gracilis. Grows from 2 to 3 feet high, and is almost bell-shaped in its close, compact bush, being covered with graceful sprays of small bell-shaped white flowers. Blooms early in June.

—Double Pink, Each, 25c. | —Double White, Each, 25c.

HELIANTHUS MULTIFLORUS, FL. PL

The handsome perennial Lobelias are worthy of attention. They are partial to moisture and to a deep rich loam. They attain a height of 2 feet and make an imposing effect as a back row to a ribbon border.

Lobelia, "Queen Victoria." Vivid scarlet flowers; metallic crimson foliage. Each, 15c.

HOLLYHOCKS

(FINE DOUBLE VARIETIES)

These are always in great demand and are used for back-grounds or centres of beds, their tall spikes of beautiful flowers making them very valuable for such situations. Our stock of plants is bealthy and very fine, embracing all colors—crimson, buff, yellow, lemon, purple, rose, etc. Plants 2 years old, 25c, each; per doz., \$2.25.

HYDRANGEA PANICULATA GRANDIFLORA

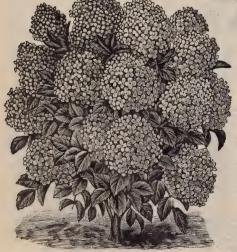

(THE GRANDEST SHRUB OF ALL)

(The Grander Shrub of ALL)

One of the best and most handsome Hardy Ornamental Shrubs ever grown. It blooms finely the first year, and gets better and grows larger with age; it grows 3 to 5 feet high, is perfectly hardy in all parts of the country, and needs no protection in winter; blooms in July and August, when other flowers are scarce, and remains in bloom two or three months. The flowers are pure white, afterwards changing to pink and rich coppery red, and are borne in immense pyramidal trusses, more than a foot long, and nearly as much in diameter. The bush should be cut back every spring one-half of last season's growth, dug around and well manured. The finest flowers are borne on the new wood, and are largest and best when the plant has made a vigorous growth. Strong 3-year plants cut back for mail, each, 25c. Large plants, 35c. each, by express at buyer's expense.

HOLLYHOCK

HYDRANGEA PANICULATA GRANDIFLORA

VIBURNUM OPULUS

Viburnum Opulus. (Common Snowball), 5 to 7 feet. This w shrub finds great favor with planters. The large balls come singly, hanging by stems along the branches, expanding towards the close of May. A very showy decorative shrub. Strong plants, each, 30.

JAPANESE SNOWBALL

Viburnum Plicatum, (Japanese Snowball). This improved varlety of Snowball is distinct in every way; of upright bushy growth, with plaited leaves and a large number of pure white heads of flowers. It stands unexcelled amongst shrubs. You cannot afford to leave this oft your list. By mail, each, 40c. Large plants, 2½ to 3 feet high, each, 50c., by express, at purchaser's expense.

THE TREE LILAC

Syringa Japonica. From Japan. It makes a straight, stout, well-branched tree, with large and handsome leaves. It flowers in midsummer, when other lilacs have long been gone, its immense clusters of white blossoms standing stiffly up on the outer and top shoots, sometimes measuring 16 to 24 ins. in size. Specimens are now to be seen in Boston, Mass., 12 yrs. planted and 20 ft. high. Plants, by mail, each, 250.

PRUNUS PISSARDI

Prunus Pissardi. (Purple-leaved Plum). The finest purple-leaved small tree or shrub of recent introduction. The young branches are a very dark purple; the leaves when young are a lustrous crimson, changing to a dark purple. It transplants easily. Flowers small, white, single, covering tree. 20c. each

PRUNUS TRILOBA

Prunus Triloba. (Double Flowering Plum). This splendid variety is one of the best low growing shrubs we have; height 4 or 5 feet. It commences to flower in May, and is a perfect mass of double pink flowers borne along the stem, showing them off in a very attractive manner. It is perfectly hardy, and we recommend it as being one of the very best shrubs now in cultivation. Each 40c.

TRITOMA UVARIA GRANDIFLORA

(FLAMING TORCH OR RED HOT POKER PLANT)
A splendid half-hardy summer and autumn flowering plant, producing magnificent spikes of rich orange red flowers. May be left in ground during winter with protection, or taken up in fall, potted, and kept from frost. Each 15c.

HYPERICUM MOSERIANUM

(THE NEW ST. JOHN'S WORT)

(THE NEW ST. JOHN'S WORT)

The habit of this plant is free and graceful; it produces long, slender, much-branched stems, leafy to the base, and all drooping towards the ends, apparently from the weight of the flowers and buds, although the flowers face so that none of their beauty is lost. It is marvellously free flowering; of large size, measuring from 2 to 2½ inches in diameter; in color a rich golden yellow, with yellow stamens and crimson anthers, and blooms continuously the entire season. It is perfectly hardy, forming a bush about 3 ft. high, Strong plants, 20c. each.

TRITOMA UVARIA GRANDIFLORA.

WEIGELIA (DIERVILLA)

Shrubs of erect habit while young, but gradually spreading and drooping as they acquire age. They produce in June and July superb large trumpet-shaped flowers of all shades and colors, from pure white to red. In borders and groups of trees they are very effective, and for margins the variegated leaved varieties are admirably suited. Fine plants, mailing size:—Wetgetla. Varlegated *Leaved Dwarf. Of dwarf habit, and possessing clearly defined silvery variegated leaves; flowers nearly white. Each 25c.

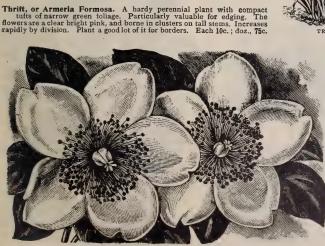

—Rosea. The flowers are large and Shrubs of erect habit while

white. Each 25c.

—Rosea, The flowers are large and of deep rosy color; a very profuse bloomer. Each 25c.

—Floribunda, Dark cinnamon or chocolate colored flowers with projecting white stamens and pendulous habit, like a Fuchsia, ea. 25c.

—Candida. This is the very best of all the white-flowered Wiegelas; a strong, upright, erect grower; flowers pure white and produced in great profusion in June; blooming all summer. Each 25c.

VIBURNUM PLICATUM (JAPANESE SNOWBALL)

YUCCA (SPANISH BAYONET)

Yucca Filamentosa. A low-growing hardy evergreen plant, with long narrow leaves; very distinct, and almost tropical in appearance. The flower stalk is from 2 to 4 feet high, and rises from the centre. It bears a profusion of creamy white, bell-shaped flowers, very beautiful; very effective lawn plant; will thrive and succeed in the poorest soil. Each 20c.

TULIP TREE Liriodendron Tulipifera. A magnificent native tree, of tall, pyramidal habit, with broad, glossy, fiddle-shaped leaves of a light green color, and beautiful tulip-like flowers; allied to the Magnolias, and, like them, difficult to transplant, unless of small size. Each 20c., postpaid.

THRIFT, SEA PINK

HYPERICUM MOSERIANUM

YUCCA

RUDBECKIA "GOLDEN GLOW"

SPIRÆAS SPIRÆAS

Spiræa Bumalda. It is of dwarf habit, forming a dense clump of slender branches and pretty, airy foliage, not exceeding 2 ft. in height at maturity, is of the greatest hardihood and bursts into masses of exquisitely beautiful flowers in early June, and continues to cover the bush with clusters of bloom, each plant resembling a huge bouquet during the entire summer and autumn. Bright rosy red. Each 15c. Postpaid; large plants, 30c. each, by express at purchaser's expense.

—Thunbergil. One of the finest Spiræas; blooms early in April; noted for its compact, regular growth and pretty fern-like leaves; makes a head almost as round as a ball; flowers are white and borne in large clusters. Post-paid, each, 15c.; large plants, 30c. each, by express at purchaser's expense.

—Van Houttei. Is the most showy of all the Spiræas. In the spring the plants are a perfect snow-bank of bloom, the long slender branches drooping gracefully with their weight of flowers; strong growing and entirely hardy, rich blue green foliage. Postpaid, each, 25c.; Large plants, 30c. each, by express at purchaser's expense.

expense.

—Aurea, Golden-Leaved Spiræa. A handsome shrub, with bright golden yellow foliage, contrasting finely with the deep green of other varieties; small white flowers. Each 15c., postpaid. Large plants, 30c. each, by express at purchaser's expense

SALISBURIA (MAIDEN HAIR TREE OR GINGKO)

SALISBURIA (MAIDEN HAIR TREE OR GINGKO)
Sallsburia Adiantifolia. A Japanese tree of large size and
rather erect growth. A most elegant ornamental tree, with
very handsome deep green foliage, shaped like the Maiden Hair
Ferns. It is hardy, upright and regular in habit, and makes a
splendid appearance anywhere, growing freely and rapidly. It
is much different in appearance from any other tree, and very
ornamental indeed
with its great profusion of beautifulfoliage. Mailing size
35.c. each.

MAGNOLIA GRANDIFLORA

DOUBLE RUDBECKIA "GOLDEN GLOW"

The new large double-flowering, golden yellow Rudbeckia is of fine habit, vigorous growth, with early continuous and immense blooming qualities; more elegant and beautiful than the double flowering "Helianthus Multiflorous;" growed it, or more in height, much branched and erect. The most handsome large flowering perennial that has been introduced for years. Plants, 15c. each.

PHILADELPHUS CORONARIUS

(SWEET-SCENTED SYRINGA OR MOCK ORANGE)

A hardy shrub of rounded form and luxuriant foliage, with masses of pure white, intensely fragrant flowers in June. This is one of the first to bloom, and deserves a place in all collections. Each, 20c., post-paid; large plants, 3½ to 4ft. high, each 30c., by express, at purchaser's expense.

MAGNOLIA

Grows into trees of the highest ornamental merit; their elegant habit and foliage alone would render them indispensable, but the flowers, their crowning beauty, are unrivalled in size, beauty, individual charm and showy effect among all hardy trees or shrubs. As specimens upon the lawn they are simply grand. They should be planted in a somewhat sheltered position, and will grow in a low or high situation.

—Magnolia Grandfiltora. Greatly prized for its beautiful white, sweet scented flowers, which come later than most other kinds, not expanding until early in June. Good plants, each 45c.

Syringa Villosa. A purple Japanese specie with large leathery green foliage like the white finge tree. Flowers purple, distinct, new color, very florierous. Plants by mail, each, 25c. Large plants, 50c. each, by express at purchaser's expense.

PRIVET CALIFORNIAN

Of all the ornamental hedge plants, this is the most highly prized. If cut to the ground one or two years after planting makes a very thick edge right from the bottom, sending up many strong shoots. The leaves are a rich green and will remain on the plants up to Christmass, and if they are a little sheltered they will keep green almost all winter. Hedges that are 6 to 7 feet in height, and have been trimmed flat on the sides, look like a solid green wall. It thrives in dry situations and is extremely hardy. 60c. per doz., post-pald; \$3.50 per 100, by express at purchaser's expense.

PERENNIAL PHLOX

For hardy clumps of brilliant colored masses of flowers on lawn or among shrubbery, Hardy Perennial Phlox takes the very first rank. The great showy heads or panieles of bloom are produced and multiplied in gorgeous profusion from midsummer until checked by frost. Named varieties, assorted colors, 15c. each; 6 for 75c.

SMOKE or FRINGE TREE

Rhus Cotinus. (Also called Purple Mist and Venetian Sumach). From Southern Europe. A large shrub or small tree of low growth and rounded form, attaining a height possibly of 12 ft. The foliage is of a lively bright green, and the flowers appear in June in large, loose, fringe-like panicles of light purplish color, and change finally to masses of reddish seed-vessels, which remain until frost. Mailing size, ea. 20c.

SPIRÆA BUMALDA

SPIRÆA VAN HOUTTEI

PERENNIAL PHLOX

HARDY OUTDOOR CLIMBERS

MPELOPSIS VETTCI

BOSTON OR JAPAN IVY HONEYSUCKLES

For real home vines, to be near you, climbing over your windows and doorways, there is nothing prettier than fine, sweet-scented Honeysuckles; the foliage is pretty, neat and clean, the flowers almost continuous, and their fragrance delicious. The varieties described below are the very best.

Honeysuckle, New Halliana. A new variety introduced from Japan, and considered a great acquisition; it is evergreen, and a constant bloomer, flowers pure white, changing to yellow; very fragrant; good for trellis or pillar; one of the very best varieties for all purposes. Each, 20c.

-Golden-Leaved. An elegant and very desirable variety of moderate growth; leaves beautifully veined and netted with clear yellow, so that the pre-vailing color of the foliage is bright yellow; flowers yellow and fragrant; admirable for pillar and trellis work. This beautiful Honeysuckle is so distinct that it is one of the best varieties to plant with other vines for a striking contrast. Each, 20c.

Each, 20c.—Monthly Fragrant. A fine rapid growing variety; flowers large and very fragrant; color red and yellow; a constant bloomer. Each, 20c.

WISTARIAS

Chinese Wistaria, White. Plant this Wistaria wherever you want a good tall growing vine to shelter high porches or second floor fronts. It-grows strong and high, makes a pretty leafy screen, not too dense, and is loaded with bloom in the early spring, just when you seem to need flowers and shade most. There are several varieties of Wistarias; this is the finest of all; immense clusters; pure white flowers, very sweet; extra fine plants, sure to bloom. Each, 30c.

Chinese Wistaria, Blue. One of the most beautiful of all Wistarias; a vigorous strong growing vine, producing in early summer a great profusion of large clusters of lovely, rich violet-blue flowers, deliciously sweet and exceedingly handsome. One of the very best climbing vines for verandahs, balconies, second floor fronts, etc. Each, 30c.

BOSTON or JAPAN IVY

(Ampelopsis Veitchii)

No picture can portray the beauty of this grand climbing plant. As an important aid to architectural beauty it is rapidly attaining prominence, being now a feature on the finese houses. It is entirely hardy in the most exposed places, attaining a height of 20 to 30 feet in 20 to 3 years, clinging to stones, brick or woodwork with the greatest tenacity. For covering dead trees, gate posts, boundary walls, verandahs, etc., it has no equal, while its rapid growth and tenacious clinging qualities make it a most desirable plant for staying up terraces. In summer the foliage is a shade of green, and in fall tinted with scarlet, crimson advange.

Fine mailing plants, each, 15c.; 4 for 50c.; 2-year old plants, 25c.; 5 for \$1; 3-year old

plants, 50c.

VIRGINIA CREEPER

(Ampelopsis Quinquefolia)

(Ampelopsis Quinquetons)

Has beautiful digitate leaves that become rich crimson in autumn; a very rapid grower. Like the Begonia and Ivyit throws out tendrils and roots at the joints, by which it fastens, itself to anything it touches. One of the finest vines, for covering verandals, or trunks of trees; affords shade quickly. Hardy in the North-West, Mailing plants, each, 20c.

A vicorous and rapid growing climber, bearing singular brownish-colored flowers resembling in shape a Dutchman's pipe. Its flowers, however, are of little value, but its fine, light green leaves, which are of very large size, retain their color from early spring till late fall; perfeculy hardy. Each, 25c.

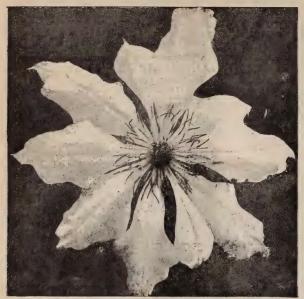

BIGNONIAS (TRUMPET CREEPER)

BIGNONIAS (TRUMPET BIGNONIAS) (TRUMPET SIGNONIAS CREPPER) Bignonia Radicans. A splendid climbing plant, suitable for covering dead trees, fences, etc., with large clusters of trumpet-shaped, orange-red flowers; blooms in August; about 3 inches long, handsome in bud as well as in flower. The foliage is also very beautiful, a collection of small leaflets arranged upon a single stem, beautiful for vases and flower work. This plant is not only an admirable climber, but on the lawa makes a pretty tree-formed bush or tree, if tops are cut back and artificial stem supplied, thus having the appearance of a weeping shrub. Mailing plants, each, 20c.; 4 for 75c.

—Grandiflora. A hardy, fast grower, suitable for covering dead walls, back buildings, fences, etc.; produces in August large, orange-red, trumpet-shaped flower in clusters, very handsome. Each, 25c.

SMITH'S SNOWWHITE JACKMANNI

—Princess Beatrice. A magnificent variety, with broad overlapping petals; flowers 6 to 8 inches across, nicely frilled; silvery lilac with pale stamens; a close, well formed flower, and quite distinct. Each, 60c.

nower, and quite distinct.

—Beauty of Worcester. A variety of singular merit, producing both double and single flowers on the same plant. It is of very vigorous growth, and being a remarkably free and continuous bloomer, producing flowers measuring as much as five inches in diameter at almost every joint, it will be invaluable for bedding and general decorative purposes. Color of a beautiful blush violet shade with prominent pure white stamens, which greatly add to its beauty. Each, 60c.

SMALL FLOWERED CLEMATIS

Clematis Flammula (Virgin's Bower). A general favorite where a hardy, rapid-growing vine is desired. Its small, bright-green foliage is almost hidden by clusters of small vine is desired. Its small, bright-green foliage is almost hidden by clusters of small with flowers. Each, 30c.

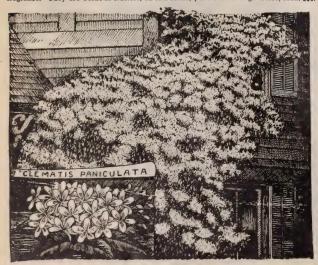

—New Coral. (Clematis Coccinea.) Grows 8 to 10 feet high; suitable for verandah or

trellis; a constant bloomer, bearing a profusion of rich coral scarlet, tulip-shaped flow-ers all through the season, from early summer until fall, very pretty and desirable. Ea 25c.

ers all through the season, from early summer until fail, very pretty and desirable. Ea 25c.

Clematis Paniculata. (Sweet Scented Japan Clematis). Has a stem 1½ inches in
diameter at the base, and completely covers a space 18 feet high and 12 feet wide.

The foliage is remarkably clean and healthy and very free from insect enemies; of
a dark, clear, glossy green. For any situation where a rapid growing climber is needed
this will be found a most valuable plant. For making arbors, covering trellises,
trailing over old stumps or trees, or as an ornament to porches, it is especially
desirable. The flowers are pure white, sometimes slightly tinged with cream, about threefourths of an inch in diameter, star-shaped, and of a most pleasing and penetrating
fragrance. They are borne in clusters, on stiff stems, 4 to 6 inches long. Price, each, 30c.

LARGE FLOWERED OR ENGLISH CLEMATIS

The Clematis we offer this season are exceptionally fine strong plants, two years old; we have reduced the number of varieties to such sorts as from experience we know to succeed best in our climate. Many failures in the growing of Clematis are the result of too shallow planting; the crown of the roots should be set at least three inches below the surface of the soil. For covering walls, trellises and verandahs, old trees or ruins, they have scarcely an equal,

walls, trellises and verandans, oid trees or runns, they have scarcely an equal, certainly no superior.

Clematis, Madame Edouard Andre. An entirely distinct and most novel variety, and the nearest approach to a bright red ever sent out. The plant is a strong, vigorous grower, being a hybrid of the popular Jackmanni, which it resembles in freedom of bloom, strong vigorous growth and shape and size of flowers, but is of a distinct carmine red color of a most pleasing shade, entirely different from all other varieties. Each, 60c.

Smith's Snow-White Jackmanni.

This is what has been wanted for years, viz., a "paper-white" true Jackmanni Clematis. The flowers are about the same size as those of the old purple Jackmanni, but produced in even greater profusion. The constitution is excellent, and the plant is equally useful for climbing or for bedding. The flowers are valuable for vases, wreaths, bouquets, etc. Each, 60c.

Jackmanni. The best known and most popular variety. Color dark rich royal purple. A mass of bloom when in full flower. Each, 50c.

Miss Bateman. White with chocolate red anthers. Each, 50c.

Star of India. Reddish plum with deeper colored bars down the centre of each sepal, a very showy and useful variety. Each, 50c.

Magnifica. Distinct light lilac rose; a new and handsome variety of the

Magnifica. Distinct light lilac rose; a new and handsome variety of the Jackmanni type; very free bloomer, vigorous grower. Each, 60c.
 Duchess of Edinburgh. Best double white, deliciously scented. Ea., 70c.

TACKMANNI

MISCELLANEOUS PLANTS

Not less than 50 plants at 100 rates. CURRANTS

Hardy, easily cultivated, standing neglect well and liber-

Hardy, easily cultivated, standing neglect well and incer-ally responding to cultivation and generous treatment; indis-pensable for table use, jellies, etc.; no garden is complete without them, and large quantities are required for market. Set four feet apart in rich ground; cultivate well or mulch heavily; prune out old wood so that each remaining shoot will have room to grow, if the currant worm appears dust with hellebore. Strong plants by mail, post-paid.

Currants, Fay's Prolific. It is a very heavy cropper; the large uniform betries are less acid than any other sort; large handsome strings of cherry-red fruit; unexcelled for the family garden or market, 2 for 25c.; per doz., \$1.25

-Black Naples, Very hardy and prolific. All the black kinds are much prized for making jams and jellies; highly profitable for market growing in some sections. Each, 10c.; per doz., \$1.

Iuc.; per doz., \$1.
 Large Red Cherry. The most popular market sort, and uniformly the largest of all the red currants except Fay's Prolific. Bunches large; berries very large, bright, sparkling, crimson, beautiful, very acid. Each, Iuc.; per doz., \$1.
 White Grape. This is a currant of all others that should be in the family garden, not only for its handsome appearance, but for its fine quality. Its bunches are extremely long, betries large, of a beautiful translucent white and excellent flavor. The largest and decidedly the best white variety. 2 for 25c.; per doz., \$1.

- Lee's Prolific. A new black variety; about ten day earlier than Black Naples, with large berries, larger, longer bunches and more productive than that prolific variety. Each 10c.; per doz., \$1.

Variety. Each 10c.; per 00x., \$1.

Black Champion. As great an improvement among black currants as is Fay's Prolific among the red varieties. Like Fay's the clusters and berries are exceedingly large, and, unlike other varieties of its class, the bushes are heavy annual bearers. The flavor of the fruit is richer and much milder than the old Black Naples or Black English, from which it has no doubt sprung. It

doubt sprung. It is very fine for making jellies and jans, and, in brief, is by far the finest Black Currant yet pro-duced. 2 for 25c. per doz. \$1.35.

THE NEW BLACK CAP RASPBERRY, "CUMBERLAND"

RASPBERRIES

Will do well on any soil that will produce a good corn crop. Land should be thoroughly prepared and well enriched; ground bone is one of the best fertilizers. Keep well cultivated and free from weeks and suckers. As soon as they have done bearing, cut out the old wood to give more vigor to the young canes.

For field culture plant in rows about 5 feet apart, with plants 3½ feet in the row, except Cap varieties, which should be 6 by 3½ feet. For garden culture they may be set 3 feet apart each way, with Caps 4 by 3 feet.

At dozen prices we prepay postage; at hundred rates add 40 cents per hundred for mailing.

At dozen prices we prepay postage; at hundred rates add 40 cents per hundred for mailing.

—New Cumberland. The largest Black Raspberry known, has been well tested in nearly all sections the past three seasons, giving thorough satisfaction. In hardiness and productiveness it is unexcelled by any other variety. In size, the fruit is simply enormous, far surpassing any other sort. The berries run seven-eighths and fitteen-sixteenths of great firmness and is thus well adapted for standing long shipments. The bush is exceedingly healthy and vigorous, throwing up stout stocky canes, well adapted for supporting their loads of large fruit. It sperfectly hardy, and considered to be the most profitable and desireable market variety yet known. Price, each, 20c.; per doz., 81,75, post-paid.
—Black Cap, Kansas. Strong, vigorous grower, standing extremes of drought and cold, and bearing immense crops. Early, color jet black, and almost free from bloom; firm, of best quality; presents a handsome appearance, and brings highest price in market. Every planter who wants a prolific, hardy, early berry of immense size, handsome appearance and superb quality should plant it. 3 for 20c.; per doz., 60c.; 100 for \$3.00.

RED VARIETIES

Cuthbert, or Queen of the Market. A remarkably strong, hardy variety. Berries very large, measuring 3 inches around; conical; rich crimson, very handsome, and so firm they can be shipped hundreds of miles by rail in good condition; flavor is sweet, rich and luscious. The leading market variety for main crop. 4 for 25c.; per doz., 75c.

-Loudon. A variety originating with that veteran horticulturist, F. W. Loudon, of Wisconsin, and claimed to be the greatest advance in red raspberries since Cuthbert, its points of superiority are vigor of growth, and enduring winters without protection and without injury. It stands shipping the best of any variety, and will remain on bushes the longest without injury, 3 for 25c.; per doz., 80c.

-Marlboro is earlier than Cuthbert, yet continues longer in bearing. It combines the large size and superior qualities of the best foreign varieties. No variety heretofore introduced combines these excellencies so completely as this. 3 for 25c.; per doz., 75c. (Special prices for large quantities on application).

BLACK VARIETIES

Raspberry, Ancient Briton. One of the best of hardy varieties; without blooming has worked its way on its own merits to the highest place as a profitable and valuable market sort. Very vigorous, healthy, and hardy, producing large fruit stems loaded with good sized berries of fine quality, that carry well to, and fetch the highest price, in market. For general planting for home or market in all sections subject to severe winters, the Ancient Briton is recommended as a first-class variety; 3 for 25c.; per 102, 75c.; per 102,

YELLOW VARIETIES

Golden Queen. A beautiful large golden yellow berry, seedling of the Cuthbert, surpassing it in size, beauty, quallty and adaptability, succeeding in all sections. Canes hardy, of strongest growth, wonderfully productive. 2 for 25c.; doz. \$1.

DEWBERRY (OR CREEFING BLACKBERRY)

Dewberry, Lucretia. In earliness, size and quality it equals any of the tall growing sorts, perfectly hardy, healthy and remarkably productive. The fruit, which ripens early, is soft, sweet and luscious throughout, with no hard core; ripe before late Raspberries are gone. Mulch to keep berries from ground. Most profitable small fruit wegrow. 2 for 25c.; doz. \$1.

FAY'S PROLIFIC RED CURRANT,

GOOSEBERRIES

Plant in good rich soil and give a liberal dressing of manure every season. Regular pruning every year is essential for the production of fine fruit. The English varieties especially do best in partial shade, and should be heavily mulched. To prevent mildew spray bushes soon as leaves appear and several times during the summer, with potassium sulphide (liver of sulphur), e to four gallons of water.

Two-year old plants by mail (post-paid).

Two-year old plants by mail (post-paid).

Gooseberries, Industry. The best English Gooseberry; of vigorous, upright growth, and a greater cropper than any known variety; berries of largest size, 1½ in. in diameter, and of most excellent flavor, both pleasant and rich; color when fully ripe, dark red. Ea. 25c.; per doz. \$2.50.

—Downing. The best of the American sorts and a vast improvement on the Hopkino, of which it is a seedling. Fruit large, pale green, and of excellent quality, both for cooking and table use. Bushes stocky, vigorous, hardy, very prolific and nearly free from mildew, but densely clothed with large, sharp spines. The best for general planting. Each, 15c.; per doz., \$1.50.

—New "Columbus," This is one of the most valuable introductions of recent years in small fruits, and it fully sustains the high opinion first formed of it. The fruit is of largest size, handsome, of a greenish yellow color, and the quality is excellent. The plant is vigorous, extremely hardy and productive, and does not mildew. It merits a place in every garden. The raisers of this variety say it out-crops the Industry, and is also superior in quality. Price, each.

—Whitesmith. Combines size, beauty and quality with vigorous growth and productiveness, Fruits are large, roundish oval, and of a yellowish white color, slightly downy, and of the finest quality. Each, 15c.; per doz., \$1.50.

NICK OHMER STRAWBERRY.

BRANDYWINE (Late)

STRAWBERRIES

On arrival of plants, unpack them at once, loosen the bunches and "heel" them in the ground or dip their roots in a "puddle," made by mixing earth in water until of the consistency of cream, and lay away in a cool, damp cellar, where they can neither dry nor freeze, until they can be planted in suitable weather. Do not leave in packages and pour water over them, as this will surely cause the plants to heat and spoil. In planting take but few plants from the trench or package at a time, and expose as little as possible to the wind or sun. Never plant on a windy day, and never in freezing weather. Do not plant very deep, but press the earth firmly about the roots. Should the weather be warm, shade valuable plants for a few days with a handful of coarse litter over each plant, or with berry boxes or baskets (old rejected ones are as good as any). Strawberries will succeed in any soil that is adapted to ordinary farm or garden crops. Soil should be thoroughly prepared to a good depth, well drained and enriched. Vegetable manure (muck, rotten turt, wood soil, ashes, etc.) is the best. For field culture set in rows 3 to 3½ feet apart, 15 to 18 in. in rows; for garden, 15 inches apart each way, leaving pathway every third row. To produce fine, large fruit, keep in hills, pinching runners off as soon as they appear. Ground should always be kept clean and well cultivated. In winter a covering of leaves, straw or some kind of litter will protect the plants. Do not cover them until ground is frozen, or so deep as to smother plants; remove covering before growth starts in spring. Mulching will keep fruit clean and soil in good condition through the fruit season. The blossoms of all varieties are bi-sexual or perfect, eep those marked with the letter P, which are destitute of stamens and are termed the pistillate or imperfect. Pistillate varieties must have a row of a perfect flowered sort, planted every nine or twelve feet among them, or, better yet, every third or fourth plant in the row, to pollenize their blossoms.

SAMPLE. NEW (Mid-season)

Plants very strong in growth, and have a healthy, dark green foliage. Berries large, round or broad conical form and a very dark, rich crimson color. The flesh is dark, rich, juicy, and of very good quality and firm. The excellent plant qualities of this variety, its productiveness, and the fine form, handsome appearance and high quality of the fruit make this one of the most promising of the new sorts. Per doz., 40c.; per 100, \$1.75; by express, at purchaser's expense, \$1.50 per 100.

NICK OHMER (Mid-season)

After watching the Nick Ohmer for four years, we are confident that it is one of the most desirable, if not the very best ever sent out. The plant is very large and stocky, sending out plenty of very strong runners. It is not surpassed in healthy, vigorous growth and great productiveness by any variety. It has a perfect blossom. The fruit is of the very largest size, a giant among strawberries. It is never misshapen. It is a dark glossy red, firm and of excellent flavor. 40c. per doz., \$8.50 per 100, post-paid; by express, at purchaser's expense, \$1.25 per 100.

This fruit is of exceedingly large size, very firm, solid and shapely for so large a berry; flesh red to the core, of delightful aroma, rich, juicy and luscious; the seeds are but slightly embedded, which adds to its firmness; the color is of dark, rich, glossy scarlet; in productiveness it is a marvel, as well as for size and quality. The plants are vigorous, healthy and hardy. Growers pronounce it a superior variety in all respects. Per doz., 30c.; per 100, \$1.25. (post-paid); per 100, by express, at purchaser's expense, \$1; per 1000, \$6.

Has now been tested in many localities, and all agree that it is a remarkable berry for its great size and quality. Plants strong and vigorous, with heavy thick foliage, protecting the blossoms and roots; stands drought well. The fruit is of a dark crimson color, flesh fine and of delicious flavor; a fine keeper and carries to market well. Per dox., 30c.; per 100, \$1.25, post-paid; per 100 by express, at purchaser's expense, \$1; per 1000, \$6.

A superb early variety, uniting large size, great productiveness and good quality in a remarkable degree, and is evidently one or those sorts that is especially adapted to the amateur and those who grow extra fine berries for the market. It is of extra large size, bringing the highest price in the market, bright glossy crimson, and fine in flavor. The plant is strong and healthy, very prollific, and on good soil the berries maintain their large size to the end of the season.

Per doz., 40c.; per 100, \$1.50 (post-paid;) per 100, by express at purchaser's expense, \$1.25.

WARFIELD, P. (Early)

Its handsome appearance, earliness, firmness, good flavor, productiveness and vigor of growth, make it exceedingly popular; berries grand and of a bright crimson color. While not a new variety, it is a favoritie with all who grow it, as being one of the best marketing sorts; stands our winters well. Per doz., 35c.; per 100, \$1.25 (post-paid); per 100, by express at purchaser's expense, \$1.25.

WM. BELT (Mid—season)

A most luxuriant grower and rem

NEW GOLDEN LEMON THYME

A most novel and beautiful dwarf.growing Raspberry, of Japanese origin. Said to he a hybrid between the Strawberry and the Raspberry. In habit it is a spreading, low growing bush, producing its fruit in branching clusters at the end of the stems and well above the foliage. The fruit in form and appearance is about as good a combination of a strawberry and red raspberry as one could well imagine—in size, about midway between the two, and the form of neither, but halfway between each; in color a crimson, and of delicious flavor. Dies down in winter, starting again in the spring more luxurious than ever. Well established plants, by mail, each, 20c.

HERB PLANTS

HERB PLANTS

New Golden Lemon Thyme. Is perfectly hardy growing rapidly.
Leaves are curiously edged and variegated with golden yellow. As an edging or border plant it has no superior. Ea., 10c.; 3 for 25c. holt's Mammoth Sage. Very strong growing. Leaves are borne well above the soil, very large and of uuusual substance, strong in flavor. Each 10c.; 3 for 25c.; for 50c.

Chives, Roots. Grown for their tops, used wherever the flavor of onions is required. Planted in clumps in any common garden soil, they will grow readily and increase. Perfectly hardy. Clumps, each, 10c.; per doz., \$1.00.

HORSE RADISH. Sets, each, 5c.; per doz. 50c.

POULTRY SUPPLIES

RUST'S EGG PRODUCER

MAKES HENS LAY WHEN EGGS ARE HIGH PRICED

TRADE (THE HEN PERSUADER) MARK

A scientific combination of substances, which, when assimilated by fowls, produce eggs, plumage, growth and development, exactly as certain foods produce milk in cows, or fertilizers increase crops. It contains in addition valuable tonics and remedial agents which insure perfect assimilation and robust health, without which the best results cannot be attained. It makes hens lay in summer and in winter. Lb. pkts, 25c. (by mail, post-paid, 40c.); 2½ lb. box, 50c., 5(lb. box, \$1: ao lb. box, \$1:50. by express, or freight only at purchaser's expense.

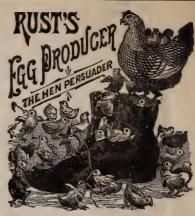

RUST'S LICE KILLING POWDER

This powder kills lice and other vermin on Poultry, Animals, Plants, or on anything. It does not affect the flavor of the eggs or injure them for batching, when fowls and nests are dusted with it. This is absolutely the best louse killer in the market. It is not a poison, but a lasting, convenient, and cheap powder which works without injury to either eggs or chickens. It is entirely reliable in Poultry Houses, Stables, Pigeon Lofts, Kennels, or wherever lice are to be found. We confidently recommend this as being the best yet put before the public. Per lb. package, 25c.; by mail, post-paid, 40c.

RUST'S HAVENS' CONDITION POWDERS

The only positive preventive and cure for Gapes and Poultry Cholera and the best medicine for Horses. Cattle,
Sheep and Hogs.

We warrant Havens' Climax Condition Powders to be free from Antimony, Arsenic, Alum, Resin, Saltpetre, and all harmful ingredients, and to be entirely unlike any other preparation. It is not a food, but an honest medicine

RUST'S HAVENS' ROUP PILLS

These pills act directly on the glands and mucous membrane, allay all tendency to fever and carry off all morbid matter from the system. They are entirely free from everything harmful, and are believed to be the best remedy ever discovered for Roup, Catarth, Colds and Distemper, They are unlike any other medicine, and being composed of medicines in concentrated form, they are of moderate size, and are therefore easy to give to fowls. Price, per box of 48 pills, preservated 456.

PRATT'S POULTRY FOOD

Absolutely pure and free from poisons and all other injurious ingredients. One ounce of Pratt's Poultry Food equal to two tablespoonfuls, positively cures and prevents Chicken Cholera, Roup, Gapes and all diseases of the flock. It regulates the bowels, blood and digestive organs, and produces bone, muscle, feathers and larger fowl. Young chicks grow quickly and free from diseases. Sickly broods are never seen when Pratt's Poultry Food is used according to directions. Hens lay regularly when Pratt's Poultry Food is fed. Per pkg containing 26 ors. 30c. or 55c. post-paid

LAMBERT'S DEATH TO LICE

A Disinfectant Insect Powder

For lice on Setting Hens, Laying or Exhibition Stock. It works immediately without injury to the eggs or chickens. Does not soil plumage, yet purifies and cleanses down to the skin. Also invaluable for lice on Horses, Cattle or Plants, Ticks on Sheep, Fleas on Dogs, Moths in Carpets or Furs. In fact lice on anything can be exterminated by a liberal use of this powder. Price, 5 oz. box, 15c.

ROUP PILLS

CRUSHED OYSTER SHELL

This is the most important article for the poultry yard through the winter, and should be liberally supplied to fowls. In summer, when left to run at large, they can find their own shell making material; but when everything is frozen over or covered with snow, they must be helped out if eggs are wanted.

No.	1,	Coarse	Crushe	đ	 	. 25	lbs.,	25c.,	rco lbs.,	800
No.	2,	Mediu	n "		 	20	lbs.,	25c.,	Ico lbs.,	80
No.	3,	Fine	8.6	******	 	20	lbs.,	25c.,	100 lbs.,	800
No.	4,	for Pige	ons"		 	20	lbs.,	25c.,	100 lbs	804

GRANULATED POULTRY BONE

Is about the size of wheat, and can be fed like any other food in grain, about one handful to every five fowls daily, or every other day. In either manner it furnishes valuable food for poultry at all seasons of the year. 10 lbs., 25c.; 100 lbs., \$2.00.

CLOVER MEAL

Superior to cut clover, from the fact that there is no waste, and every particle is digestible. 5 lbs., 20c.; ro lbs. 30c.; 25 lbs., 60c.; 50 lbs., \$1.00.

MICA CRYSTAL GRIT

One of the principal reasons why so many persons do not have success in raising poultry, is that the poultry cannot obtain sufficient grit to enable them to masticate their food in a proper manner, and strange to say, this is greatly neglected by a great many. It is necessary to feed some gritty material. There is nothing better to supply this want. 20 lbs., 25c.; 100 lbs., 80c.

STONE DRINKING FOUNTAIN

Is designed so that it is quite easily cleaned, easily filled, thus overcoming the difficulty of the ordinary fountain. Each, 40c., by express at purchaser's expense.

PROFITS IN POULTRY Useful and Ornamental Breeds. is an exceedingly valuable book for a uable book for poultry keepers. Price, \$1.25 ea., post-paid

THE TORONTO INCUBATOR

Best machine manufactured for hatching chickens, ducks, turkeys or geese. No incubator has as good a record in the hands of Canadian customers; we have numerous testimonials of

hatches ranging from 90 to 700 per cent. of the fertile eggs. These machines have won two silver medals, a bronze medal and two diplomas at Toronto Industrial Exhibition, defeating all competitors. Price 120 egg capacity, \$20; 220 egg capacity, \$30; 350 egg capacity, \$30; 350 egg capacity.

TORONTO BROODERS Have no superiors as rearers of incubator hatched chickens, built for indoor and outdoor work. Prices from \$8 upwards. Catalogue with full description of incubators and brooders free

Pratt's Poultry Food

Prevents all Diseases, and Cures Roup, Cholera, Gapes, Leg Weakness, etc.

For Chickens, Turkeys, Ducks and Geese—something every poultry man needs to have success in the business. It promotes the general good health of the fowl, greatly quickening digestion, and being a tonic works all the various organs like a piece of machinery.

Use Pan-a-ce-a and make your hens lay when eggs are a high price. It is very valuable for young chickens when they are growing, it aids plumage and gives them a vigorous foundation.

Drinking Fountain

MANN'S STANDARD BONE CUTTER THE PARAGON CORN

INSTANT LOUSE KILLER Kills Lice, Ticks, Fleas, Moths, Ants and all kinds of Vermin. A great Deodorizer and Disinfectant SURE DEATH TO LICE. Probably no single enemy is so universal among stock and poultry as lice. Realizing these facts we have been prompted to formulate an instant Louse Killer. It is not a poison, but lasting, effectual, convenient to use, and the cheapest article that can be had. It is put up in round cans, with perforated lids, ready for use.

This Louse Killer is positively guaranteed to give satisfaction, or money refunded.

Price, per package, 35c., by mail (post-paid), 50c.

FLOWER STANDS

These we carry in stock of various sizes, 36 inches in width, 6 feet 3 inches high. Price, \$5 each, 42 inches in width, 6 feet 3 inches high. Price \$5.50. The style shown is half round.

MANN'S BONE CUTTER No. 1

Its working parts are similar to Nos. 2 and 6, but of smaller size and capacity. Can be readily attached to a table, bench or stand, and will be found profitable and convenient for cutting bones for poultry, where sixty hens or less are kept. Price, \$9.50; on stand, \$12. Weight, \$5 lbs.

MANN'S BONE CUTTER No. 4 Is the Most Perfect Bone Cutter ever made

It surpasses all others in easy and rapid cutting. It feeds automatically, leaves both hands free to operate, and cannot run hard or clog. The cylinder has been greatly enlarged, and bones do not have to be out so small as before. The feed screw is larger, with a square, coarse thread which will not break, wear out or crush down. The cutter plate has been enlarged, has six specially improved steel knives in place of three, with a rim to guard the gears, which prevents the bone or meat getting into them and clogging. All parts are strongly built. Weight, roolbs.

The Automatic Governing Spring Feed is protected by patent, and is only found on Mann's Bone Cutters. The value of this attachment cannot be too highly estimated. It is the only feed ever made that actually controls the power required in turning, so that any and all kinds of bone, either hard or soft, cut equally easy. This No. 4 cuts finer than any machine, fine enough for the smallest chicks. Price, with stand, each, \$16.50; without stand, \$14.

PLANTER

The Paragon is the cheapest and best corn planter on earth. It will pay you to buy one. As a labor saver in a corn planter it stands unrivalled. The working parts are simple and durable. It has been used for a number of years and has given the best possible satisfaction.

DIRECTIONS.—To regulate the number of grains to be dropped in each hill, remove the slide that passes through the planter and you will see a piece of brass that is held by a small screw; by loosing this you can set for any number you wish. After regulating try it on the floor. The planter is used as a walking stick with the automatic foot forward, and as the man steps ahead it will strip the planter. Price, \$1.25 each. By express at purchaser's expense.

BASKETS

BASKE 1 S

LAWN MOWERS "PENNSYLVANIA"

Points of merit: Most perfectly constructed machine made; strong, durable, easily adjusted, has a fear cut, runs easily, almost noiseless, will cut long grass, leaves surface perfectly smooth; knife works from either wheel, few repairs, the favorite machine, and receives highest awards everywhere. If requiring a Lawn Mower select a "Pennsylvania." Price, 15-inch, \$15; 17-inch, \$17; 19-inch, \$19.

THE "BALL RATCHET" MOWER

THE "BALL RATCHET" MOWER

The greatest virtue any mechanical device may possess is eflectiveness for the purpose it is intended, combined with simplicity of construction. This mower possesses both these advantages. Its work is always smooth and clean, its operation easy, and its construction so simple that a novice easily comprehends it at a glance. We guarantee that this mower will do satisfactory work. It is made of good material, and its workmaniship, finish, construction, adjustment, everything about the mower, in fact, is of first quality. All parts are interchangeable and in case of wear or breakage can be duplicated. Diam, of traction wheels, 8½ in., idiam ofreel, 5½ in. Made in 12, 14, 16 and 18-in. sizes. Painted in red and green and decorated in gold. Price, 12-in., 83.75; 14-in., \$4; 16 in., \$4.25.

CONTINENTAL
One of the best high-grade Mowers.
It is made of best material andworkmanship. Drive wheels, 8 in. high. Price, 14-in. out, \$11; 16-in., \$12.50; 18-in., \$14. HORSE LAWN MOWERS

Circulars and prices on application.

Capacity ½ lb. to 1 lb. per minute. The cut represents the latest improved hand machine. We recommend this size and style for all who have a limited number of fowl, believing it to be the simplest and most economical machine that can be made for converting green bones, with meat and gristle attached, into poultry food. The knives are made of the finest tool steel, and can be easily removed and sharpened when necessary. Machine is fitted with automatic feed handle. Price, each, \$21.

WILSON'S LITTLE GIANT MILI

This mill is especially adapted for grinding dry bones, shells or grain for poultry. If the bones are perfectly dry it will grind them very quickly and in a thorough manner. It will crack a peck of corn in twenty minutes. If it is desired to grind corn fine run through twice. Without legs, \$5; with legs, \$7.

FAMILY GRIST MILL No. O

This mill is specially made for grinding Graham flour or corn-meal for table use. It can also be adjusted for cracking the grain if desired. It is a valuable machine to have in the kitchen, as you can have fresh Graham flour or corn-meal when wanted. The grinding surfaces are very hard, made for this purpose. Weight, 30 bbs. Price, without legs, \$5; with legs, \$7. Circulars for larger Mills on application.

STANDARD THERMOMETERS

Warranted Correct. Standard Grade "Air Scale" Made with seasoned tubes, graduated in single degrees, tubes mounted by clasps on heavy metal, very accurate.

No. 105-8-in. Thermometers, each, 80c.; 70-in., \$1; 12-in., \$1.20. post-paid. Ordinary Tin Case. Post-paid, 7-in., each, 30c.; 8-in., 40c; 10-inch, 45c.

REGISTERING THERMOMETERS

No. 100—12-in, Standard Maximum and Minimum Registering tubes mounted together on same plate. Price, \$3.75, post-paid.

INCUBATING THERMOMETERS—STANDARD GRADE
Thermometers for this purpose should have thoroughly seasoned tubes and be specially tested. No ordinary Thermometer will answer

the purpose.

No. 247—6-in. Flanged Metal Scale, specially tested and very accurate. Price, each, 55c. post-paid.

No. 355—Imported German, all glass, for propagating beds and hot-beds, valuable for dairy work, 25c. each.

HOT-BED THERMOMETERS

No. 663—10-in. Thermometer, in round turned wood case with pointed brassbottom. \$1.25 ea.,post-paid

"OUEEN CITY" LAWN MOWER

For the benefit of those of our customers who wish a really good medium priced mower we offer the "Queen City." We can recomment this as being the best machine for the money ever put before the Canadian public. Bearings brass; driving wheel to in. high; cutter knives and blade, finest steel obtainable. Price, 14-in., \$6.50; 16-in., \$6.75; 18-in., \$7.25.

EMPIRE STOCK FOOD

Please do not confound EMPIRE STOCK FOOD with any other similar food or condition powders. Empire, while it tones up, is also a food in itself, and strengthens; nothing but benefit can result from it, either used regularly or occasionally. We guarantee it to contain nothing injurious, and to be compounded of only the finest ingredients.

EMPIRE STOCK FOOD is put up in bags of the following sizes and prices:

10 "	 	0 70	100 " .	\$2 ! 4 !	

Prepaid to any station in Ontario on shipments of 100 lbs. and upwards. For other provinces, special rates for delivery will be made on application.

A tin measure in every bag, on which directions for use are printed.
None genuine unless the package bears our Registered Trade Mark.

If your dealer does not keep EMPIRE STOCK FOOD send direct to us. Circulars on application.

LITTLE GIANT HAND BROADCAST SEED SOWER

This machine does perfect work in the easiest and simplest manner. It is strong and light, weight 3 lbs. It will distribute to the round—wheat 50 feet; flax seed, clover and oats, 36 feet; timothy, 27 feet; and will sow 20 acres per day. We highly recommend this labor-saving machine, and are sure it will prove entirely satisfactory. Price, Crank Seeders, each. \$2.25. Fiddle Bow Seeders, \$1.75, post-paid, \$2.75. Fiddle Bow Seeders,

This is without doubt the best and cheapest instrument on the market for spraying cattle, sheep, pigs, poultry houses, small fruits, house plants, etc. It throws a spray as fine as mist, rendering the use of strong solutions perfectly safe, and uses half the quantity a syringe does. You can spray sideways, upward or downward, as occasion may demand. It is one of the best sprayers for putting on Paris Green ever known, and for spraying house plants it has no equal. Price, each, \$1.50. An attachmet for blowing powder, such as hellebore, etc., on small fruits can be had for 25c. extra.

BELLOWS SPRAYER

ATOMIZER AND SPRINKLER

Spray appears like fog. Best clothes sprinkler in the world. Sprinkles so evenly. Excellent for flowers and house plants. Moistens them as if by a fog. Fills instantly. Uses impossible to describe. Sells on its own merits. 50c. each extra.

EXCELSIOR BELLOWS SPRAYER

ATOMIZER.

THE SPRAMOTOR, JR

\$1.25 each.

"EUREKA" POWDER DISTRIBUTOR OR DRY POWDER SPRAYER

Thousands are in use in Canada and United States. Try one. Guaranteed to save both time and money. For applying pure dry PARIS GREEN and other insecticides for destroying POTATO BUGS and other injurious insects. It does away with the former slow and laborious process of applying mixtures in water and plaster. The process is a quick and effective one, and every farmer should have one of these machines.

For Lightness and Durability the Insect Powder Distributor has no equal. Price \$4.50 each, by express or freight at purchaser's expense.

THE SPRAMOTOR, JR.

SPRAYING NOZZLES

Gould's Improved Vermorel Nozzle is stip in construction, and can be used for anything from a thick paste to the thinnest liquid. The difficulty with most Nozzles is that they do not throw a real spray, which is absolutely indispensable in order to do work well and economically. We can confidently recommend this as a good article at a fair price. Each 75c.

McGowan Nozzle. These Nozzles are the result of several years' experimental work in the construction of one which would be free from defects. In spraying an apple orchard it was found that one of the worst features of spraying nozzles is their llability to clog, unless the liquid thrown is more earfully strained than is practicable in field work. In addition to this, nozzles which throw a fine spray do not concentrate sufficiently upon a given point, but cover too much area, wasting much liquid. Now all these time, patience and money to the fruit growers who avail themselves of their advantages. These nozzles are the most practicable, most efficient, and the best constructed of any made. Price,

This spray pump is constructed entirely of brass, a material that is not affected by the poisonous arsenics used in different formulas for spraying fruit trees, vines and shrubbery. It is so arranged that the labor of pumping is all done on the downward stroke of the piston and nothing on the up. The operator is enabled to keep a constant pressure on the nozzle of from 50 to 100 lbs. with but very ordinary exertion. It will throw a solid stream 50 feet, and is of unusual value for washing windows, buggles, sprinkling lawns, flowers, etc. For spraying it is arranged so as to discharge a fine jet in the bottom of the bucket and keep the solution thoroughly mixed and agitated, a feature peculiar to this pump only, and a very necessary feature to spray pump. Price, each, \$3.50. By express or freight at purchaser's expense.

Spramotor, Jr., No. 2, with two lines of hose each 10 feet long, with couplings attached and two Spramotor nozzles, \$15.50. By express or freight at purchaser's expense. Bamboo extension rods, with drip guard, length 8 or 10 feet each \$2.50. Iron extension rod, length, 8 feet, 50c, Stop-cocks, each, 75c. By express or freight at purchaser's

EVANS' ELECTRIC SPRAYER AND BUG EXTERMINATOR

For spraying cattle, small fruits, etc., it is unsurpassed, and for putting Paris Green on potatoes it has no equal. Is by long odds the Simplest, the Cheapest, the Lightest and the most effective machine on the market. The Electric Sprayer and Bug Exterminator is a machine that will make and save more money for Farmers, Gardeners, Florists, Orchardists, Stockmen and Poultrymen than any other machine they can buy, cost not considered. Price, \$1.25 each, post-paid.

SPRAMOTOR, JR.

"OUTFIT F"

This outfit is complete in every re-ct, and with it any kind of work can be done that can be accomplished with one nozzle. When attached to our be done that can be accomplished with one nozzle. When attached to our patent five gallon can, it is a most portable device; can be carried about by one hand or by means of the handles provided. The can has a raised bottom and heavy flanged rim, on which The can has a raised bottom and heavy flanged rim, on which the can rests. Our patent catches allow the lid to be instantly removed. It effectually prevents any splashing, and a lady can use the apparatus at any class of work or with any kind of mixture and not soil her dress. They can be refilled (without removing the Spramotor), through the hand-hole provided with cover for that purpose. As all the work of pumping is done on the down stroke, there is no tendency to lift the can in raising the handle of the pump. The stroke of Spramotor, Ir. is four inches, and the diameter of the plunger is 1g inches, and a vapor spray can be developed easily. One operator is all that is required to properly use it. Price, complete, including can and iron extension rod, \$8.25; with bamboo extension rod, \$8.25; with bamboo extension rod, \$10.60. By express or freight at purchaser's expense.

USE Whale Oil SOAP

TO KILL THE

ROSE BUG

GREEN FLY RED SPIDER BLIGHT

Little's Antipest.—This invaluable preparation may be freely used in conservatories, greenhouses and in the garden. It is non-poisonous and harmless to vegetation, when diluted according to the accompanying directions. Gardeners will find this a simple, hardy and cheap remedy against the attacks of insect pests. It mixes instantly with cold water in all preparations. Price, ½ pint bottles, 50c; r pint bottles, 75c. Cannot be mailed.

Gardener's Insecticide.—This fluid destroys all insect pests on plants and trees, and prevents blight and mildew. Cannot be mailed. Price, per bottle, \$1.25. Hellebore. Powdered.—For destroying slugs, caterpillars, current worms, etc. Lb., 25c.; by mail, 40c

Nikoteen.—Is the cheapest, cleanest and most effective of insecticides, and will not injure or discolor delicate plants. It is composed of that element in tobacco which gives it its value as an insecticide and nothing else. The best extracts of reloacco contain from 1½ to 2½ per cent. of nicotine, this preparation contains 40 per cent. of nicotine, and one case of ten bottles is equivalent to two thousand pounds of stems, or twenty-five gallons of tobacco extract. Cannot be mailed. Pint bottle, \$2.00.

Tobacco Soap.—Makes an excellent wash for plants and trees infested with insects, and is particularly effective in killing green and black fly aphides, turnip and cababage fleas, rose slugs and bark lice. Dissolve 2 oz. in a gallon of water, apply with spraying pump, etc., or dipping plants into solution. Per pkg., 25c.; by mail, 35c.

MEALY BUG SCALE THRIP

Fir Tree Oil.—Soluble insecticide, effectually destroying all kinds of pests to which plants are subject. Equally effective on animals, and is harmless to the skin and hands when used as a wash. Full directions with each bottle. Cannot be mailed. Per bottle, 4 sizes, 25c., 50c., 75c., 53.00.

Whale Oil Soap.—One of the most effective and cheapest remedies to destroy slugs worms, and other insects on trees, shrubs, garden and house plants. One pound of soap to seven gallons of water for applying to foliage. Use two ounces to one gallon of water for spraying rose bushes, etc. Lb, 20c.; post-paid, 40c.

Persian Insect Powder.—For destroying Roaches, Ants, Fleas and all other noxious insects. Per lb, 75c., post-paid.

Gishurst's Compound.—For destroying Green Fly, Mealy Bug, Thrip, Mildew, etc. Per pkt., 50c., post-paid.

Sug Shot.—For destroying Potato Bugs and those on Tomato and Egg Plants, Currant Worms, Cabbage Lice and Worms, Beetles, Striped Bugs on Melons, Squashes, Turnips, Beets, Canker Worms and Caterpillars on Fruit and Ornamental Trees, Rose Bugs, Cut Worms, etc. Price, 5 and 10 lb, pkgs, 6c. per lb.; by mail, 25c., post-paid.

Flower of Sulphur.—For the prevention and destruction of mildew on plants, blow it over and through the foliage when the dew is on or after a thorough syringing. Price, per lb., 25c., post-paid; 10 lbs., \$1, by express at purchaser's expense.

"PLANET JR." GARDEN TOOLS for 1902

The "Fire-Fly" Garden Plow. This tool is most useful in small gardens, opening furrows for manure or seeds, and covering them quickly. Chicken-raisers will find it very useful in plowing up the scratching yards. The moldboard is of tempered and polished steel; the depth is quickly changed. Price, \$2.75.

"Planet Jr." No. 11, Double Wheel Hoe Cultivator Rake and Plow, This perfected wheel hoe is invaluable for use in all small crops. Its variety of work is almost incredible. Changes and adjustments of the tools are made with the greatest quickness. It has 14-inch wheels, which can be set at four different distances apart; the frame is malleable, with ample room for tool adjustment and can be set three different heights. The handles are adjustable at any height, and, being attached to the arch, are undisturbed in making changes of adjustment in frame, wheels or tools. The arch is of stiff steel, unusually high; the quick change frame permits the tools to be changed without removing the nuts. Seven pairs of tools, as shown in the cut, go with the complete wheel hoe. All the blades are of tempered and polished steel. Price \$9.75.

59.75.

The "Planet Jr." No. 12, Double Wheel Hoe, Cultivator and Plow. This tool is identical with No. 11, except that it has a less complete equipment, as shown in the cut, but at a correspondingly less price. The set of tools with No. 12 is what gardeners need most, and the rest can be added as wanted.

Price, \$7.50.

The "Planet Jr." No. 13, Double Wheel Hoe. This tool is the No. 11 with 6-inch hoes only, this pair of tools being most generally useful at all seasons. Any or all of the No. 11 tools may be added at any time, and are sure to fit. Any or all of t Price, \$5.25.

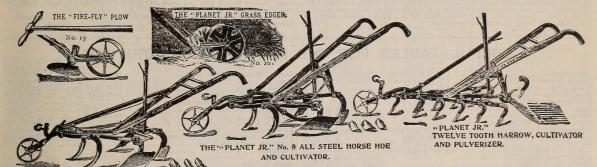

**S.25.

"Planet Jr." No. 16 Single Wheel Hoe, Cultivator, Rake and Plow. This latest and best single wheel hoe has a very full set of tools, several of them being of new design, such as have been found to work in the very best manner. It has 11-inch wheel, with broad face; is very light, strong and easy running. It has adjustable handles and quick-hange frame. The tools are a well-shaped plow for marking out plowing, covering, and late cultivation; a pair of 6-inch shield hoes and three all steel patent cultivator teeth; also a set of two rakes, just the thing for preparing ground for the seed drill. A practical leaf-guard holds up the plants, while thorough work is being done underneath; the frame changes in height, and the wheel may be attached to the other side of the frame, when both sides of the row may be hoed at one passage. Price, \$6.50. passage. Price, \$6.50.

No. 17 Single Wheel Hoe, Cultivator and Plow. This tool is identical with No. 16, but has only a pair of 6-inch hoes, a plow, and a set of cultivator teeth—an outfit sufficient for most garden work. The other attachments can be added at any time. Price, \$5.50.

No. 17% Single Wheel Hoe and Cultivator. This machine is similar to No. 17, except it has no plow, but it has a leaflifter. Thousands of them are sold annually for cultivating sugar beets and onions. Price, \$5.00.

No. 18 Single Wheel Hoe. This tool has the same frame and handle as No. 16, but has one pair of 6-inch hoes only—the tools that are most constantly useful throughout the season. All the other tools can be added as needed Price, \$3.75.

THE PLANET JR." No. HORSE HOE AND CULTIVATOR.

The "Planet, Jr." No. 7, Horse Hoe. Probably no other cultivating machine is so widely known as the "Planet Jr." Combined Horse Hose and Cultivator, for it is unse throughout the civilized world and gives the highest satisfaction everywhere. It has the high frame, patent hollow steel standards, patent lever Stax wheel, and lever expander, and is the best horse hoe known, except the No. 8. Price, \$9.

lever expander, and is the best horse hoe known, except the No. 8. Price, \$9.

The "Planet Jr." No. 8, Horse Hoe. It is so strongly built as to withstand incredible strain, yet it is light and easy to handle. For 1902 we offer important improvements in the No. 8 "Planet Jr." Horse Hoe and Cultivator, as described below: The Frame is longer than usual and about one-and-a-half inches highed below: The Frame is longer than usual and about one-and-a-half inches highed making a tool that will not clogeasily. The Standards are formed up hollow with round throats of stiff steel; they polish quickly and free themselves readily from obstructions, and they clasp the frame and strengthen it. The Depth is under perfect control by means of a new lever wheel and the new patented depth regulator, which are moved instantly in unison by a single lever, making exact work, steadying the machine and relieving the operator. The Expander—This is an entirely new pattern, superior to all other forms: exceedingly strong, simple, accurate and positive in all positions. Handle and Braces—These are also absolutely new and the most effective and stiffest combinations known, at once making the tool rigid, yet allowing every adjustment of handles in height and sidewiss. Every part is perfected to make the tool acceptable to the intelligent farmer, who ham we have best is always the cheapest. Price, \$9.50.

Descriptive and Illustrated Catalogue sent on application.

Descriptive and Illustrated Catalogue sent on application.

We carry a full line of machines and repairs. Every piece has a mark or number upon it. Be sure and mention number when ordering repairs or parts.

The "Planet Jr." 12-Tooth Strawberry Cultivator and Harrow.—This tool has rapidly grown into favor with farmers, market gardeners and strawberry growers. It has a high frame and the chisel shape teeth cut an inch wide each. It may be set with teeth trailing.

The foot-lever pulverizer is a capital addition for preparing ground for the seed drill or for plant setting. Hand levers regulate both width and depth while in motion; it contracts to 12 inches, and may be further reduced in width by taking off the outside teeth; it expands to 32 inches. It cultivates deep without throwing earth upon the plants, and the smooth, round-throated teeth turn strawberry tunners without injuring them. Strawberry Runner Cutter Attachment consisting of a 10-inch flat steel disc mounted on an outrigger, extra. Price, without pulverizer, \$8.25; complete, \$10.

The New "Planet Jr." Potato Digger. An indispensable instrument for potato growers. It digs clean, does not cut or bruise the tubers, and leaves them easy to gather. It works perfectly in green vines or among weeds, and leaves the field nearly level. The draft is light, quickly adjusted, easily managed, and will last a life-time. Is the best digger ever offered, will save its cost in a few days.

"Planet Jr." Double Celery Hiller. Celery Hillers are now considered indispensable in celery growing. The leaf lifters are adjustable in height, and are especially valuable for first workings. With them some of our best and largest growers hill their celery without any handling whatever. We make both single and double hillers, both with lever expanders and leaf lifters. The double is fitted with lever wheel. The hilling blades are 43 inches long, adjustable in width or height as wanted; the double machine works all rows up to four feet apart. Before hilling the soil should be thoroughly loosened with a horse hoe. Price \$14.50.

FERTILIZERS

Concentrated Soluble Albert's Horticultural Manure

Brings Flowers to Their Fullest Development in the Shortest Time.

Do not put the Manure, dry or dissolved, on the leaves, and do not overdose, as plant roots take it up very greedily, and if overfed suffer from the results of overfeeding.

FOR POT PLANTS. For all pot plants this concentrated manure is unsurpased. It is best dissolved in water in the proportion of ½ to 1 oz. to a gallon, and this solution used for watering, taking care not to let any of the solution come in contact with the leaves. Quick growing plants, such as Begonias, should be watered once a week, and Palms, Rubbers, etc., once every two weeks. By such applications the plants develop more rapidly, and produce an increase of bloom to an extent hitherto unknown. It can also be mixed with the soil before potting, at the rate of one dessert-spoonful manure to one gallon of earth. Full directions on each package. Price, 1 b. package, 25c.; mail, post-paid, 49c.

NITERTE OF SODA. When applied with farm yard manure at the rate of from 300 to 500 pounds per acre, it gives astonishing effect. Market gardeners can use it profitably for cababasing, calliflower and other crops. It improves and hastens the strawberty crop. For farm crops, such as wheat, barley, calliflower and other crops, such as wheat, barley, oats and corn, a moderate quantity applied broadcast on the land its excellent. Price, 25 lbs., \$1.01; 50 lbs., \$2.00; 500 lbs., \$8.00; per ton, \$30.00, on cars, Toronto.

STANDARD PLANT FOOD. A preparation made expenses, MURATE OF POTASH. 25 lbs. for \$1.50, 50 lbs., \$2.00; 500 lbs

so lbs. for §3.00; 100 lbs. for §3.50. By freight or express at purchaser's expense.

QUEEN CITY LAWN FERTILIZER. Especially prepared for use upon lawns, and contains all the constituents for promoting a quick, luxuriant growth, and a rich green color. It is absolutely odorless, and so clean that it can be applied with no offence to the organs of sight or smell. It is quite in stimulating the grass roots to greater activity, thereby inducing a thick, velvety surface upon the lawn. The common habit of applying coarse stable manure upon lawns causes weeds to grow, and is very offensive to both sight and smell. Better and cleaner results are secured by using "Queen City" Lawn Fertilizer. When making a new lawn apply from 150 to 200 lbs. per acre, raking well into the soil. For improving the lawn about 1 pound for each 16 feet square. Care should be exercised not to apply too much at one time, as it is strong and liable to injure the grass when carelessly applied. Apply when the grass is dry, and if possible just before a shower. It is exceedingly valuable as a garden fertilizer, and can be applied at the rate of r lb, to rofest square. Price, 5 lbs., 360.; roo lbs., \$3.50. By freight at purchaser's expense. You can order through your local dealer, who will gladly
